OF THE

SUPERINTENDENT OF PENITENTIARIES

FOR THE

FISCAL YEAR ENDED MARCH 31, 1922

To the Hon. Sir Lomer Gours, K.C.M.G., K.C., Minister of Justice.

Honourable Sir,—I have the honour to submit reports and statistics regarding the administration of penitentiaries for the fiscal year ended March 31, 1922.

The number of inmates in custody at the close of the fiscal year was 2,640, as compared with 2,150 at the beginning of the year. The average daily population was 2,417.

The following table shows the movement of population at the several penitentiaries:-

	Kingston	St. Vincent de Paul	Dorchester	Manitoba	British	Saskat-	Total

COMPARATIVE SUMMARY

	1920	1921	1922
Gross expenditure. Net expenditure. Actual cost. Cost per capita. Cost per capita per diem. Average daily population.	1,029,738 00 1,067,959 00 582 95	\$ cts. 1,620,690 00 1,457,981 00 1,503,372 00 730 50 2 00	\$ cts. 1,655,188 00 1,504,819 00 1,364,996 00 564 75 1 55

As will be seen by the above "Comparative Summary," the cost per capita per diem, which for the year 1920-21 amounted to \$2, has for the year 1921-22 been reduced to \$1.55. This is largely on account of the reduction in the cost of nearly all commodities used.

Cost per capita per diem covers every expenditure made in connection with the penitentiaries, including purchase of lands, erection and repairing of buildings, heating, lighting and water system, as well as the care and maintenance of the inmates, and salaries and uniforms of the officers.

The actual cost of feeding the inmates per diem for the last year was 17½ cents. Owing to the increase of the prison population in the eastern penitentiaries, considerable difficulty has been experienced and large additional expense entailed in providing them with proper accommodation, care and treatment.

Emergency expenditure to the amount of \$37,000 was found necessary to cover cost of temporary cells, repairing damage by storms, and replacing boundary wall at St. Vincent de Paul penitentiary, a portion of which, having been damaged by frost, fell down.

The building programme at all of the penitentiaries has been prosecuted vigorously during the year.

At British Columbia the new cell dome has been completed and a portion of the

extension of the boundary wall built.

At Saskatchewan the new east wing and hospital have been practically completed; the administration wing is now rapidly nearing completion; a very beautiful cell dome 75 feet square is under construction and the isolated cell building has been begun.

At Manitoba a new cell block to house 208 inmates, equipped with up-to-date cells and all sanitary appliances, has been started, the walls being already up and a new transformer station and storehouse with shoe shop overhead has been erected.

At Kingston the new boiler-house, electric light department, pipe shop, etc., with a 120-foot reinforced concrete chimney is under way, as is the remodelling of the laundry, power-house and changing room. The old boiler-house, which for many years has been a menace to the safety of the prison and where supervision was most difficult, will be remodelled and turned into workshops.

At St. Vincent de Paul the new northeast wing is nearing completion and work on the south wing reconstruction commenced. A building for store accommodation has been begun and a transformer house erected. A filtration plant to clarify, purify and chlorinate water pumped from the river for use of the villagers, is being erected.

At Dorchester the beautiful new cell block capable of accommodating 260 inmates has been finished; a new water works dam and several other necessary and important works completed. New cement sidewalks have been laid and a new stone wall surrounding the warden's residence erected.

At the St. Vincent de Paul and Kingston penitentiaries the hydro-electric is being installed to furnish light and power. It is estimated an annual saving of \$40,000 will result by the introduction of the hydro in these two institutions.

Although a tremendous building programme has been carried on for the past year and much larger expenditures made in connection with construction than heretofore, the per capita cost of the penitentiaries is less than it has been for several years.

Conditions at all of the penitentiaries have been greatly improved:-

The introduction of carefully selected, qualified, certificated school teachers, has been productive of wonderful good;

The enjoyment of privileges afforded by the increased and improved libraries has done much to advance the morale of the inmates;

The abandonment of the checked and striped clothing and the substitution of plain blue for winter and plain brown for summer wear;

The granting of the tobacco ration;

The added writing and visiting privileges;

The greater variety of food and change in the diet;

The improved cooking and serving of meals;

The introduction of concerts and moving-picture shows;

The holding of religious missions;

The non-clipping of hair during winter months;

The improvement in the discharge outfits;

The abandonment of the idea of handling all men by "rule of thumb", and substitution therefor of the personal study of each inmate and treatment of him, as his temperament and disposition would warrant;

The improvement in prison hospitals;

The additional work secured for the inmates;

The introduction of dental surgeries properly equipped, and treatment of defective teeth;

The endeavours now put forth by penitentiary officers to secure employment for inmates on discharge;

all have combined to not only wonderfully improve the condition of the inmates, but have had the effect of convincing them that those in charge of penitentiaries have their interests at heart.

The retirement of Mr J. C. Brown, warden of British Columbia penitentiary, on September 30, 1921, is greatly regretted by all in the service who knew him. Though 77 years of age, he remained in active control of the institution until the date he severed his connection with same. He possessed exceptional attainments, was of high moral character, an excellent judge of men and stood very high in the estimation of the people of the province he so faithfully and honourably served before coming into the penitentiary service fourteen years ago.

The vacancy caused by Warden Brown's retirement was filled by the promotion of the deputy warden, Mr. W. A. Patchell, who has been thirty-two years in the penitentiary service. The position of deputy warden, vacated by Mr. Patchell, was filled by the promotion of the chief keeper, Mr. George W. Trollope, and the chief keeper's position, vacated by Mr. Trollope, was filled by the promotion of Mr. Patrick Devine, the next senior officer on the discipline staff.

On May 23, 1921, Col. Rene de la Bruere Girouard, a veteran of the Great War, an engineer by profession with many years of experience with the Canadian Pacific Railway and Riordan companies, and a member of one of Quebec's most illustrious families, was appointed by the Civil Service Commission to the vacant wardenship at St. Vincent de Paul penitentiary.

During the year the inspectors have been most assiduous and attentive in the performance of their duties and have continually furnished reports as to the conditions of the various penitentiaries. The auditor's reports have been most gratifying and a very decided improvement in the accounting of the various penitentiaries has resulted.

A great many inmates sentenced to penitentiary in the past few years have been guilty of crimes of violence. In one penitentiary a short time ago, seven less than half of the inmates were incarcerated for one of the following three offences: murder, manslaughter or robbery with violence.

Many of the inmates coming to the institutions are found to be in a most unsatisfactory condition. Numbers of them suffer from various diseases and vermia. Although they are presumed to be innocent until proven guilty, they are in many respects worse treated while awaiting trial than after their removal to a penitentiary. One educated inmate lately wrote on coming to a penitentiary: "In the meantime I am glad of the change of environment. After the sordid and vitiating atmosphere of those jails—this huge prison is a soothing and comforting haven of refuge—and I am speaking from a hard and cruel experience and good standards of comparison. Verb. sap." In this connection a former inspector of Canadian penitentiaries once wrote: "Society has found, by terrible experience, that her jail or prison system has too often turned out to be the largest factor, and the most successful machine, in the fabrication of the evil it was seeking to destroy."

I am glad to report a very considerable reduction in the number of reports recorded against inmates for misconduct. At one institution only 131 reports were entered against the inmates during the entire year. This is about one report for every three days, and I submit it is a wonderful record.

The above resulted through an honest endeavour to study, understand and intelligently manage the inmates.

The more punishment inflicted on inmates in a prison the stronger the probability that the place is badly managed.

No real progress can ever be made in the treatment of inmates until the differences between one inmate and another are taken into account.

Nothing much can be brought out of a man but what is in him. However, we are learning that there usually is a great deal in the inmate which has not been brought out. Many of them possess amazing peculiarities. We find it of interest and importance to compare the peculiarities of the inmates, but consider it of much greater importance and a subject for deeper study to ascertain how they acquired these peculiarities.

Our aim is to make confinement in the penitentiaries produce the maximum of good, with the minimum of evil; a system that will be both deterrent and reformatory, both merciful and strict.

Usually men are not wicked because they prefer bad to good, but because they have at some time come under the influence of evil associates and companions which has appealed to something in them.

