OF THE

SUPERINTENDENT OF PENITENTIARIES

FOR THE

FISCAL YEAR ENDED MARCH 31, 1921

To the Hon. R. B. BENNETT, K.C., Minister of Justice.

Sir,—I have the honour to submit reports and statistics regarding the administration of penitentiaries for the fiscal year ended March 31, 1921.

The number of inmates in custody at the close of the fiscal year was 2,150, as compared with 1,931 at the beginning of the year. The average daily population was 2,058.

The following table shows the movement of population at the several penitentiaries:—

	Kingston	St. Vincent de Paul	Dorchester	Manitoba	British Columbia	Alberta	Saskatche- wan	Total
In custody April 1, 1920	615	520	306	156	114	34	186	1,931

The last days of the year 1919-20 marked the closing of the Alberta penitentiary, and the year 1920-21 was begun with six instead of, as previously, seven institutions.

The inmates of the Alberta penitentiary were divided between the Saskatchewan and Manitoba institutions, and the officers who accepted transfer were distributed amongst Saskatchewan, Manitoba, and Kingston.

The warden of Alberta penitentiary was transferred to Kingston to fill the vacancy caused by the transfer to Ottawa, in July, 1919, of Mr. R. R. Creighton, who for five years had been warden of that institution.

The warden of Dorchester, Mr. A. B. Pipes, resigned on March 31, 1920, and Mr. G. S. Malepart, warden of St. Vincent de Paul penitentiary, resigned on February 28, 1921, the former having served over thirty and the latter over forty years.

W. J. Carroll, deputy warden of British Columbia penitentiary, who had been in the service over thirty-four years, resigned on November 5, 1920. D. O'Leary, who had been in the service of the Dominion Government thirty-eight years, resigned on October 31, 1920.

L. H. Chambers, deputy warden of the Dorchester penitentiary, resigned on

December 1, 1920. He had over thirty-four years' service to his credit.

Mr. W. Meighen, deputy warden of the Alberta penitentiary, was promoted to be warden of that institution, and after dismantling same, and shipping all material to other penitentiaries, was transferred to Dorchester on August 1, 1920, in like position.

The wardenship of St. Vincent de Paul had not been filled at the close of the fiscal year, and J. D. Fitzgibbon, deputy warden, was acting-warden in charge. Of the seven above-mentioned important positions, six have been filled by promotion; the seventh had not been filled at end of fiscal year.

Warden Ponsford was received at Kingston penitentiary with open mutiny by the inmates, who, encouraged by a percentage of the staff, were shouting and otherwise defying the authorities. The majority of the officers, however, were loyal, and after the removal of several of the disloyal ones affairs at that institution assumed a fairly normal condition.

The action of the warden in removing these officers was made the subject of inquiry and an investigation was held by O. M. Biggar, K.C., Chief Electoral Officer, which resulted in the action of the warden being sustained. No further serious trouble occurred until October, when the inmates again mutinied and for several days were very noisy and refused to work.

This led to an investigation being held by the Superintendent of Penitentiaries, which resulted in the dismissal of six and the retirement of six officers, while two others guilty of very grave offences were suspended and their dismissals recommended. The two latter protested their innocence, and a further investigation, which lasted some months, was held by W. F. Nickle, K.O., by direction of the Honourable the Minister of Justice. The report of Mr. Nickle was practically a corroboration of that filed by the superintendent, and the two officers were eventually dismissed, the one having been on suspension eleven and the other nine months.

The matron and deputy matron of the female ward of the penitentiary were also retired on report of the superintendent. Laxity in all departments, which had crept in during the war, when there was no inspection, was responsible for the existing very unsatisfactory condition. Trafficking with inmates by officers was carried on in a wholesale manner, and quite openly; objection by outside parties to the disciplining or removal of dishonest or incompetent officials added to the difficulties. The staff of the Kingston penitentiary is to be congratulated on having succeeded in restoring order and discipline within the institution, and on having removed from the list of officers several who were dishonest, dangerous and a menace. Nothing out of the ordinary occurred at any of the other penitentiaries throughout the year.

The population of the Dominion penitentiaries increased during the year from 1,931 to 2,150 souls. Almost all of this increase occurred in the three eastern penitentiaries, Dorchester, St. Vincent de Paul, and Kingston. Many of the inmates are very young men, and most of them are graduates of some of the numerous provincial reformatories.

When visiting a penitentiary recently, the superintendent personally interviewed 197 inmates, who had asked to see him—164 of these were graduates of reformatories, one having had eight convictions, while several had five, and fully one-third had served more than one term in a reformatory school, or like institution; practically all of them were young men between the ages of 17 and 25 years. Most of them acknowledged lack of proper home training, to having spent their evenings at moving-picture shows, or on the street, to the carrying of revolvers, petty thieving and joy riding in stolen motor-cars. A number had been sent to the penitentiary for having

escaped from reformatories; one had escaped on five occasions. Nearly all of them were good looking, bright, intelligent boys, who had never been taught to take anything seriously; who had no respect for law and order and little regard for institutional rule or regulation.

In order to make good citizens of the hundreds of young men now pouring into the penitentiaries, institutions should be provided for their proper segregation and classification, together with suitable Government work in sufficient quantities to keep them continually and usefully employed. It would be an easy matter, in a very few years, to make the penitentiaries, not only self-sustaining, but to pay each inmate a small wage for labour satisfactorily performed. Tremendous advancement has been made in the last two years, but it is only a beginning of what should be done.

Reconstruction of the old penitentiaries is being carried on, but such work is necessarily slow as it takes much longer to remodel the old than it does to construct a new building, and the remodelled one has generally to be confined to the area and limitations of the old. Then, too, the old prisons were not designed to reform those sent to them; they were built to detain and punish criminals, and the transformation of such into up-to-date penal institutions is a somewhat serious and impossible undertaking. It is not only much more satisfactory to build a new up-to-date prison than remodel the old, but it is much less expensive.

Large additions have been made to the libraries in the different penitentiaries, and many volumes of a technical and educational nature have been added. An endeavour has been made to raise the standard of all reading matter, and books to suit all proper tastes are provided; thus when an educated inmate comes to the prison we no longer insult his intelligence by offering him literature to read which he

despises.

Moving-picture entertainments are now provided at intervals, and have been greatly appreciated. They break the monotony, and anything that prevents the inmate from sinking into apathy, from brooding on petty events that go to make up their lives in prison, and chafing against restraint is beneficial.

Endeavours are now made to study the individual inmate. Distinctions between them have never been sufficiently recognized, and no real results can be obtained in the treatment of the offender until the distinctions between one prisoner and another

are taken into account.

