

Canadian Profile of the Common Alerting Protocol Event References

Title:	CAP-CP Event References
Description:	Identifies the events and event codes to be used as part of the Canadian Profile of the Common Alerting Protocol (CAP).
Date:	July 11 2012
Version:	Beta 0.5
Replaces:	Beta 0.4
CAP-CP Documents:	1. CAP-CP Introduction and Rule Set 2. CAP-CP Event References 3. CAP-CP Location References

Purpose of this Document

This document identifies the specific alert event references to be used, in order to satisfy the requirements of the *Common Alerting Protocol - Canadian Profile (CAP-CP)*.

This document is versioned independently of CAP-CP rules included in the CAP-CP Introduction and Rule Set document, since it applies directly to the business of public alerting rather than the technical specifics of XML formatting. The event list is expected to be updated more frequently than the rule set which addresses the CAP-CP position on CAP formatting and structure.

I. Authors

The principal authors of this document version are listed below in alphabetic order:

- Doug Allport, Canadian Association for Public Alerting and Notification / Allport Group Inc.
- Jeff Boyczuk, Public Safety Canada
- April Diver, Alberta Emergency Management Agency
- Khalil Hayek, Natural Resources Canada
- Norm Paulsen, Environment Canada
- Jacob Westfall, Net Alerts
- Wendy Wu, Industry Canada

II. Copyright

Copyright 2012. This document may be reproduced, without charge or request for permission, provided it is reproduced in its entirety and without modification.

Additionally, contents of this document may be used in the creation of other documents, providing attribution is given to CAP-CP, and providing the new document is identified in such a way that it will not be interpreted as an official CAP-CP document.

III. Notices

This document and the information contained herein is provided on an "AS IS" basis and the Authors, and their officers, employees or agents DISCLAIM ALL WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY OR REPRESENTATION THAT THE USE OF THE INFORMATION HEREIN WILL NOT INFRINGE RIGHTS OF OTHERS, OR ANY IMPLIED WARRANTIES OR REPRESENTATIONS OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

IV. Revision Summary

Version 0.5:

1. The word alert/alerte removed from the tier II AMBER¹ and Silver¹ alerts for consistency with all other events.
2. Two typos in event list (one French, one English) corrected
3. Addition of the Health category to some of the heat alerts
4. Addition of the Other category to some of the plant alerts
5. Addition of references to www.CAP-CP.ca

1) If properly assessed at this level, AMBER (and Silver) are not actual event names describing the event in an equivalent manner to all the other events listed in the column. An event description such as "child abduction" would be more appropriate, however since many systems will display the event name along with the term "Alert", and since AMBER is a well known branded term (when used with Alert), it can be used in place of "Child Abduction" in this column.

V. Other CAP-CP Documents

The entire CAP-CP is defined in this document, and the following two additional documents, all of which can be found at www.CAP-CP.ca:

1. [CAP-CP Introduction and Rule Set](#). This document details the specific requirements, constraints, and recommendations associated with the Canadian Profile of the CAP. It is versioned independently of this document.
2. [CAP-CP Location References](#). This document details the current versions of the Standard Geographic Classification (SGC) location references supported by CAP-CP. It is versioned independently of this document.

Be sure to check www.CAP-CP.ca for updates to this document.

VI. Associated Documents and Resources

1. www.CAP-CP.ca. The CAP-CP website identifies numerous CAP-CP related resources.

VII. Terminology

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in IETF RFC 2119, available at <http://www.ietf.org/rfc/rfc2119.txt>

Additional terminology is specified in the CAP-CP Introduction and Rule Set document.

VIII. Event Reference <valueName>

CAP-CP has adopted a URN-like scheme for creating valueNames. Event reference valueNames use the following format:

`"profile:CAP-CP:Event:{version number}"`

As mentioned previously, the versioning of this CAP-CP Event References document is independent of the other CAP-CP documents, to allow them to be revised independently.

The following <valueName> value is defined for this version of the Event References document:

profile:CAP-CP:Event:0.5

IX. Event List

CAP-CP events are identified as belonging to one of two tiers of event types: Tier I or Tier II.

Tier I events refer to a class of events whereas Tier II events are quite specific. As an example, "heat wave" and "cold wave" are Tier II events, within the Tier I class of events titled "temperature". Similarly, Tier II "dangerous person" and "home crime" are within the Tier I class of "criminal activity".

We note that Tier I and Tier II events may be associated with one or more CAP categories. As an example, “air quality” may be associated with CAP categories “Met”, “Env”, “Geo”, “Health” and “Transport”. The associations found herein are suggested, but not definitive.

Originators are encouraged to use Tier II selections whenever applicable. Tier I references are better suited to events which do not have a more specific Tier II selection.

The event list is presented in seven columns. The first two columns present the Tier I class of events in English and French. The next two present the Tier II specific events in English and French. The fifth column provides the event code. The sixth column identifies the CAP categories to which the event may be associated. *eventCode* and *category* values, listed and shaded in the table below, are computer based codes that are used as given, irrespective of language. Column seven indicates whether the event naming has been verified by an issuing authority where such authority, or group of stakeholders, has responsibility in this area. The numbers in this column indicate the authority(s) which approved these event names, as listed in the Table of Recognized Contributors/Reviewers below.