We find offenders do evil simply because they have never known good. This is particularly so of many young men who have been sent to penitentiary during the past few years, most of whom have long criminal records before being received and before reaching the age of sixteen years. The great majority of them confess to lack of proper home influences or training, nights spent at dance halls, jazz parties, pool rooms, joy-riding parties in stolen motor-cars, and to have robbed in order that they might have sufficient money to enable them to participate in all of the above, which they invariably term "pleasure". On reception they are found to be insolent, defiant, suspicious and to have no respect for law or order, rule or regulation.

Wardens have considerable difficulty with this class of inmate for a time, but I am pleased to say wonderful success has resulted in the handling, training and reformation of many of them. They now leave the institution with a fair education, a good trade and a vastly different viewpoint of their responsibilities. It is gratifying to know that few of them are returning to penitentiary.

We have learned that the best method by which an inmate may be reformed is by the sympathetic guidance, encouragement and assistance of good, God-fearing officers, who by their daily example and guidance will continually influence an inmate for good. "The object lesson is the best teacher," and there is no place where this applies with greater force than in a penitentiary.

Most of the wardens and deputy wardens now in charge of Canadian penitentiaries are true, clean men, judges of human nature, trained in the service, who take an intense and kindly interest in their wards and whose every action in dealing with them is just and merciful.

A wonderful change has taken place in most of the penitentiaries, as is exemplified by the feeling of confidence with which the inmates now regard their wardens.

The work of most of the chaplains during the past year has been all that could be desired and the character of the active, zealous chaplain is exemplified to a very wonderful degree in the conduct and bearing of his followers. One faithful and devout chaplain said to me: "I find the greatest doctrine to preach to fallen men is that the lost are recoverable, that the most fallen may rise and that there is no height of purity, power or felicity in this world to which the most guilty of them may not through penitence attain."

The request of former years for more work for the inmates is again renewed. From 1918 to 1921 the cash revenue of the penitentiaries increased from \$63,000 to \$162,000, and the latter amount may easily be increased tenfold if we be given sufficient Government work to employ those inmates for whom no other suitable occupation can at present be found.

Farming operations under an extensive scale are being carried on at nearly all of the penitentiaries and many of the inmates are taught agriculture in its various branches. These farms produce large quantities of grain, hay, roots, vegetables and pork, while in Dorchester and Manitoba penitentiaries cattle-raising has been introduced with excellent results. But agricultural pursuits can only be prosecuted for a period of from six to seven months in Canada and other work should be provided sufficient to keep every inmate actively employed.

IT IS USELESS TO TRY TO REFORM AN IDLE MAN

With sufficient government work to keep the inmates continually employed the burden of supporting the penitentiaries would be removed and wages could be paid to inmates as well, thus enabling those with dependents to send money thus earned to needy ones at home while the head or wage-earner of the family is incareerated.

The following is a list of provisions grown on Prince Albert, Sask., penitentiary

farm last year :-

Oats	14,728 bushels	Potatoes	7,530 bushels
Barley	2,203 "	Turnips	950 "
Wheat	589 "	Carrots, red	800 "
Peas and oats		Carrots, white	70 "
Hay, wild		Beets	650 "
Hay, cultivated		Parsnips	200 "
Green feed	8 "	Mangles	70 "
Cabbages	4,000 heads	Onions	60 "

Green vegetables such as radish, lettuce and onions, were furnished the steward during the entire summer and the prison steward was supplied with all the pork used throughout the year.

The penitentiary hospitals are supplied with all up-to-date necessary appliances for operating, sterilizing, etc., and at each penitentiary a dental surgery has been outfitted where the dental needs of the inmates are attended to. A very considerable expenditure is now made each year in this connection and both physical and mental conditions of inmates improved thereby.

Many of the inmates when received suffer from venereal disease. A determined effort has been put forth to effectually cure these cases. Blood examination and Wasserman tests are now made and no efforts are spared to make the cure permanent.

The appointment of capable, certificated, active school teachers has been a boon to the institutions and a great blessing to the inmates. Wonderful advancement has been made by the inmates in their studies and an earnest effort is put forth by the great majority of them to improve themselves. Many who could neither read nor write on reception, leave the institutions with a fair education as well as a useful trade. Inmates who display special talent are aided and assisted in every possible way. Some who possess special talents, but were not aware of it, are discovered, and their talents developed with most gratifying results.

The schoolmaster at each institution is also the librarian and part of the duties of this officer is to advise and assist the inmates in the selection of what they should read. Several hundred new volumes have been added to the libraries and all books and magazines are now carefully selected by the library boards, which, in each case,

consist of the warden, two chaplains, and the schoolmaster.

The following recommendations, some of which were made in former reports, are submitted:

The erection of institutions for the segregation of the first offender and young men from the old hardened criminal and recidivist, is desirable and necessary. The erection of such an institution was begun in 1995, but afterward abandoned. The opening of such an institution has continually been recommended by all those engaged in the management of penitentiaries. The overcrowded conditions at St. Vincent de Paul and Kingston now make it imperative that something must be done.

The removal of the female prison from within the male prison enclosure is also an essential. The building in which the females are housed could be profitably used for other purposes. This has been recommended many times by the superintendent.

The opening of a mental disease hospital for the feeble-minded and insane inmates is also a necessity. At the present time those mentally diseased are transferred to some of the mental disease hospitals under the control of the provinces. Great difficulty is experienced in prevailing upon some of the provincial governments to receive these unfortunates, and not infrequently they are retained in the penitentiary for long periods before being removed. In some cases very troublesome patients are returned to the penitentiary, although pronounced by Dominion Government alienists as hopelessly insane. It would appear that the closing of the insane ward operated in connection with the penitentiaries until 1915 was a serious mistake. There should be a properly constructed and operated mental disease hospital provided as speedily as possible for these unfortunates.

Advanced methods of agriculture should be taught in all penitentiaries.

It is recommended that those who have been educated in the handling of criminals and the management of penitentiaries be invested with power to administer the affairs of same. The Royal Canadian Mounted Police are recognized, the world over, as a very excellent and efficient force, their success and efficiency having been accomplished and made possible by the method of administration employed, viz.: individual control with authority to administer the affairs and discipline the force without interference. They are a semi-military body as are the officers of the penitentiaries.

The training of all discipline officers before being permitted to assume responsible duty is again suggested. The duties of these officers are partly military and partly police, and should be largely reformatory. That they be thoroughly trained before being placed in charge of immates is recommended as an outstanding essential.

Wardens and surgeons of penitentiaries should be afforded every opportunity of visiting other penitentiaries, prison congress, etc., and of studying methods of administration other than their own.

More government work should be provided to enable us to pay the inmates a fair wage and make the penitentiaries self-sustaining.

There should be a Canadian Prison Congress meeting annually to discuss the

methods of dealing with the criminal in Canada.

There should be a parole officer employed in each prison area, whose duties would be to become fully acquainted with every inmate in the institution; to make a full and exhaustive inquiry into each case, not only of the man himself, but of the penitentiary and court records regarding him and more particularly of his record, habits, associations, environment and life in general in the community in which he lived, thus arriving as nearly as possible at the reason for his downfall. It would also be the duty of these officers to get fully into touch with the employers of labour in the districts and seek out situations suitable for those to be paroled. They should also visit as often as possible all paroled men and receive reports from employers regarding them and use their every endeavour to encourage them. These paroled men should remain under the control of the penitentiaries and the Dominion Parole Officer should have authority to cancel any parole and return the man to the penitentiary on receipt of an adverse report from the area parole officer, after investigation.

There should also be a parole board at each penitentiary, consisting of the warden, surgeon, school-teacher, chaplains and the area parole officer for that prison area.

They should report to the Dominion Parole Officer. The case should then be further considered by the Superintendent of Penitentiaries and the Dominion Parole Officer; and their report, accompanied by the report of the trial judge and such other reports as the Solicitor General might require, forwarded for decision.

This would mean the separation of the paroling of penitentiary inmates from

those of the provinces.

In this way, only officers who come into actual contact with the inmates would be permitted to sit on the boards and few mistakes would be made in the releasing of men on parole, as all reports would be prepared by those possessing first-hand knowledge of the men.

The parole officer for the area should arrange employment for them prior to their parole and assist them in every way possible. One of the needs of our system is some more effective method of aiding the inmates on their discharge. Men find it difficult to obtain employment and this frequently leads to their resorting to crime. On discharge from the penitentiary they find it much more difficult on account of the stigma of having been in prison.