It never does any good to treat a man as a machine, but in the past there has

been a tendency to do so under the name of discipline.

About 60 per cent of those sent to the penitentiaries leave them without having suffered punishment. The more punishment inflicted on inmates in a prison the stronger the probability the place is poorly managed. It has also been demonstrated that seldom is a conversion to virtue obtained through punishment. Physical force can check or temporarily restrain various forms of evil, but usually at the cost of rendering them still more intense and permanent. It is more often the force of persuasion, patience, gentleness and true religious influence, which can successfully convert those possessing wicked feelings and ugly dispositions. This is, however, a much more difficult task, and one for which few officers are fitted.

It has been truthfully stated: "The soul of all human improvement is the improvement of the soul." Evils, whether social or moral, can be overcome only by good influences. Carefully selected, well-trained, God-fearing officers are therefore essential to the successful management and reformation of the criminal, and their

selection and training should be a matter for serious consideration.

The earning of remission and the hope of more speedy release from prison by parole are the two great incentives to good behaviour in the penitentiaries. Remission is awarded for good conduct and industry, and is credited monthly to all those who earn it, and to those who earn it only; those whose conduct has not been good and who do not work diligently are not awarded remission; not so the parole, however, as

very frequently inmates are released on parole who are amongst the worst behaved in the prison, while it often happens that first offenders, though their conduct in prison has been exemplary, obtain their release by expiration of sentence only. This should not be, as the releasing on parole of men of bad conduct, and the refusal of parole to the well behaved causes widespread dissatisfaction amongst the inmates.

Area parole officers and boards, as recommended in superintendent's reports of 1919 and 1920, should be established, and inmates should be released on parole only on the recommendation of such boards, considered in conjunction with the report of the trial judge. Such methods would ensure that only those who are daily in contact with the inmates, and are therefore able to intelligently express an opinion regarding them, would have authority to recommend their release.

There should be an honest attempt made to assist the inmates on discharge. They go out into the world feeling anxious and discouraged as to their future. Then is the time they require a helping hand, moral support, and a friend. Work should be provided for them and an abiding interest taken in them until they become re-

established in society.

A man's conduct may be improved in prison, but you will not know how he will act when at liberty. Therefore all inmates on discharge should be guided and assisted so long as they require a strengthening hand.

Unless sympathetic supervision is given them in the community, which will assist, encourage, and strengthen them in resisting temptation, they will seldom reform. They must not only be prevented from returning to their former courses, but helped and directed into better ones.

The Salvation Army is deserving of great praise for its efforts in this connection, as it continually assists those discharged from penitentiaries. The work

done in this cause is excellent, well organized and continuous.

Prices of commodities used by penitentiaries increased tremendously during the year, many having trebled in cost, while the most common ones such as flour, sugar, rice, potatoes, cloth, leather, coal, cotton, etc., cost much more than was appropriated for their purchase. Freight rates were also increased very considerably. It is submitted the various wardens have managed wonderfully well in keeping the per capita cost so low.

A small ration of tobacco is now provided for each inmate who before coming to

the penitentiary had used same.

The unrest pervading the whole world has to a certain extent, affected the penitentiaries, and a type of inmate very difficult to successfully manage is now quite common in the institutions.

RECOMMENDATIONS

A new penitentiary in the east should be constructed at once; it should be built on the most up-to-date plans, and can be constructed with prison labour. All plans and supervision to be supplied by the Penitentiary Branch; thus the cost to the Government would be very small as compared with prices paid contractors for similar work. Its erection is essential, as the three eastern penitentiaries are now sadly overcrowded, and the population of these institutions is still going rapidly up. During the past year work on the new cell wings at Kingston, St. Vincent de Paul and Dorchester penitentiaries has been rushed. These three wings have an aggregate capacity of over 600 souls. Should the increase in population continue as at present additional accommodation will have to be provided before the winter of 1921.

To the new institution only those who have been convicted for the first time, and whose crimes have not been of a brutal or vicious nature should be sent, or

should the offending one be under twenty-five years of age, even though he had previously been found guilty of an offence, he also might be admitted providing the nature of his crime did not warrant his exclusion.

This class of penitentiary should have been provided many years ago; in fact such an institution was under construction in Canada in 1896, and the officers then responsible for penitentiary management were well ahead of the rest of the world in this needed reformation. With such an institution it will be possible to properly

classify and segregate the inmates of Eastern Canada.

The present system, if such it may be called, of purchasing supplies, should be abolished, as it has been proven to be most unsatisfactory in many ways, much of the material requisitioned for is not delivered until months afterwards, and complaints regarding quality are frequent. The wardens of the penitentiaries have no knowledge of the samples accompanying the tenders, and as no samples are provided they have no information that the goods delivered to them are of similar quality to what contractor agreed to provide. Delay in payment of accounts is also caused by this system.

The purchasing agent should be located in the Penitentiary Branch, where all matters regarding purchases could be discussed with the superintendent, structural engineer and accountant, and thus avoid the necessity of much correspondence and

telephoning.

The checking of invoices for payment would also be facilitated, and purchasing agent's present staff materially reduced as well as the rental of his office saved.

The female portions of the penitentiaries should be outside the male inclosure. A criminal insane asylum should be built for the care and maintenance of the criminally insane. This should be centrally located and properly staffed.

More Government work should be provided to enable us to pay the inmates a

fair wage and permit them to buy a stated ration of tobacco weekly.

There should be a Canadian Prison Congress meeting annually to discuss the

methods of dealing with the criminal in Canada.

A canning industry should be established in connection with the penitentiaries to provide canned goods for the different institutions. This would not only ensure that proper canned fruits and vegetables could be had in sufficient quantities to meet the demand, but a tremendous saving to the Penitentiary Branch would result.

Advanced methods of agriculture should be taught in all penitentiaries.

It is recommended that those who have been educated in the handling of criminals and the management of penitentiaries be invested with power to administer the affairs of same.

The training of all discipline officers before being permitted to assume responsible duty is again suggested. The duties of these officers are partly military and partly police, and should be largely reformatory. That they be thoroughly trained before being placed in charge of inmates is recommended as an outstanding essential.

Wardens and surgeons of penitentiaries should be afforded every opportunity of visiting other penitentiaries, prison congress, etc., and of studying methods of administration other than their own.

Appointment of area parole officers and creation of parole boards in each penitentiary area.

During the past two years investigations were held into incidents at the Kingston penitentiary by outsiders. The warden of Kingston penitentiary has expressed himself strongly regarding this practice in his report; to what he has said I heartily subscribe and add, investigations such as these totally destroy the esprit de corps, morale and discipline of an institution, and no man other than one educated in prison management can successfully investigate the affairs of a penal institution.

At an investigation held at a penitentiary only a few years ago, the sworn testimony of every blackleg in the institution was taken and published as truth. The sworn testimony of an inmate who had been twenty-five years continuously in the asylum was also taken and published. This inmate is still insane and the penitentiary pays for his care and maintenance in a mental disease hospital. Another inmate appeared before this commission, and after telling a lamentable tale of abuse and ill-treatment accorded him, removed his shirt and exhibited his back which was covered with scars, and with sobs and tears explained how his poor back had been lacerated by water with which he had been wet when given punishment by hosing.

This story was also published broadcast throughout the Dominion—no doubt to impress the public with the terribly brutal treatment accorded inmates of the penitentiaries. This man was serving sentences aggregating thirty-six years, and one of the crimes he had been convicted of was that of having abducted a very young girl, a school teacher, whom 'he waylaid on her way home after closing her school for the day, and whom he forcibly detained in the woods for some days until she was rescued by a vigilance party who had tracked him down. The infuriated rescuers beat the man with limbs of trees and attempts were made to lynch him. The pits and marks in his back were scars resulting from the whipping he had been given by these men. Notwithstanding this, an endeavour was made to have the public believe they were the results of a hosing given him, as in all other cases, with his clothing on. Other such cases could be cited.

Another committee has recommended the abolition of "Contract labour system within the penitentiaries—the abolition of hosing," and several other similar recommendations.

Contract labour in Canadian penitentiaries was abolished over thirty years ago. Hosing of inmates was abolished in 1913—eight years ago—but it is used very freely as a curative measure in healing the sick and wounded soldiers in the Soldiers' Civil Re-establishment hospitals throughout the Dominion to-day.

A board to manage penitentiaries was recommended. This would indeed be a very retroactive step, as such a board was appointed and existed years ago, was found to be inoperative, disbanded, and the then secretary appointed Inspector of Penitentiaries to manage same.

Another recommendation was: "That no officer be permitted to place his hand on an inmate other than to prevent escape, or to defend himself from attack." If such a regulation became law, the inmates employed on the farm or elsewhere, could at any time refuse to go to the prison, and the officers would be powerless, and they would have less authority over convicted criminals placed in their charge there—"to be maintained in custody, and kept at hard labour"—than has the policeman over free citizens of every walk of life.

Discrimination against Canadians who speak either French or English, in favour of the foreigner, was also recommended.

Those not familiar with penitentiary administration usually suggest methods seen or read of, in use at some boys' industrial school or like institution, and overlook the fact, when making such recommendations, that the methods of the kindergarten are never applied to the collegiate institute.

In looking about for information with a view to improvements, one should choose the system productive of best results, not necessarily the one most advertised.

Serious warnings have been given by many sheriffs and police officials of the United States regarding the laxity with which the law in that country is enforced, and also have warned against the maudlin sympathy wasted on those convicted of crime.

In England, the severity of former years has been abandoned, and much more sane and humane methods now prevail. There is no criminal laxity, however, in either the enforcement of the law or management of those convicted of crime. It would appear, therefore, if good and sane results are to be obtained in Canada, we should study the English systems with a view to adopting what they have to offer by way of improvement.

The following from the Philadelphia Public Ledger is somewhat amazing, and

very convincing:-

"Mention has been made of Raymond B. Fosdick's book, American Police Systems. Some of the figures in it almost stagger belief. For example:—

"Boston's arrests in 1918 exceeded London's by 32,520.
Philadelphia's arrests in 1918 exceeded London's by 20,005.
Chicago's arrests in 1918 exceeded London's by 61,874.
New York's arrests in 1918 exceeded London's by 111,877.

"In 1919 there were 5,527 automobiles stolen in New York. In London 290 were stolen and in Liverpool only 10.

"In 1918 Chicago had 22 robberies for every one robbery in London and 14 for every one robbery in England and Wales.

"Los Angeles in 1916 had 64 more robberies than England, Scotland and Wales combined.

"Liverpool is one-third larger than Cleveland, yet Cleveland in 1919 reported 31 times as many robberies as Liverpool.

"Chicago is only one-third the size of London, yet had 12 times as many murders as London in one year. In 1917 Chicago had more murders than England, Scotland and Wales combined.

"Here is a three-years' record of the United States:-

1916	8,372	murders	115	executions.	
1917	7,803	"	85	66	
1918	7,667	"	85	"	
THE RESERVE TO SERVE					
Total 2	33.842	66	285	66	

"From this it would appear that only one murderer out of 80 is executed in America.

"What Mr. Fosdick does not bring out is the cost of crime in dollars and cents. Of course, it is hard to estimate. One thing plain, however, is that most of the expenditure in this country is directed to dealing with crime after the act rather than towards removing the cause, and that a mockery of justice not infrequently is made through court delays, technicalities and maudlin sympathy.

"Possibly, if some one figured out the percentages in the tax bill for police, for criminal courts, for jails and correctional institutions generally, together with the human waste, the business men who pay the score might give

more attention to the crime subject in its business aspect."

In this connection, the following is quoted from the Report of the Superintendent of Penitentiaries of 1920:—

"Records disclose the fact that the average cost to the Government of securing a conviction for commission of crime is about \$1,200. To this must be added the average cost of maintaining an inmate in the penitentiaries, which, together with discharge expenses and return railway fares, amounts to about \$1,600, making the total average cost to the State about \$2,800. To this

must be added the value of loss or damage resulting from the commission of the crime for which the inmate was sentenced, together with the value of support and assistance given the unfortunate wives, mothers, and children who, in many cases, have to be assisted while the wage-earner of the family is incarcerated; as well as the economic loss to the State of the value of his labour."

A great deal is being written regarding mental defectives in the penitentiaries, and many people seem to consider that all the mentally defective, sooner or later. find their way into prisons or asylums.

A careful study, however, of the medical records of the various nations taking part in the last great war, has been made by Japanese Government officials, and the somewhat alarming fact revealed that, of several millions of men of one nation who were called up, considerably over fifty per cent were found to be mental defectives, judged so by specialists who examined them. It would, therefore, appear that the logical time to treat and cure those whose mental faculties are found to be subnormal would be in their childhood, and every honest endeavour should be put forth to save them before reaching penitentiary age.

We have talented men in the penitentiary service to-day who are fully capable of knowing what is essential. It is, therefore, almost incredible, and altogether indefensible, that the reports and recommendations of these officers, after years of experience, thought and study, should be ignored, and men who have no knowledge of penitentiaries, their requirements or administration, be brought in to draft regulations and make recommendations.