All men granted parole should report to the warden of the penitentiary from which they had been paroled. They should not be placed under the control of the

police.

A first offender, unless his crime be of a very serious nature, should, after a short period of incarceration, be released on parole. The parole officer should arrange for employment with proper environment for him on the outside. He should be placed in charge of the area parole officer, made to work and live a clean, decent life. If married, he should be made to support his family. In any case the country is relieved of the burden of his support. Every endeavour should be put forth by the area parole officer to learn fully all about him and ascertain the cause or causes of his having committed the crime for which he had been arrested, and no effort spared to reclaim him. A study of the old hardened criminal may be interesting pathology, but it is the study of, and interest in, the first offender that will produce results and prevent increase of the really criminal class.

Should the efforts of the area parole officer fail to reclaim him and he again resorts to crime while under control, his license should be at once revoked and he returned to the penitentiary to serve out the unexpired portion of his sentence.

Parole should never be granted to a repeater.

For the past three years missions have been held at St. Vincent de Paul Penitentiary during the Lenten season with wonderful results, and in the year just closed at Manitoba and Dorchester penitentiaries also. At these missions the chaplains have been assisted by talented clergymen. The results have been very far reaching, surpassing even our fondest hopes and expectations. The clergymen who assisted at these missions gave their services gratis; needless to say they were appreciated by both officers and inmates. The following are the reports received from the warden of the Manitoba penitentiary regarding the mission held at that institution:—

The warden reports:-

"Enclosed please find report of the Protestant chaplain on the above, and also copies of letters from the Rev. Dr. Aikins, who took charge of the Protestant mission, and Father Handley, who conducted the mission for the Catholics.

"When I first suggested the mission to the chaplains I advised them that it would be well to choose missionaries of the calm, convincing type, rather than those who would appeal to the emotions only.

"As the mission approached, I sensed, among the men, a somewhat antagonistic feeling towards the same. I therefore addressed them at the close of a moving-picture show, held on the 23rd ult., and explained the programme with a view to creating a more cordial atmosphere towards the mission. I believe this address produced the results intended.

"The Protestant chaplain's report will give a list of the meetings. In addition to those enumerated on the 28th and 31st, the Protestant voluntary

services were held, at which practically all the Protestants attended. Both services were noteworthy for their heartiness, and a suggestion made by Mrs. Cooper, who acted as pianist at the voluntary meetings, that the men name their favourite hymns, met with many responses.

"I identified myself as much as possible with both missions, affording

the missionaries every facility.

"At the close of the voluntary communion service on the 2nd inst., I again addressed the men, reminding them that when I first took charge of the institution I told them 'it is up to you,' and advised them that that axiom still applied, that the only people who could wash out any stigma attached to the name 'Stony Mountain' were the inmates themselves during and after their sentences. A cordial reference to the missionaries met with hearty approval from the men and the assembly closed with the singing of the Doxology.

"The mission has proved to be a great success in many ways; to the men it has brought satisfaction of their greatest need, namely, assurance of hope for the future, provided they started afresh and in earnest. When I paid my evening visits to the prison I found many men praying in their cells. While no emotional appeal was made I believe that a number are determined to live a Christian life, and still others are trying to commence a better life. The tone of the institution has been raised; the number of those seeking material benefits

has been much lower than one would anticipate.

"The mission also produced a good effect upon the officers, the complimentary remarks of the visitors to the institution created a feeling of pride in the penitentiary and its work, while many clearly realized for the first time the end to which our efforts are directed. I am sure the majority of the officers did all possible by their sympathetic attitude to make the mission beneficial.

"Upon the missioners themselves, there was a marked effect. Father Handley's report will speak for itself. The visiting Protestant elergymen expressed themselves as amazed at the cordial response to their endeavours.

"In the outside world much was accomplished by the mission which helped to dissipate the erroneous opinions held by the public, due to the press articles from ex-inmates. All the missioners expressed themselves in most complimentary terms upon the management of the penitentiary. The Reverend G. A. Dixon, pastor of the Crescent Congregational church, and a prominent social worker, remained for the afternoon in order to investigate the conditions more thoroughly. As a result, on the evening of the 2nd inst., he preached to a large congregation, eulogizing the penitentiary and paralleling the conduct of the institution to the theme of Harold Begbie's Twice Born Men'.

"Father Handley, an American by birth, has preached in many of the penal institutions in the United States, from Fort Leavenworth down to small county jails. This fact emphasizes the weight of his report. The other mission to

which he has reference was also held in a Canadian penitentiary.

"I have been invited to address meetings in Winnipeg to explain the methods in use at this institution; for this I will seek your permission from

time to time.

"The Winnipeg Presbytery as a result of the mission have offered to co-operate with me in finding employment for inmates upon their release, if recommended by me. This will prove a much needed alternative to the Salvation Army, whose resources are usually greatly strained, although their willingness is beyond question.

"Some of the missioners are eager to keep in touch with the inmates by

correspondence, and I have granted this permission.

"I feel that a great step forward has been taken, some of the impressions left upon the immates cannot but be permanent, and in the future we may rely

upon a larger measure of sympathetic co-operation from the public than has been the case in the past. I hope the day will soon come when the Canadian public will realize that the adulation of foreign penal systems is, at times, misplaced, and that your policy is evolving a type of institution which adequately meets the conditions of our Canadian character.

"Our thanks are due to the missioners, particularly Rev. Dr. Aikins and Father Handley. The former left a large institutional church for the week and threw himself into the mission with the whole weight of his large heart. Father Handley was a revelation. He chose a different subject each day and his addresses were delivered with convincing logic, backed by the fervour inspired by Divine belief. In personality I found him to be the most humble and sincere of men, and among those who are the better for having met him is the warden himself."

Rev. Dr. Aikins reports:-

"In compliance with your request I hereby send you a brief resume of the recent mission held among the Protestants in Stony Mountain penitentiary. Viewed from the standpoint of a preacher of the gospel the visible results were beyond any other mission that I have ever held. The deep interest manifested by the men, their penitence for wrong-doing and their sincere determination to seek Divine help in leading a new life were to me a gratifying revelation of the fact that the Saviour of Mankind is now as He was in the days of His flesh, 'The Friend of Sinners'.

"Judging by the interviews that I conducted the great majority of the men were sincere in what they did when seeking evidence of a real change. I received such replies as the following: 'I am a changed man because I am contented and happy.' If staying here will atone for the past I am willing to stay.' 'I feel in my heart that my sins are forgiven.' 'I have failed many times but I am going to make one more big try.' 'I have quit swearing and cigarette smoking.' 'I am not concerned so much about myself as those dependent on me on the outside.'

"As you know, I preached the gospel of loving-kindness and tender mercy. No one stands outside the compassion of the Saviour and their hearts opened out in response, as the flowers to the sunlight. They are not monsters of iniquity but men with strong natures who somehow missed God and got on the wrong path. The same ground that grows rank weeds can grow good wheat and I believe they will become good men.

"To have 88 men receive the Sacrament out of a possible 123 was surely an indication that Divine favour rested on the effort. Of course the circumstances were favourable owing to the fact that the chaplain had prepared the ground and that you did all that any man in your position could do to make the mission a success. Personally, I am thankful for the experience; it was the greatest week in my life."

Rev. Father Handley reports:-

"Permit me to thank you for the inspiration and stimulation of the mission in Manitoba penitentiary, just drawing to a close. It has been one of the most delightful experiences of my whole life. I wistfully regret its ending.

"During my three years as a newspaperman and my twenty-three years as a mission preacher in the Congregation of St. Paul, I have had many opportunities to study prison conditions. This is the first prison mission I ever gave and only the second I ever heard of having been given on this continent.

"I congratulate you and your superior, whose sympathetic vision made the experiment possible. It has been a wonderful success Every participant doing his top-best in the prevailing atmosphere of cheerful good-will which has shone throughout our effort, hails this mission as the harbinger of better times for us all.

"Among the prisons I have visited, your institution is a bright, particular star. It is so sunny, clean and orderly, so simple, frugal, wholesome, so correct in its snappy military observance, so varied and interesting in its vocations, so quietly and smoothly efficient in its operation, that I have not once been able to feel I was in a prison; all the old, dismal associations of the word are wanting. I have caught myself referring to it by the slip of the tongue, as the university. Again I have marvelled at the parallel between a properly conducted prison and a monastery. This I have impressed on the men in my talks, begging them to behave themselves as good monks, labouring cheerfully and utilizing their leisure to think of God and thank Him for quiet, peace and plenty, secluded from worldly care and temptation, in which they may cultivate those spiritual qualities which alone make men free.