AS THE INMATES SEE US

An educated inmate who was given a very long sentence, which is now drawing to a close, has written an article on his experiences in and impressions of a penitentiary. The following is the closing paragraph of his manuscript:—

"When I shall write 'Finis' to this I know not, some day in the future, how near, or how far off that day is I cannot say, but it will be a day of gladness and rejoicing for me, but when I do leave I can honestly say, without fear or favour, that this prison to-day is one hundred per cent better than what it was when I entered it nearly nine years ago. After doubt and confusion have been brought certainty and order; out of darkness and shadow have issued sunlight and substance; out of the mud and mire of the dark ages, where deceit, sneakism and hyprocrisy went hand in hand, is rising manliness, straightforwardness and honesty. Education is taking the place of ignorance. Cleanliness of mind and body instead of immorality and filth.

"Neither priest or minister is bringing about this change, but the heads of the penitentiaries, who by their sympathy, sincerity and understanding of those unfortunates who are passing through the flames, are trying to lead them on the right road by better conditions and through the key to all reformation—

Education."

Another now about to be discharged states:-

"When I came to prison I did not know anything. I was never given a chance, never was at school, could neither read nor write, I was not fitted for anything. I am going home with a fair education; am an expert blacksmith, and also a good shoemaker, having been taught both these trades in the penitentiary. I would not take fifteen thousand dollars for what has been done for me while serving my sentence."

12 GEORGE V, A. 1922

Penitentiary statistics show that over eighty per cent of the inmates are discharged in much better physical condition and weigh more than when received.

Schools are now a reality in all the institutions, and excellent results are being

attained by the qualified school teachers employed.

The following are copies of the School and Library Reports received from Manitoba Penitentiary which are in every way similar to those forwarded monthly from all penitentiaries:—

MANITOBA PENITENTIARY

	REPORT OF SCHOOL TEACHER FOR MONTH OF Number of pupils receiving class-room instruction	21 101
	Total number receiving instruction	122
	Population	214
	CLASS-BOOM INSTRUCTION Number of pupils who were illiterate at commencement in class Number of pupils who were using Primer Book	8

Some of the above are studying more than one subject.

GENERAL REMARKS

Those who do not yet understand English are supplied with a dictionary, English-French, English-Polish, etc., to enable them to study English from their own language. Every effort is being made to enlist their interest in something more than story reading, and as far as time will permit each inmate is questioned as to what books he may desire. Arrangements are being made accordingly in the distribution of literature.

GENERAL REMARKS

Picture books for distribution amongst those who are just learning to read (as an extra magazine) are being made from pictures cut out of magazines over a year old and in poor (Signed) J. S. WILSON, condition.

Librarian.

Respectfully submitted,

W. S. HUGHES, Superintendent.

APPENDIX A .- DOMINION PAROLE OFFICER'S REPORT

W. P. Archibald, Parole Officer, reports:-

I beg to submit the annual report on the Dominion parole system for the fiscal year ended March 31, 1921.

During the year I have been exceptionally busy visiting various institutions, interviewing prisoners and giving the best oversight and care I possibly could to prisoners released on parole. The Parole office reported on 558 cases to the Solicitor General.

History reveals that great crime waves have generally followed in the aftermath of great wars. After the Grecian war large numbers of bandits preyed upon the people and then the suppression of crime became a most important national problem. Similar conditions followed the Napoleonic wars and the crime question again occupied the attention of the nations involved. The depredations of the "Jesse James" and the "Younger Brothers" followed closely after the great Civil War in the United States. Many of these crimes are fresh in the memory of some of our older Canadian people. At the present time we have the aftermath of the great European war, resulting in a wave of crime unparalleled in the history of the nations involved.

However, the present day crime is not a parole problem. The parole statistics of the Dominion demonstrate that in the past twenty-two years operation of the system, 13,512 persons have been liberated on parole from the penitentiaries, provincial prisons and reformatories on their honour after having completed a substantial portion of their sentence in custody. Of this number only 303, or 2.2 per cent have been known to commit another criminal offence and received what we term "a subsequent conviction." 12,152 paroled prisoners have completed their probation outside of institutions and have received a full discharge. 588 persons are now reporting with the same prospect in view. 469 licenses have been revoked for non-compliance with conditions, making a total loss to the parole movement of 772, or 5.7 per cent.

During the past fiscal year 375 prisoners have been released on parole from the Dominion penitentiaries and 508 from the prisons and reformatories of the provinces, making a total of 883. The tabulated statement for the past fiscal year is as follows:—

TABULATED STATEMENT FOR YEAR ENDED MARCH 31, 1921

Prisoners Released on Parole	Revocations Per cent.	Forfeitures Per cent.	Total Loss Per cent.
Kingston 109 St. Vincent de Paul 112 Dorchester 76 Manitoba 30 British Columbia 15 *Alberta 4 Saskatchewan 29	3 or 2.7 4 or 3.57 1 or 1.3 2 or 6.66	2 or 1.8 2 or 1.78 1 or 1.3 1 or 3.33 1 or 6.6 1 or 25.00 1 or 3.4	5 or 4.5 6 or 5.35 2 or 2.6 3 or 10.00 1 or 6.6 1 or 25.00 2 or 6.8
Total, penitentiaries	11 or 2.9 5 or 0.98	9 or 2.4 3 or 0.59	20 or 5·3 8 or 1·57 28 or 3·17

^{*}The small number reported released from Alberta Penitentiary is due to the fact that the penitentiary was closed in the early part of the fiscal year and the prisoners were transferred to Manitoba and Saskat chewan Penitentiaries.

These statistics demonstrate that out of 883 persons released on parole, 16, or 1.81 per cent, have had their licenses revoked for non-compliance with conditions; 12 paroled prisoners, or 1.35 per cent, have had their licenses forfeited by a subsequent conviction. The total loss for the year is 28, or 3.17 per cent, for revocations and forfeitures, making the lowest record of losses for any year since the inception of the Act in 1899.

Last year compares favourably in losses with this year, as the total number for the fiscal year ended March 31, 1920, was 34, or 4.29 per cent. The statistics for this year have a splendid showing, but it is not just to pick out a lean or good year to make a comparative statement of results. I rather favour taking as a criterion the entire figures for the twenty-two years' operation of the parole system as issued by the Royal Canadian Mounted Police office, where the reports are received and compiled and where all revocations and forfeitures are recommended. All things considered, the entire showing is excellent.

The following statistics furnished by the Royal Canadian Mounted Police office

tally with the figures kept in the Parole office and are found correct:-

Released on parole from penitentiaries	13.512
Licenses revoked	10,012
Sentences not yet completed 588	13,512

An effort has been made in one or two communities to attach a portion of the responsibility of the "crime wave" to the men released on parole. Nothing is revealed to demonstrate this statement. In fact, wherever a paroled prisoner is in trouble and an offence proven against him in a court of competent jurisdiction his license automatically is forfeited and he returns to prison, not only to serve an added sentence but to complete the time he has earned on probation. I am sure the figures given, which present the facts of the situation, speak in words of eloquence and provide inspiration for those who believe in the possibility of amendment from the criminal strata of human life.

The ability and strength of character found even among those supposedly lost to society when given a chance on their honour, especially those who respond so magnificently on probation, demonstrate to an unbelieving person the utility of the parole system, although there are those who object to a man ever having even a chance to make good after a fall. The criminal ranks of to-day are not being recruited from our prisons but they are the by-product of our social life and social conditions. Every community is producing just the number of criminals they deserve to have. The lack of home training, parental respect, the control of the home institution, the loose morale of our communities in not applying correctional methods when the delinquent is still plastic in character, the lack of religious education, the free access of boye and girls of a tender age to movie shows where tragedies, thefts and even murder are invariably depicted in glowing scenes, are all educating our youth in the wrong way and giving them false conceptions of real life. If present conditions continue, we will in Canada produce a crop of criminals for the coming generations to deal with that will take centuries to extinguish the flame of vicious living.

I feel very grateful that in past years I have had the co-operation of the various bodies engaged in prison reform work, especially those who are assisting paroled men into situations by providing the bridge to help cross the gulf made by the anti-social act whereby he is received and welcomed and an honest opportunity afforded him to help bury the past and live in a brighter hope for the future. The co-operation of so many societies and individuals greatly assists in reconstructive work, especially in the final rehabilitation of our anti-social subjects.

APPENDIX B-WARDENS' REPORTS

KINGSTON

J. C. Ponsford, Warden, reports:-

I have the honour to submit the annual report of the Kingston penitentiary for the fiscal year ended March 31, 1921, with crime statistics showing the movements of inmates during the year, from which it will be seen that the inmate population has increased 117, made up as follows:—

On March 31, 1920—593 males, 32 females. On March 31, 1921—707 males, 25 females.

The male population increased 124 and the female decreased seven.

You will note by the statistics that there were three escapes during the year, two from the penitentiary and one from Rockwood asylum, to which institution inmate Cole had been transferred. The three inmates who escaped were: Cole, G-456; Hilton. H-71; Griggs, G-692. Hilton and Cole were recaptured in Detroit, Michigan, and Griggs will be returned at the expiration of his sentence at Elmira, N.Y., where he is at present doing a five-year term for "auto theft," for which he was arrested about a month after his escape.

During the year there were:-

110 paroles

90 discharges by expiration of sentence

20 deportations

1 pardon

2 deaths (natural causes)

2 returned to Provincial authorities.

There are at the present time 17 inmates confined in the different asylums of the province, 10 of whom are serving life sentences.

Of the 732 inmates confined, the youngest is 17 years and the oldest 71, and 608

are under 40 years of age.

I am very pleased to be able to report that the general health of the inmates has been good, and the sanitary conditions are excllent. Improvement in the sanitation of the shops is very marked, as is also the cleanliness, owing to the fact that they

have been all renovated and painted.

The hospital has been very much improved during the year by installing the latest and most modern equipment, also the removal of the kitchen from the hospital, and the installation of an operating room fully equipped, a sterilizing room with the necessary sterilizers, linoleum laid on the floors, fly-screens on the windows, and the whole interior cleaned and repainted. All food for the hospital is now prepared by the prison steward from a dietary sheet provided by the surgeon. This is a great improvement on the former system of having the kitchen in the hospital. All of the personnel of the hospital staff was changed during the early part of the fiscal year; this made a great improvement. The supply of drinking water for the inmates is of the best, the same being obtained from a deep well in the prison yard.

Progress has been made in the construction of the new boiler-house, laundry and coal vault. This work has not made as rapid progress as I would have desired owing to the fact that the old gas-house and other buildings had to be taken down, and at

the same time provision made to protect the sewage pumping plant. This work is well under way, and it is hoped to have it completed during 1922.

The new North Wing, commenced in 1919, has been completed. This has added 168 up-to-date standard cells to prison accommodation. The question of housing has therefore been relieved for the incoming year, but if the population continues to increase at the rate it has for the past two years, new cell accommodation will be required.

About 150 feet of new stone wharf was built at the south end during the year, and the old stone bastion or tower-house at the northwest corner of the prison enclosure was torn down and a new one built of the umbrella type. The gothic-shaped coping, for about 80 feet to the right and left of the new tower-house, was taken off and a flat cement coping put on with iron pipe railing. This has made a wonderful improvement, as the officer doing duty at that station is given a full range of vision over the entire north end of the yard. The last remaining stone bastion or tower at the northeast corner will be removed during the present year and one identical in pattern to that at the northwest corner will be built in its place. When that is done, all four towers on the wall will be similar.

The farm instructor resigned at the end of the last fiscal year, and Mr. Purdy, the storekeeper, being a Guelph Agricultural graduate, was asked to take charge of the farm temporarily. This he did and was later transferred to the position of industrial guard farm instructor. Under his direction and management, the farm gave the best results attained in several years past. I regret very much that Mr. Purdy, like his predecessor, resigned at the end of the fiscal year to accept a more lucrative position.

A large amount of work has been done for the Post Office Department by our Bag Department. During the year just closed, 194,904 mail bags were repaired and 143,172 new ones made, which produced a revenue of \$54,021.43. Besides the work mentioned above, we handled 232,417 bags, which were inspected, classified and reshipped. Included in the above new bags are 3,515 made for the Chief Electoral Officer, for whom there was also made in the Tin Shop, 1,000 ballot boxes.

The Tailor Department during the year, made for the Department of Indian Affairs 155 triennial suits; Department of Soldiers' Civil Re-establishment, 40 suits; for officers' custom work, 27 suits, 24 coats, 9 pairs of trousers and 2 vests; and for our own officers, 197 suits, 62 overcoats, 43 caps, as well as all the wool and duck clothing and caps worn by the inmates.

The blacksmith shop has had a very busy year in completing the equipment for the new North Wing, and making all of the necessary equipment required for the other penitentiaries in barriers, cell gates and locking bar system.

Sixty odd men were employed during the entire year in the stone shed, and most of these inmates are turned out expert stonecutters, capable of earning from \$10 to \$12 per day.

The carpenter shop has also been busily engaged on construction work for the penitentiary. Only six carpenters were in this department when I took charge. This number has now been largely augmented, and many inmates are being taught this useful and profitable occupation.