"The heartiness of their response to this appeal has been most gratifying. Surely many of them will persevere. Surely society will one day acknowledge its great debt to this prison for returning these men to civil life well grounded

in the best and sturdiest qualities of good citizenship.

"Ninety per cent of the Catholics in prison approached the Sacraments, most of them three times during the week. This is far above the average of parish missions. Many had not been reconciled to God since childhood. Surely the Redeemer who died for them will richly bless all who made possible those consoling results. May He ever bless and prosper you."

The Protestant chaplain reports:-

"I herewith present the report of our mission held in this institution

March 26 to April 2, 1922.

"On January 8 last you made the suggestion that the two chaplains arrange a date for conducting a week's mission. We at once set to work to perfect an organization. In this we believe we were Divinely guided, as results prove.

"We first secured Rev. Dr. J. E. Aikins, of Young Methodist Church, to act as our evangelist for the series. His board kindly released him for two Sundays, March 26 and April 2, and intervening week that he might take up this

work.

"As we have many different denominations represented in the prison, we decided to try and interest as many as possible by inviting a representative from each to be with us on certain days and co-operate in the mission. With this object in view we arranged the following schedule: Monday—Rev. W. A. MacLean, of St. Giles Presbyterian Church. Tuesday—Rev. W. E. Mathews, of Broadway Baptist Church. Wednesday—Rev. W. J. Southam, of Holy Trinity Anglican Church. Thursday—Rev. Geo. Laughton, of Central Congregational Church. Friday—Rev. E. F. Church, of Fort Rouge Methodist Church. Saturday—Col. MacLean and Capt. Allen, of the Salvation Army. This schedule prevailed throughout the week save in the case of Rev. Geo. Laughton, who, owing to illness, was unable to come, but sent a splendid supply in the person of Rev. Geo. Dickson, Crescent Congregational Church. To each of these ministers we are deeply indebted, not alone for their help in the work, but for the splendid spirit of co-operation and encouragement that each one brought to us from day to day. There was the most sincere brotherhood manifested throughout.

"In securing Dr. Aikins as evangelist, we are sure it was more than good fortune. It was Divine guidance. Though the pastor of one of Winnipeg's

largest churches, he unhesitatingly answered us when we asked him to undertake the work. I will surely go if the Lord wants me to go. I must pray over this matter. I will let you know in a few days.' He freely gave his full time to us for the eight days of our mission. He gave his all to the work; the riches of his well-stored mind; the wealth of his deep affections and intense sympathies, as well as the ardour of his great nature. In deep reverence we say 'God bless Dr. Aikins,' and in saying it, we believe we are expressing the mind of all the men who have been influenced in these meetings.

"Of the meetings themselves we must say that from the very start they were a success. This was due in large measure to Dr. Aikins' splendid judgment in his approach to the men. It was totally devoid of all censoriousness on the one hand and any condescending or patronizing spirit on the other. He won their respect and confidence from the start. This is equally true of all the ministers who took part. How completely the esteem of the men was exemplified in the Tuesday a.m. meeting, when a voluntary service was held and one hundred and two desired to be present, and this does not include the fireman, kitchen men and bakers who wanted to be present, but their duties kept them away. Throughout the week the meetings grew in interest and power. All the meetings were calm, quiet and dignified. No means were used to snatch a verdict, or even to commit the men save the workings of the Holy Spirit in the hearts of the men.

"On Friday night I made a personal canvass of the prison to know what men would like to partake of the Sacrament on Sunday. After careful explanation and instruction, I found there were eighty-nine who so desired. Many of them said 'I would like to, but do you think I am good enough?' invariably answered, 'I cannot be your judge.' 'It is for you to settle between yourself and God.' I would then repeat the conditions of partaking-'Ye who do truly repent of your sins, and intend to lead a new life following the commands of God and walking from henceforth in His Holy Way, draw near and take this Holy Sacrament to your comfort and make your humble confession to Almighty God.' I said if you will enter into that covenant with God we will not deny you the Sacrament. 'That is what I am trying to do,' or 'That is just what I want to do,' was almost the invariable reply. sacramental service was truly a time of heart searching—a time we will all long remember.

"When Dr. Aikins' official board heard we were going to hold Sacrament on Sunday, they very kindly loaned their beautiful silver individual communion service for the occasion, and also sent along their treasurer, Mr. Dingle, to assist. This act, with their kindness in releasing Dr. Aikins for the mission and sending their baritone soloist on both Sundays has done much to cure the men, who thought they had a grouch against all churches.

"In conclusion let me thank you for that suggestion on January 8 and for your hearty co-operation throughout the entire mission. It would not have been at all necessary to have blocked us to have killed all effort. All you would have needed to do would be to have sat back and perhaps carelessly let your foot touch the brake, and nothing could have been accomplished. You put your influence and personality into it, and because we were all united good has resulted.

"We thank you for your help and influence, and hope this will not be the last mission in this institution."

Arrangements have been made for the holding of similar missions in all the penitentiaries during the next Lenten season.

Respectfully submitted.

W. S. HUGHES.

Superintendent.

APPENDIX A-DOMINION PAROLE OFFICER'S REPORT

R. R. Creighton, Acting Parole Officer, reports:

Having taken over temporarily the duties of the Dominion Parole Officer since the sudden and much regretted death of the late Judge W. P. Archibald on January 17 last, it devolves upon me to submit the annual report of the parole system.

In the death of Judge Archibald the department has lost an efficient officer, and the inmates of our penal institutions a friend whose practical assistance and kindly advice were always at their service. His long experience, kindly disposition and sympathy with the unfortunate class of the community with whom he had to deal peculiarly fitted him to perform the important duties devolving upon him.

There were liberated on parole 405 inmates from the Dominion penitentiaries and 498 from the various jails and reformatories, making a total of 903. As compared with the previous year the releases from the penitentiaries show an increase of 30 and those from the jails and reformatories a decrease of 10.

The tabulated statement is as follows:-

TABULATED STATEMENT FOR YEAR ENDED MARCH 31, 1922

Prisoners released on parole	Revocations	Forfeitures	Total loss	
Albert of the Art of the Cohol, one of the	per cent	per cent	per cent	
Dorchester 100 St. Vincent de Paul 104 Kingston 116 Manitoba 31 Saskatchewan 30 British Columbia 24	8 or 8.0 10 or 9.6 10 or 8.6 4 or 12.9 3 or 10.00 1 or 4.16	5 or 5.0 3 or 2.8 5 or 4.31	13 or 13.00 13 or 12.5 15 or 12.9 4 or 12.9 3 or 10.00 1 or 4.16	
Total, penitentiaries	36 or 8.8 6 or 1.2	13 or 3·20 8 or 1·6	49 or 12·09 14 or 2·8	
Grand total903	42 or 4.6	21 or 2-32	63 or 6.9	

Of the 903 persons released, 42, or 4.6 per cent, had their licenses revoked for non-compliance with the conditions of parole, and 21, or 2.32 per cent, forfeited their licenses as a result of subsequent conviction

The following are the figures submitted by the Royal Canadian Mounted Police covering the period between 1899 and March 31, 1922:—

Released on parole from penitentiaries	
Licenses revoked	511
Licenses forfeited	324 12,892
Sentences not yet completed	

A reference to the above table shows that between the periods mentioned, 12,892 persons out of 14,415 liberated, have observed the conditions of release and completed their sentences. When 688 who are still reporting are added to this number and a deduction from the total releases is made it shows the gratifying result that only 835, or 5.7 per cent, failed to observe the conditions of parole and had their licenses either forfeited or revoked. No further commentary is necessary to show that the parole system is producing highly satisfactory results and that its success is fully established.

APPENDIX B-WARDEN'S REPORT

KINGSTON

J. C. Ponsford, Warden, reports:

The inmate population has increased 123, made up as follows:-

			Males	Females	Total
Remaining at midnight,	March 31, 1921	 	707	25	732
Remaining at midnight,	March 31, 1922	 	831	24	855

The male population increased 124, and the females decreased by one. The number of inmates received during the year was:—

Males, 391; females, 12; total, 403.

The discharges during the year were as follows:-

	Males	Females	Total
Expiration of sentence	124	6	130
Pardon	1	6	113
Parole		1	25
Death	4		4
Returned to provincial authorities			1
By Order of the court	3	WEILE .	3
Transferred to other penitentiary	1		1
	267	13	280
Inmates received during year			403
Net increase			123

There are at the present time 14 inmates confined in the different asylums of the province, 9 of whom are serving a life sentence.

Of the 855 inmates confined, 733 are under 40 years of age.

You will note by the statistics that there were no escapes during the year just closed, which reflects much credit on the surveillance of the disciplinarian staff.

The sanitary condition of the penitentiary and the general health of the inmates have been good, with the exception of a number of cases of enteric fever in the early part of this year. The source of infection was traced to the drinking of the lake water. The disease was of a mild type and all cases made good recoveries. The well water has been examined regularly during the year and has invariably been reported pure, while reports on the water obtained from the lake have been to the effect that it was contaminated with colon bacilli. The danger from this source of drinking water has been overcome by the installation of an efficient chlorinization plant, which should eliminate any danger of enteric fever in the future, even though the inmates do not confine themselves to the drinking of the well water. The lake water is now made reasonably safe and there should be no further danger from that source.

With the addition of all modern instruments and equipment, the hospital has been placed in a very high state of efficiency, wherein there can be performed the most serious operations. During the year, such major operations were performed as the removal of a tubercular kidney, and the amputation of a leg, as well as a number of minor operations. The sterilizing room is in first class condition and in keeping with the rest of the hospital.

. Venereal diseases are given special attention by the surgeon and in all cases of syphilis, he is assisted by Professor Austin, of Queen's University, who has charge of the Provincial Free Clinic for Veneral Diseases at Kingston.

A Wasserman test is made of all newcomers, in addition to their being vaccinated.

I regret to report the death of four inmates during the year:-

Inmate G-407, Barre's death was due to malignant tumor. Inmate G-600, Ward died from pulmonary tuberculosis.

These two died within the walls of the prison. The other two-

F-202, G. Vanstone, and F-346, J. Jessamine,

died in provincial hospitals for the treatment of insane patients.

As might be expected, there were a number of minor accidents.

Excellent progress was made in all lines of building construction and a large amount of repair work was done during the year. Before we could commence the construction of the new power-house, dynamo room and laundry, the old gas house building had to be taken down, the debris removed and a large amount of deep and difficult excavation work done to get a foundation for the building as the ground was filled in on what was formerly lake front. This necessitated extra precaution for the footings of the building. The basement walls, 12 feet high, were built of concrete to the grade line, and an average of 5 or 6 feet of the stone wall completed before the work was shut down for the winter.

The foundation for our new smokestack was a difficult proposition, owing to the fact that we had to go below the water level to the solid rock to get a foundation suitable for carrying a 120-foot smokestack, and necessitated the building of a cofferdam and the use of a pump, which delayed progress to quite an extent. However, the foundation, which is of concrete, was built to the grade line, at which point we were forced to discontinue further work owing to weather conditions.

The excavation for the large coal vault, which had been commenced the previous year, was completed, and the concrete walls, columns and beams, were all constructed, and the forms set for the roof before work was discontinued

The old stone bastion or tower-house at the northeast corner of the prison enclosure was taken down and the boundary walls raised four feet on both sides, extending 40 or 50 feet each way from the tower, and a new umbrella type tower-house built and cement coping put on portion of the boundary wall raised. This completes the construction of the new tower-houses, which are a great improvement on the old ones, not only from a point of usefulness, but they also add very materially to the appearance, and give the officers doing duty a full range of vision over practically the entire north end of the yard.

The work of reconstructing the dome galleries was commenced and the two first gallery floors, which are of cement, have been poured. The construction of these galleries necessitated a very much larger amount of work than would be visible after the floors and galleries had been completed.

In the placing of the iron brackets for the new galleries, 421 lineal feet of 13-inch holes had to be drilled in the stone walls for the bolts to fasten the brackets to the wall.

Both of stone balustrade walls on the entrance steps from King street to the warden's residence had to be taken down and rebuilt. These walls were each about 65 feet long and four feet high and a number of the steps had to be reset.

The painting of the new North wing was completed during the year, and the old boundary wall at the south end of the prison was taken down and the debris removed.

Two hundred and seventy-five reinforced cement fence posts were made during the winter for use on the farm.

During the winter, 1,600 feet of 6-inch concrete conduit tile were made, which will be used in laying the hydro system cable from Union street to the transformer house and the main trunk line through the prison yard.

Owing to the lack of cell accommodation, four ranges of the double-sized cells in the Prison of Isolation building were divided by wooden partitions, which necessitated a large amount of work.

The blacksmith shop was advantageously employed during the year in making barriers, beds, and locking bar apparatus for Dorchester, St. Vincent de Paul and Prince Albert penitentiaries, as well as keeping pace with our own work and repairs.

A large quantity of work has been done on the mail bag department, where about 100 inmates were employed during most of the year. 91,575 mail bags were repaired, 76,935 new ones were made. For the manufacturing of 76,935 bags in 1921-22, we received \$14,238.50—as against the manufacturing of 72,835 during the year 1919-20—for the making of which we only received \$7,627.63, or a difference in favour of the 1922 business of \$6,610.87.

There have been shipped from this repair shop during the year to the different

mail bag repositories, 95,985 repaired bags and 92,227 new bags.

Besides the work for the Post Office Department, a commencement was made with work for the Topographical Surveys, Parks Branch, and Geodetic Survey, all of which work proved profitable and gave the best of satisfaction to the new department.

The total receipts for the mail bag department are given at \$39,569.71, on which

a small profit was made.

I would be very glad if it were possible to obtain larger orders from the Post Office Department and Parks Branch, as we are organized and equipped to handle double the amount of work which has been done for these departments during the

year just closed.

The tailor shop has been well and profitably employed. During the fiscal year just closed, there were 431 pieces of uniforms made, 43 pieces of custom work done, and 6,455 articles of clothing made for the inmates, and 733 articles of inmates' discharge clothing, 369 discharge shirts made for other penitentiaries, as well as 508 suits, shirts, and pants made for the Department of Indian Affairs, triennial clothing, and 12 uniforms for the D.S.C.R. Marine and Fisheries, 300 suits overalls. Department of Interior, Geodetic Survey, 192 provision bags. Parks Branch, 200 suits overalls. All of the work done for other Government departments was entirely satisfactory, and left a small profit for the benefit of the penitentiary.

The shoe shop was also well and profitably employed during the year. Work was

done in this department as follows:---

	Pairs
Custom shoes made	80
" repaired	1,837
Contract shoes made	223
Contract belts	150
Post Office Department leggings	500
Uniform shoes	248
Uniform shoes, repaired	
Night slippers made	
Night slippers, repaired	
Bandoliers for tower men	6
Change room, slippers required	2,444
New slippers made	641
Cobourgs made	477
Leather mitts made	7031
Harness made and repaired.	
For discharge, there were 2241 pairs boots made.	
For female prison, 50 pairs of new shoes and 101 pairs repaired.	

The change room was one of the busiest departments in all of the penitentiary, as it is there that every inmate must go for his change of clothes whenever required, and it is there that he gets his clean clothes once a week before going to the shower baths. New articles of clothing, including socks to the number of 7,862 pieces, were made and 36,380 articles were repaired, as well as 42,309 tags which had to be put on the various articles of inmates' wearing apparel.

There were also 548,577 articles of clothing and bedding laundried during the

year.

There were 36,380 articles of wearing apparel and cell equipment repaired.

The carpenter shop, the tin and paint, printing department and shop in which brooms are made, have all been well and profitably employed, and the stonecutters have been very busy cutting stone for the different buildings under the course of construction.

The steward's department has supplied good and wholesome food to the inmates with a varied diet. A number of improvements have been made here, and all of the interior has been renovated, which makes a rather inviting appearance.

The engineers' department has been very busy during the latten part of the fiscal year making preparations for the installation of hydro power to the institution, and when the hydro has been fully installed, it will be a great saving on coal.