Tin and paint shops have also been employed steadily on institutional work. The staff of the Printing Department has been doubled and a large addition made to the machinery, which has been continually employed on work for the penitentiaries generally.

A wonderful improvement in the Kitchen Department has been made, and the inmates are now given a very varied diet, which is well cooked and served. The bread throughout the year has been excellent.

The Engineers' Department has given entire satisfaction, and preparations are being made for the discontinuance of the old steam power plant and substitution therefor of the Hydro-Electric. All this work is being done by officers of the penitentiary: no outside labour has been used.

I was transferred to the wardenship of this institution on April 27, 1920, coming from Edmonton Penitentiary, of which institution I had been in charge for six years. I found conditions on taking over to be most unsatisfactory. The discipline and sanitation of every department in the institution were at a very low ebb. This statement applies even to the Warden's office, which looked as though it had not been renovated in years, and was in a dirty, untidy condition.

The Accountant's office, and the Stores Department were in very good shape. In all of the others there appeared to be a great laxity of co-ordination and they were very indifferently managed.

Trafficking by officers with inmates and their friends was carried on to an

alarming extent.

In November an investigation was held by the superintendent within the penitentiary, assisted by Detective Inspector Walter Duncan, the result of which was the dismissal of seven, the retirement of seven and the suspension of two officers. This cleared the air; had a splendid effect and materially assisted the warden in his efforts in restoring the Kingston penitentiary to the high standard of efficiency it was at one time noted for.

The matron and assistant matron of the Female Prison were also removed on the report of the superintendent; they being permitted to resign. The improvements in the Female Department of the penitentiary have been very marked, as under the old management affairs in that department had not been at all satisfactorily managed.

In conclusion I would make some recommendations, which I trust may appeal to you as reasonable and necessary:—

First.—It is recommended that this Penitentiary be removed from its present position to a suitable location in an open district with necessary railway, water and building facilities. In such a locality a reserve at least one mile square should be purchased. This penitentiary is very badly situated; it is on a narrow strip of land extending from the shore of lake Ontario northward for a distance of one and a quarter miles, through which five public highways pass, they being the Cataraqui road, Bath road, Johnston, Union and King streets, while Palace street, running, north and south, passes through the penitentiary reserve about half its length, and then forms the eastern boundary the remainder of the way. This is one of the favourite automobile routes, and over it must pass all the inmates being employed on the farms. In the small space situate between King street and the water front, is located the prison. The enclosure contains 13 acres, included in which are the executive buildings, workshops, hospital and female ward, and in which on the evening of March 31, 1921, 732 inmates were confined. It is impossible to avoid congested conditions, both with regard to population and workshops.

King street runs immediately in front of our main gate. On this street there is a great deal of traffic, as well as a direct line to Portsmouth of the Kingston and Portsmouth Railway Company, which has a ten minutes' service. Besides the street cars, hundreds of automobiles and other vehicles, to say nothing of a continual stream of pedestrians pass. This is most undesirable, as all gangs working outside, such as on the farms, quarry, etc., must pass up and down the road above referred to. It is not only undesirable from a disciplinary standpoint, but it is most dangerous

There is another aspect which must be seriously considered; that is the great increase in convict population, which at the present rate will reach. I feel sure, 900

souls or more before the end of the fiscal year 1922. The moving of this penitentiary, or the construction of an additional one, should therefore be undertaken and proceeded with at a very early date.

Second.—The Female Prison should be removed from out the walls, and I would recommend same be placed under an entirely separate management from that of the Male Penitentiary, and made to accommodate from 150 to 250 inmates.

Third.—I would recommend that the warden be given authority to dismiss, or dispense with the services of any officer on his staff who, in his opinion, is not rendering fair and reasonable service. I am sure you must agree with me that this is a proper suggestion, in view of the fact that the warden is held responsible for the conduct and management of the institution. It would also prevent outside interference with the control and disciplining of the officers on the staff, and would eliminate such obectionable proceedings as took place here during the present fiscal year, viz:—investigations by Colonel O. M. Biggar and Mr. W. F. Nickle, both of whom after very long and careful inquiries and the taking of evidence under oath, were forced to confirm the actions of the superintendent and warden. The demoralizing effect of an outsider being brought into an institution such as a penitentiary to investigate the conduct of the warden for having suspended or dismissed one of his officers, can readily be understood, and is very far reaching.

When it became known to officers and inmates that investigations were to be held by outsiders, insubordination by the inmates, who no doubt were urged by a number of officers, became apparent, and I have no hesitation in saying that the strike which took place in this institution on October 15, was staged in an endeavour to influence Colonel Biggar in his investigation, as it took place just a day or two before he opened same, as the date of his coming was announced in the newspapers and well known to both officers and inmates. When an investigation must be held I am strongly of the opinion that the Superintendent of Penitentiaries is the only and proper person to hold same.

Fourth.—I would recommend that at least once a year the wardens of all the penitentiaries meet the superintendent and inspectors to discuss matters affecting the administration of the institutions. This meeting should be held during the winter when the wardens could best be spared from their various posts. Only great benefit could result from such meetings.

Fifth.—I am of the opinion that inmate populations should be divided so that not more than 600 souls should be confined in one institution. At this institution we have no shop accommodation for over that number, and no room within the walls to properly add to said accommodation.

Sixth.—We have in this penitentiary incorrigibles, as well as female and other inmates transferred from the various penitentiaries. Upon their discharge all expenses in connection with same, including railway fare, are charged against this institution, and thereby considerably increases the per capita cost of same. May I respectfully suggest that a portion of this expense should be borne by the institution from whence they came.

Herewith I send you necessary statements for publication of report.

I wish to express my gratitude to the superintendent and inspectors for their assistance and courtesies rendered during the year, the same was unstinted and cheerfully given. This is particularly applicable to the superintendent, who has been untiring in his efforts to assist in straightening up all affairs here.

The majority of my staff have been faithful, and have given me loyal and hearty support, for which I am truly grateful.

ST. VINCENT DE PAUL

J. D. Fitzgibbon, Acting-Warden, reports:-

I have the honour to transmit herewith the annual report for the fiscal year ended March 31, 1921.

On the 31st of December, 1920, I was directed by the superintendent to take charge of this penitentiary pending the appointment of a warden vice Mr. G. S. Malepart, superannuated.

In transmitting this report I desire to tender my sincere thanks to the Superintendent of Penitentiaries for the prompt manner in which he dealt with all matters it was my duty, as acting-warden, to lay before him.