Several of the main water and steam lines of pipe had to be taken up and replaced, owing to their having become unserviceable through erosion and other causes. These were relaid with new pipe and covered with asbestos lining and zinc covering, and where the opportunity offered, they were inclosed in wooden or cement conduits. This condition also applied to several of the electrical lines, including the internal telephone system which had to be almost entirely relaid through faulty construction when first installed, owing to not having been properly grounded from lightning, and nearly all of the wiring in the different shops, which had formerly been installed by the open system, has been taken down and placed in conduits, which is a very much safer and sane method of installing the wire and has made a splendid improvement to all of the shops.

The heating system in the Prison of Isolation was all remodelled and has made a great improvement in the even distribution of the heat along the different galleries.

Drinking water lines were laid from the well in the yard to the asylum building, tailor shop, and shoe shop, and a new line laid to the boiler in the kitchen which heats the water for drinking purposes of the inmates who prefer hot water to tea.

Telephones were installed in the tower on the boundary wall at the southwest and southeast corners, and connected with the yard shanty and the deputy warden's office. This adds to the security of the prison.

The wiring was all changed in the Roman Catholic and Protestant chapels and school-room, which has made a splendid improvement in all three quarters. In fact, the engineers' department has had a very busy year, and the staff there had to be increased to keep pace with the improvements that were necessary and the large amount of repairs from natural wear and tear.

The female ward was thoroughly renovated, and a number of improvements made to the living quarters of the matrons. Shower baths were installed and other improvements made to the inmates' quarters. There was also a washing machine put in the laundry, which greatly facilitates the getting out of washing for the hospital, which is done by the females.

All inmates in this department were employed in making light articles of wearing apparel for the male inmates and discharge shirts for the other penitentiaries, as well as their own clothing.

The spiritual welfare of the inmates was well and carefully looked after and administered to by the Roman Catholic and Protestant chaplains, both of whom were very much interested in their work, and I am sure they are doing much for the moral uplift of the inmates. They are both very attentive to the sick, and endeavour to interview each inmate before he is liberated either on parole or expiration of sentence.

Both of the chaplains have been permitted to have assistance from their confrères during special services and feast days, which was very beneficial to all concerned, and of great assistance to the chaplains in the discharge of their spiritual duties.

Colonel Otway, of the Salvation Army, accompanied by his staff and band, were permitted to hold a song service twice on different Sunday afternoons during the year. These services were greatly enjoyed, and I believe were beneficial to all of the inmates who attended. I endeavoured to arrange for such a service once a month. but have not been entirely successful, although Adjutant Condie has promised to put one on whenever it is at all possible to do so.

The superintendent has granted permission to hold a week's missionary service in the penitentiary during the Easter season, 1923. This mission, the chaplains and myself are looking forward to, with a great deal of anticipation of the good results that will come from the same. There will be special music, and all arrangements will be made at the proper time for the successful issue of the mission.

One of the best moves that has ever been made in the penitentiary service for the moral uplift and benefit of every inmate was the appointing of a certificated school-teacher, who also has charge of the library. Our teacher took over his duties on July 4, 1921, and has very energetically and successfully managed the school and given individual instruction and assistance to the inmates in their cells between 6.30 and 8.30 every evening, which has shown very marked results. The inmates have become quite interested in their work and for the most part spend their evenings in study under the tuition of the teacher, who visits as many of them every evening as is possible for him to do.

The teacher is having splendid success in the library by advising the great majority of the inmates to read only the better class of books and those of an educational character. There have been added to the library during the year some 500 volumes of the very best books by standard authors, and there have also been added twenty weekly and monthly magazines of which we are taking monthly more than 100, and I feel sure that during the coming year, the librarian and school-teacher will be

found in even greater demand amongst the inmates.

During the period between Christmas and New Year's, a splendid entertainment was put on by the Y.M.C.A., which was very highly appreciated by all of the inmates who enjoyed it in the fullest degree. Other entertainments have been provided by the inmates themselves on every holiday during the year by permitting quartettes to

sing in the corridors of the various cell blocks.

In my recommendations last year, I drew attention to the congested condition existing here, and recommended the building of a new prison for that purpose. Since my last report, the prison population has increased 123, making a total of 855 inmates, which is altogether too large a number to be confined in one penitentiary. I would therefore again repeat the recommendation, and ask that the construction of a new penitentiary be proceeded with at as early a date as it is convenient to do so. I am of the opinion that no penitentiary should contain more than 500 prisoners.

I wish to again recommend that the female ward be removed from here to some suitable distance and placed under an entirely separate management from that of the

male penitentiary.

I am of the opinion that it would be in the best interest of the service to have the wardens of the different penitentiaries meet the superintendent and inspectors at least once a year for the purpose of discussing all matters pertaining to the best interest and management of the penitentiaries.

I wish to express my gratitude to the superintendent and inspectors for their assistance and courtesies rendered during the year, and I also wish to tender my thanks to all of the officers on my staff for their loyal and hearty support, which I very much appreciate.

I enclose herewith reports from:-

Surgeon, W. G. Anglin.
Chief Trade Instructor R J. Burns.
Chief Trade Instructor Jas. Tweddell.
Engineer T. Nixon.
Matron M. G. Draper.
Rev. Father McDonald.
Rev. Archdeacon Dobbs.
School Teacher and Librarian Crossley.
Nominal Roll of Permanent Officers on staff.

ST. VINCENT DE PAUL

R. de la Bruère Girouard, Warden, reports:

My first annual report in connection with the administration of St. Vincent de Paul penitentiary also includes the following:—

- 1. Statistical report.
- 2. Surgeon's report.
- 3. Chief Industrial Officer's report.
- 4. Farmer's report.
- 5. Librarian and School-teacher's report.

From the Statistical report it will be noted that on March 31, 1921, the population of this institution was 555 and that at the close of the year we had a population of 687, making an increase of 132. During this period we had one escape on October 30 last, but the inmate was recaptured on October 31 and returned to this institution on November 1, 1921.

There were six deaths during the year.

Since taking over the administration of the institution on May 23, 1921, I have had the filing system introduced on an up-to-date basis.

The hospital and sanitary conditions generally have been visibly improved. Many useful articles have been received, which have assisted in putting the hospital in the condition it now is, a modern and model department in every respect.

The treatment and possible elimination of venereal diseases was gone into thoroughly and a good working system established, blood tests of every suspected case being sent to Montreal for examination and report.

Drinking water has been repeatedly examined and that supplied by our artesian well has been found to be free from taint and of high quality.

An operating room has been furnished and our first operation, the removal of a tumor, was an extremely successful one.

A dental clinic was opened and completely furnished with all modern appliances and the services of a qualified dentist secured for this department. A great improvement in the dental condition of the inmates has been noted.

Five cases of insanity developed amongst the prison population during the fiscal year, the surgeon's report in each case being confirmed by the provincial alienist.

It is regretted that arrangements cannot be made for the immediate removal to mental disease hospitals of the unfortunates who are pronounced insane by the prison surgeon. Repeated efforts were made during the past year to have cases transferred to local provincial asylums, without success. I would respectfully recommend that a mental disease hospital, for the care and treatment of those going insane while serving a term in the penitentiary, be erected. It is not humane to keep the unfortunates confined in the penitentiaries where proper care and treatment cannot be given them.

It will be noted that the cost for medical attention is slightly higher than any previous years, due to the extra medical care and dental treatment bestowed on the inmates.

Dealing with our industries and construction, I am happy to report that considerable success has attended our efforts.

The employment of the present chief industrial officer was a move in the right direction. The construction work under his guidance is now handled in an efficient manner, directed by technical skill and education.

The new Northeast wing, construction of which was recommenced in May, 1921, is nearing completion. Concrete was poured throughout the entire winter in this building. It is hoped that it will be ready to accommodate over two hundred inmates by the end of December, 1922.

A study of the steam system in use in the institution convinced me that hydroelectric would be not only preferable, but cheaper. The steam plant has, therefore, been largely removed and the hydro-electric introduced. I am glad to say that my original estimate that a saving of \$20,000 per year will be exceeded is being borne out; in fact, during the first month that the new current was used the lighting alone showed a saving close on \$1,200. The engineer and his staff are deserving of a great deal of credit for the way the new installation was handled.

Eighteen new model cells have been constructed in the hospital building for the

isolation of inmates.

Eighty-five temporary wooden cells were built in vacant shop building and thirtysix other temporary cells were added in the cell blocks of the main dormitories to accommodate the increased population.

Eleven of the large double cells in the North wing were partitioned into twenty-

two standard cells, each five feet wide.

The building of a power line extending from Messrs. Laurin & Leitch's quarry into the prison was completed and a transformer house of cut stone, 36 by 10 by 12 feet, was built, this during the coldest winter months.

A large carriage house, 40 by 30 by 12 feet, with drain pits and concrete floor, also an oil storage house of masonry, 38 by 14 by 11 feet, were built outside the prison

walls.

The frame storage building for lumber, 112 by 20 by 12 feet, was blown down in October last by a storm. This has been completely rebuilt.

Owing to faulty construction and action of frost, three hundred and ten lineal

feet of boundary wall was torn down and had to be rebuilt.

The light railway track to quarry was relaid with ties and ballasted throughout,

and 6,450 lineal feet of 56-pound steel rails laid.

The old Case tractor which was no longer considered useful on the farm, was remodelled, and is proving highly successful as a locomotive to haul our materials from the quarry, thus doing the work formerly performed by two horses.

The warden's quarters were thoroughly renovated and decorated inside. Six of the officers' houses were painted and renovated. The lower portion of the administra-

tion building was renovated.

Shortly after I assumed control of the institution, it was decided to construct an Officers' Club House outside the prison walls. This was started in December, 1921. The funds for the erection of this building were subscribed by the officers. A beautiful large airy club room, 50 by 24 feet, with a verandah on three sides, for the exclusive use of penitentiary officers in the evening and leisure hours has now been completed. This was a badly needed accommodation as there is practically no distraction or amusement of a local nature in this village. It is confidently expected that this Club House will develop and strengthen the esprit de corps of our staff through the encouragement of games principally of an outdoor nature.

New machinery is badly needed for the machine shop and a considerable eaving would result if such machinery were installed. This department is capably man-

aged by a temporary machinist instructor.

The book bindery is turning out very high-class work and the inmates in this department have been actively employed during the whole year to considerable advantage.

The carpentry department also requires new machinery. Besides the necessary work in connection with building, etc., in the institution, twelve filing cabinets and

forty pack saddles were turned out for Government departments.

The masonry department, which employs from seventy to ninety inmates, is doing excellent work. The men on discharge who have mastered this trade are seldom without employment outside and command at times as high as \$1 an hour for their services.

The output of the quarry has increased. The new instructor has already opened same, taking the stone from a different angle and working with the seams. Stone of very superior quality is taken from a greater depth than formerly.

The tailor and shoe shops have also shown considerable improvement and are

turning out large quantities of excellent work.

The tinsmith shop has also been doing good work throughout the year, and with the number of inmates receiving instruction in this work, we should, in the future, be in a position to take up a large amount of work required by the Government in other departments.

In summing up the results obtained by the industrial officers, I wish to say that I am extremely satisfied with the progress made during the past year, and wish to tender my thanks to the chief trade instructor and his assistants for their untiring efforts in this connection.

It is to be regretted, however, that more Government work which can be done by the inmates of the penitentiaries, who are the wards of the Government, is not furnished. I am confident the institution could be made self-sustaining were a wage paid to the inmates as well.

The farm under the administration of the new farm instructor, who is a graduate of MacDonald College, is showing good results. The piggery returns have been increased very largely, in fact about \$2,400 in the last six months. I anticipate a very large increase of the amount of products grown on the prison farm.

The school and library are in excellent condition and wonderful results are being obtained through the efforts of the schoolmaster and librarian. The statistics con-

tained in his report will fully bear out this statement.

The steward's department, though handicapped by poor kitchen arrangements, has attained all that could be expected. Food of a very good quality has been well served. A greater variety in the dietary has been introduced. I feel the steward has handled his department wonderfully well.

RECOMMENDATIONS

In my opinion segregation of youthful and first offenders from the hardened criminal is absolutely essential, and the more experience I gain, the more I am convinced that the superintendent's recommendations for the construction of a new penitentiary to be set aside for this class of inmate is not only desirable but imperative, particularly in the case of St. Vincent de Paul penitentiary, where the congested condition occasioned by our large and increasing population demands and requires that a definite limit of say 500 inmates be not exceeded in this institution. As it is now, our population is 687.

If reformation rather than the punishment of the criminal is the end the authorities have in view, then the only solution for the problem is, as has been suggested above, and on many occasions by the superintendent and inspectors. I make this my strongest recommendation, being absolutely convinced that segregation of youthful

and first offenders is not only necessary but absolutely essential.

A close second to my first recommendation is the amendment of the Oriminal Code to empower a judge to give an indeterminate sentence. Who can say whether a stated sentence with definite limits will punish or establish a cure? There is no question but that the authorities who are more intelligently capable of deciding this are the penitentiary officials themselves. A man knowing that his release and liberty depend on his conduct and industry, and above all, the assurance he can give the officials that he will lead a better life when released, is a powerful incentive towards the reformation of that inmate. A criminal, like an athlete, can in a sense be overtrained as well as over punished, resulting in his going stale, and the effect that is calculated on by a definite sentence is often lost. It is seldom, if ever, one meets two natures in the criminal world of even mental calibre, and therefore the treatment accorded to one will not necessarily have the desired effect if accorded to the other.

I would also recommend that certain Government departments be approached with a view to giving preference to penitentiaries to fulfil their contract work, and that the penitentiaries be supplied with the necessary machinery and materials to meet these contracts in an efficient and capable manner. It has been clearly demonstrated by many other penitentiaries that an institution of this sort can not only be put on a self-supporting basis but actually made to pay a revenue to the State instead of being a burden to the public through taxation. This would enable the authorities to pay an inmate a small wage, thus helping his dependent family, or in the case of a single man, leaving him a nest-egg for his re-establishment in civil life, instead of practically throwing him helpless on the community, thereby possibly forcing him to fall back into the criminal ranks. It would be a powerful incentive for an inmate to reform.

I would also recommend that a district parole officer be appointed in each district in conformity with the superintendent's recommendation in his 1921 report, to operate with the warden, chaplains, and school-teacher of each penitentiary for the purpose of determining what inmates are qualified for parole; also that wardens and senior officials of penitentiaries be afforded every opportunity of visiting other penitentiaries.

to study other methods of administration.

Following the precedent established three years ago by this institution, with the kind support of the authorities at headquarters, missions in both the Catholic and Protestant chapels were held this year with excellent results. I strongly recommend that these missions be given every encouragement and held annually There is no doubt but that they are productive of great good.

With the kindness of the Brothers of Laval College, the Montreal Tramways Company, the Prisoners' Welfare Association, and the Salvation Army, concerts have been given to the inmates, which have been much appreciated and have done a great

deal to improve the morale of the community.

I wish to thank the members of my staff who have on the whole given me hearty and loyal support, and in particular to thank the Superintendent and the Inspectors, for the kindness, courtesy, and interest they have always shown towards myself, interest which is appreciated in every sense of the word.

DORCHESTER

Wm. Meighen, Warden, reports:

I beg to submit herewith the annual report for the fiscal year ended March 31, 1922, together with the following reports:—

(1) Statistical report.

(2) Farm report.

- (3) Surgeon's report.
- (4) Librarian's report.
- (5) School-teacher's report.
- (6) Matron's report.
- (7) Roman Cathelic Chaplain's report.
- (8) Protestant Chaplain's report.
- (9) Chief Trade Instructor's report.

At the closing of the prison, March 31, 1922, there were in custody 435 inmates. We received during the year 262 and discharged 157, as follows: Expiry of sentence, 42; parole, 100; deported, 11; deaths, 3 (one inmate died in Insane Asylum on transfer); transferred to Boy's Industrial Home, St. John, N.B., 1. Our population at the close of the fiscal year ended March 31, 1921, was 330 souls, making an increase for the past fiscal year of 105, and an average daily population of 397, the largest increase in any one year in the history of the institution.

Owing to a season of drought in the Maritime Provinces, which was very unusual, our farm operations for the year were not as fruitful of results as we would have liked. We tried last year to raise a variety of small vegetables, such as radish, lettuce, green onions and so forth, in order to provide a varied diet in season for the inmates, and although the season was very unfavourable we did succeed in furnishing the inmates with a much more varied diet than heretofore.