DORCHESTER

W. Meighen, Warden, reports:-

I beg to submit the following annual report for the fiscal year ended March 31, 1921, together with the following reports:—

- (1) Statistical
- (2) Farm Report
- (3) Surgeon's Report
- (4) Librarian's Report
 - (5) School Teacher's Report
 - (6) Matron's Report

At the closing of the prison, March 31, 1920, there were 306 inmates. We received during the year 174 and discharged, by expiration of sentence, 59; by parole, 76; by deportation, 11; by transfer, 1; by order of the court quashing conviction, 1; and by death, 2; leaving us with 330 at the closing of the prison, March 31, 1921, and with an average attendance for the year of 327.

As regards the work performed during the year, I prefer to speak only of what has been done since I assumed control on August 16 last. Evidently the whole institution had been deteriorating in many ways for some years back. The construction of a new cell wing had been dragging for some three or four years and was practically at a standstill. The roofs of all the shops, the piggery and the implement shed, were leaking. Owing to non-delivery of cement we were unable to accomplish much at the new wing, but we did everything possible. We reshingled the implement shed; the piggery, and by a covering of elastigum made the shop roofs water-tight.

The old hospital which was and still is out of date, has been cleaned up and painted and looks as well as it is possible to make it, but a new modern hospital will have to be built and same cannot be done too soon. I endeavoured during the winter to get everything in shape for all building operations to be done this summer. Our farm gang cut some 1,700 spruce logs on our own farm from which we had sawn over 50,000 feet of lumber, and some 250 fence posts; these have been turned and shaped in our carpenter shop during the winter season.

During the months of November and December our mail bag department provided work for upwards of one hundred men, and this department showed a substantial profit for the year.

Our present school accommodation is very inadequate and I hope to have better accommodation provided in the near future.

We will also have to enlarge our present chapel or build another as our present one is filled to over-flowing every Sunday, and if our population continues to increase,

we will be unable to have all attend church services at one time. The chaplains report

the discipline as good during divine service.

The farm operations on the whole were very good, but I felt the quality of cattle being raised was not of the standard that it is profitable to keep; I have therefore purchased a number of well-bred cows with a view of raising an improved quality of stock such as will be both profitable and a credit to the institution.

I am pleased to say that the majority of the staff are good reliable officers—several of them have, I believe, conscientiously performed their duties for upwards of twenty

years.

The surgeon reports the ventilation and sanitary conditions as satisfactory.

I am pleased to report that the discipline of the institution on the whole has been well maintained, and I might also state that the worst class we have to deal with are mostly young boys who have served terms in so-called industrial homes and reformatories for boys.

In conclusion I wish to thank the superintendent, inspectors, as well as the structural engineer for the support and encouragement they have given me since I

took charge of the institution.

MANITOBA

W. R. Grahame, Warden, reports:-

The population on March 31, 1920, was 156, including three at asylum, 110 were received during the year and 73 discharged, leaving on March 31, 1921, a population of 193. The conduct and industry of the inmates has been good.

The mail bag repair shop has been a great source of revenue, showing a total of

\$15,634.68 for the year.

School has been held each week day and excellent progress has been made, and with the advent of a school teacher and librarian who will now devote his whole time to this work, much more will be accomplished. The large list of magazines and periodicals is greatly appreciated.

The inmates were employed during the year in the various workshops.

A new boiler-house was built at the south end of the workshops and two boilers, received from Edmonton penitentiary, were installed. A coal vault to hold six hundred tons of coal was built adjoining the boiler-house. The teams unload on top of the coal vault, which saves a lot of work. Also, a duct was built from the workshops to the prison for the steam pipes, this will form the main duct of the east wing when completed. A new ice-house is under way but was not completed before winter came on. It is now near to completion.

I am glad to say that we are allowed to keep cattle again; this I consider a

necessary adjunct to farming operations.

The chaplains report the conduct of the inmates good while attending divine worship.

The moving-picture entertainment in the holiday season was much enjoyed and appreciated by the inmates.

The change in our dietary which our steward has under way is appreciated by the inmates.

The health of the inmates has been good. Two deaths occurred during the year, both of which were duly reported.

No escapes have occurred during the year, and discipline has been well maintained. Before closing, I take the opportunity of thanking the superintendent and his staff for the courteous treatment and assistance received at all times.

BRITISH COLUMBIA

John C. Brown, Warden, reports:-

There were 114 prisoners in custody when the year began, and 146 when it closed. The year saw the end of our eight-year immunity from escapes. In June, two short-term prisoners, at work on the building of the Glen Brook sewer, slipped away, and one of them has so far made good his escape, the other being recovered. Lack of vigilance made the escape possible; carelessness allowed one to get off when the other was retaken. In July, two life prisoners, who were in hospital, succeeded in unlocking their cell doors and, cutting one window bar, let themselves down by ropes made from twisted strips of their bed linen. One of them was retaken after seven months; the other is still at large. The officers responsible were retired from the service or fined.

Four members of the staff who had each been in the service over thirty years retired during the year, under the provisions of the Acts for retirement and superannuation allowances.

Only one accident occurred during the year. A Japanese inmate, slipping on a wet plank, broke his wrist. He has completely recovered. One prisoner, who had been fatally wounded before his admission—he was carried into prison on a stretcher

-died a few days after being received.

Work, other than the routine work of the shops and occasional repairs, has been chiefly the continuation of work in hand when the year began. Plastering cells in the East Wing was completed-130 cells, 3,500 square yards of plaster. Improvement of water system in East Wing completed-75 cells. Kitchen closets were moved and a new one put in-not quite completed at close of year. Five hundred feet of Glen Brook sewer completed, one hundred feet of trench excavated, and about one hundred and fifty feet of temporary canal constructed. The work of removing the hill which obstructed our view of the entrance road was completed, about 5,000 cubic yards of earth being thrown into the ravine, where a little grading of the dumped material will change what was an unsightly gulch into a flat of some four and onehalf acres, level with the street. Work on the central hall has progressed so far that its completion may be expected early in the current year. Two of the concrete girders which support the roof have a span of 63 feet, and the other two, of 60 feet. The fact that they were put in with convict labour without a hitch, and are entirely satisfactory, shows the care and thoroughness with which the chief trade instructor does his work. Among minor works were the getting in and "manufacturing" of sixty cords of wood; the renewal of some thousand feet of boundary fence, necessitating the making and replacing of one hundred and twenty 16-foot posts; and the conversion of one of the temporary cell houses into a garage. The change in the deputy wardenship was taken advantage of to renovate that officer's quarters.

The conduct of the prisoners, was, on the whole, good. About half a dozen have spent a good deal of time in isolation and perhaps another dozen have been up before me—some of them more than once—for minor offences; but a large majority give no

trouble.

A concert given by an orchestra under the leadership of the prison organist, and a "movie" show by two gentlemen from the Vancouver Y.M.O.A., were greatly enjoyed and highly appreciated by the inmates.

The Protestant chaplain would like to see an advance in the cautious and tentative policy of the past few years in the line of providing occasional entertainment for the prisoners.

The Roman Catholic chaplain suggests a second service during the week.

Both are well pleased with the general conduct of the prisoners under their charge.

The Medical Department was under a temporary surgeon for over two months. The present surgeon was not appointed until the last months of the fiscal year; consequently, the medical report is meagre. The per capita cost of drugs for the year was 83 cents.

The new surgeon is proving very satisfactory so far. He arrives about the same hour every morning and finds it necessary to make his visits from twice to four times as long as the average visits of our late surgeon. His monthly reports are sensible documents, and he shows carefulness in the matter of avoiding any interference with discipline, which can be avoided without neglect of the patient.

The deficit in the farm returns is hardly to be wondered at; with our small extent of poor side hill soil, it would be a difficult matter to make a farm pay under

the best conditions.

The present farmer is a practical man, who evidently knows his work and intends

to do it as well as possible.

The big Kelly truck is useful in hauling from town and wharf, and will be more efficient when certain repairs or betterments have been completed. The smaller Reo truck is doing more work than one team could do and doing it well.

The school has been a distinct success, so far as one can judge at present. The deputy warden is quite satisfied that it decidedly promotes good conduct, particularly among the younger inmates. The schoolmaster also takes a cultured man's interest in the library and is working every day toward getting it into good order, and making it as useful as possible.

Statistical and other reports are enclosed.

ALBERTA

Gilbert Smith, Acting Warden, reports:-

As the last one in charge of the Alberta Penitentiary, I have to submit a report for the fiscal year 1920-21. I assumed charge on July 30, 1920, Warden Meighen leaving that day for Dorchester, where he had been transferred as warden. I continued in charge until the closing of the institution by the transfer of the remaining inmates to Stony Mountain on August 25, in that connection acting as transfer officer.

There were 34 inmates at Edmonton on the 1st of April, 1920, and seven were received from jails in the months of April and May. Of these 41 men, four were transferred to Manitoba in April, one escaped in May, the sentences of six expired, two were deported, five paroled and the remaining 23, as above stated, were transferred to Stony Mountain on the 25th of August. This transfer was conducted without expense except the railway fares of the inmates, as officers who were being transferred to Stony Mountain and Kingston penitentiaries were utilized on the journey, and the services of a guard who was bringing an insane inmate from Stony Mountain to Ponoko assisted us on the way east. The transfer was uneventful and was carried out with all possible consideration for the comfort of the men, consistent with their safe custody while on the train.

Previous to the removal of the inmates all that was possible of the supplies, fittings and equipment of the Institution was shipped to other penitentiaries. The heating boilers were sent to Manitoba Penitentiary and saved the purchase of new boilers for that institution, and the boundary fence which contained seventy thousand feet of lumber was shipped to Saskatchewan Penitentiary. A few barriers and smaller fittings in use up to the end were removed by hired labour after the inmates

had been transferred.

The coal mine on the reserve was worked till the middle of August, and the mine instructor left in charge to see that the pump was kept working and the mine pro-

tected from damage by flooding.

The disposal of the reserve, consisting of about 130 acres, is in the hands of the superintendent for settlement, but nothing is being lost by waiting as real estate in Edmonton at present is at low ebb. This condition may improve in the course of a year or two.

SASKATCHEWAN

W. J. Macleod, Warden, reports:-

Our population on March 31, 1920, was 186. During the past year we received 80, and discharged 38 by expiration of sentence, 29 by parole, two females by transfer to Kingston, two males by death and one by order of the court, leaving us with a population of 194 at the end of the year. This includes five in the Provincial Hospital for the Insane.

The following very necessary work was done during the year: -- .

Concrete work was started on new East Cell Block and Hospital extension on May 3, and building was roofed in by September 30. Approximate size of building is 236 feet by 60 feet. Work completed inside this building during the winter is as follows:—All south side four galleries of cells and corridor ceiling poured with concrete and work started on first gallery of cells on north side. Three galleries on south side have cell barriers on each cell, locking apparatus in place, and railings along galleries completed with work progressing on the fourth gallery. In hospital, concrete work completed on all three floors. The first floor is all plastered and if barriers were made and in place it could be used at any time. Finishing work is progressing on the other two floors.

Two wells were sunk during the early summer months and they have given us

the water required for all purposes.

Owing to shortage of water during first part of summer, work did not start in brickyard until July, and we made one hundred and sixty-eight thousand (163,000) bricks, all of good quality.

Excavation for North Wing was started and over two-thirds done when stopped

by frost. General repairs were taken care of by the various departments.

We had 457 acres under cultivation on our farm, but owing to the very dry

season we did not get a half crop.

During the winter months we cut and hauled 251 cords of wood, and 1,400 fence posts, and drew 1,032 cubic yards of gravel, and also cut and stored ice enough for our needs during the summer months. We graded and made a road 66 feet wide across our two new river lots and a start was made on fencing in this new property.

We held school during each working day of the year, and the progress made by

those attending was excellent.

The spiritual welfare of the inmates was well looked after by our chaplains. Both chaplains report that they were well satisfied with the appreciation and

attentiveness of the inmates during divine service.

The library, in which we have hundreds of good books, was well patronized. We also take a number of the leading magazines and our inmates enjoy reading them very much. A number of our inmates have been given permission to take up any special branch of study and allowed to get books to assist them, and are in this way fitting themselves to lead a better and more useful life upon their release.

The surgeon reports two deaths during the year, one from apoplexy and the other from spinal meningitis; also one serious case of appendicitis, which necessitated an

operation from which the patient made a splendid recovery; also a number of other serious cases of illness during the year, and at the present time there are three cases of insanity, one case of very advanced tuberculosis and one of senile decay. Steps have been taken to remove the insane inmates to hospitals for the insane. The surgeon also reports ventilation and sanitary conditions as excellent.

As we now have a number of trucks, tractors and other gasolene machines, I think we should open up a gasolene engine repair department with a good gasolene engine mechanic in charge. Gasolene engine repairing is a very live industry throughout the country and a number of our inmates are anxious to be given instructions in this kind of work, as a good mechanic in this line of work can secure employment very easily at any season of the year.

I am glad to report that the conduct of the inmates on the whole was very good. Inspector Smith paid us a visit during the year and we were glad to have him with us so as to be able to discuss prison matters. Visits of this kind are very helpful. I am of the opinion that our wardens should be sent each year to visit other institutions, so that they will not get into a rut in the management of the penitentiaries, but be broadened by association with other prison men and seeing other institutions.