Although our crop of hay was light in comparison with other years, we raised about 350 tons, and as we had over 100 tons left from the previous year, we were able to feed from seventy-five to a hundred head of cattle, as well as our twenty horses through the winter, and during the fall and winter supplied the institution with

fresh killed beef from our own herd.

Very good progress was made in our building operations. Our new South wing was roofed in by October, 1921; the east side, containing 130 cells, was plastered and ready for occupation in December, thus providing proper and safe accommodation for our overflow of population, which we were obliged for some two or three months previous to house in the corridors of the North and East cell wings. The west side of the South wing was finished during the early part of 1922, thus providing us with a cell wing containing 260 modern cells, and making what I believe to be one of the best and most modern cell wings in any prison.

We also installed an auxiliary to our water supply system, by the construction of a concrete dam across the stream known as the Millbrook, about one mile from the prison. This dam is 100 feet long by eleven feet deep and three feet wide, reinforced with eight buttresses, extending the full height of the wall. This increases our water supply by 450,000 gallons. A pump has been installed close to the dam driven by a 25-horse-power oil engine, and pipe laid a distance of 3,200 feet to connect with our reservoirs, from which the water flows by gravitation to the prison. We are now equipped with sufficient water supply for the first time possibly in the history of the institution.

We also constructed a garage for the purpose of housing our motor trucks.

Other very necessary improvements have been made throughout the institution, such as the enlarging of the keeper's hall, painting of the chaplain's rooms, decorating of the Roman Catholic altar, and extensive alterations to the farm. The erection of a new fence along the main road in front of the prison, made with turned posts, painted, and covered with Page wire, has added much to the appearance of the institution and the farm. The construction of a concrete walk along the prison lane to the main road has also added greatly to the appearance of our property, and is very much appreciated by our officers.

It would have been impossible for us to have accomplished one-half the construction work done without the use of the motor trucks. With the motor trucks we hauled all our coal from the prison siding during the summer months; we also hauled our gravel for construction purposes, and with the use of our light Reo, we were able to transport inmates and officers to places where they were working, a mile or so from

the prison, in a period of about ten or fifteen minutes.

The discipline of the inmates has on the whole been good, which indicates that the majority of our officers endeavour to do their duty conscientiously and faithfully, for when officers are honest and zealous in the discharge of their duties, the inmates under their supervision naturally fall into the same groove, and thus become better fitted to again become useful citizens of our country and take their place in the world of work. I endeavour to have all my officers feel that it is their duty to set the inmates the example of clean, honest, manly men, and to impress upon all inmates upon their arrival the foolishness of and certain failure of pursuing a life of crime, and I believe when once you convince an inmate that you are honestly interested in his welfare, and anxious to do him good, you thereby secure his respect and confidence, which are essentials in order that he may be reformed.

The chaplains report everything as satisfactory in connection with their work, and I believe are assisting very much to uplift those under their charge.

The surgeon reports the general health of the inmates as good, and sanitary

conditions and water supply of the institution as satisfactory.

Our school-teacher is handicapped for want of accommodation. He is, I believe, doing splendid work with the many illiterate and uneducated inmates who come under his charge, and I hope within another year to have our new hospital with school-room, now under construction, completed and ready for occupation, when much more good will be accomplished.

The providing of moving-picture entertainments during the Christmas holiday season helps to convince the inmates that we are interested in their welfare and

endeavouring to uplift them.

The matron reports everything as satisfactory in her department. Very little trouble of any serious nature occurs in the female department, which indicates that the matrons are excellent disciplinarians and possess good, strong, characters themselves. Our female population has decreased during the past year from 13 to 7, and I expect it to decrease to three or four during this summer. I therefore think it would be advisable rather than keep up the expense of maintaining a female department, to transfer the few we have to the female department at Kingston penitentiary.

I wish to thank the superintendent, the inspectors and the structural engineer,

for the support, encouragement, and courtesies shown me.

MANITOBA

H. W. Cooper, Warden, reports:

The population has shown an increase of 31, being now 224.

Considerable work has been done during the winter. Sufficient stone has been quarried to construct the walls of the new wing, and most of this has been cut.

The fire-fighting system has been improved, and many new appliances installed.

A new ice-house has been built, the officers' dormitory redecorated, and sanitary drinking fountains installed in the trade shops.

Owing to the large construction programme, it has been possible to find other

employment for the men hitherto employed on stone breaking.

Particular attention has been devoted to the library. It has been systematized, extra accommodation provided, and an increased number of good books put into circulation.

The school has proved to be an important factor in the work of the institution.

The number of pupils attending classes is now eight times as large as when the year opened, and it has been found possible to interest eighty per cent of the inmates in some form or another of education, by bringing them under the supervision of the school-teacher.

The discipline of the institution has been satisfactory, owing largely to the

loyal support and co-operation of the guards and instructors.

At present, the first mission held in this institution is being conducted, with apparently most encouraging results.

BRITISH COLUMBIA

W. A. Patchell, Warden, reports:

At the end of September, 1921, we lost the esteemed and valued leadership of our warden, Mr. J. C. Brown, who retired after many years' service. I was afterwards appointed to succeed Warden Brown, being promoted from deputy warden, to date with effect as from October 1, 1921.

There was a steady increase in the prison population. At the beginning of the year 146 inmates were in custody, and on March 81, 1922, the total reached 197.

The health of the inmates generally was good and there were no deaths. Two or three accidents occurred but these proved to be of a minor nature. It was necessary to have X-ray examinations made on one or two of the inmates, which had to be done outside the penitentiary.

There were no escapes from the penitentiary, but John Lynn, who was undergoing a life sentence for murder, escaped from the Mental Home for Criminal Insane at Saanich, Vancouver island, on November 30, 1921, and to date has not been

recaptured.

Discipline among the inmates has been good. The more varied diet given, without increasing the cost of maintenance, and the weekly ration of tobacco issued, have

both greatly tended to help in this direction.

The chaplains report that the spiritual welfare of inmates has been attended to throughout the year, and that the behaviour and interest of the inmates whilst attending Divine service leaves nothing to be desired. Each chaplain now holds a week-day meeting each week.

The Protestant chaplain arranges for a visitor from the outside to come and give the inmates an address at the first meeting of each month. Although there is no obligation to attend these week day meetings, the fact that at the Protestant meeting the attendance has steadily increased until it now reaches 65 per cent, goes

to show that they are well appreciated.

In the last week of every second month the Protestant chaplain also provides a moving-picture exhibition for all the inmates. We are indebted to several film companies in Vancouver who kindly loan us suitable films for display. The conduct at these entertainments has been excellent and such entertainments have made the inmates realize that the authorities are not indifferent to them.

Our thanks are due to the Salvation Army, Vancouver, which gave us a very

good band concert during the summer.

The chaplains have done all in their power to assist in the re-establishment of men released or paroled. It should also be stated that the Salvation Army, through Staff Captain Cummins, gave valuable assistance in this direction.

The schoolmaster reports that the number of inmates attending school has increased from 14 to 40, and besides these, there are 25 others who receive instruction in their cells during the evening in various branches of study. A man may be illiterate when he arrives at the penitentiary, but with the excellent school facilities now provided, there is no excuse for illiteracy when he leaves the institution, and every endeavour is put forth to assist all inmates with their studies.

Many books have been added to the library. It is a pleasure to note that there

has been a much greater demand for technical books than formerly.

An up-to-date garage has now been provided, and the trucks are doing useful work and are proving more serviceable than horses. A farm tractor is also operating satisfactorily.

Farm operations have been fairly successful.

Eight hundred and eleven cords of wood, 450 cedar posts, 8 to 16 feet long, and a great deal of other material was salvaged from the river. This will materially reduce the fuel account for the winter and furnish sufficient posts to meet all fencing requirements.

The work of clearing land was energetically undertaken and fair progress made. At the end of the year about five acres had been thoroughly cleared which will increase in the farm acreage for the future. This will consequently aid us in securing better returns from the farm.

The "Glen Brook" sewer was completed to the end of the reserve, and about 3,000 feet from Eighth avenue were backfilled and graded. Approximately two acres were also graded fronting on Columbia street.

All galleries, stairs, and railings in the central hall were completed. The kitchen and the cells in the south side of the east wing were painted with white enamel paint, greatly improving the appearance, besides being a great aid to cleanliness.

Towards the end of the fiscal year excavating work was commenced for the

foundation of the new south wall. Numerous other small jobs were completed.

We were pleased to receive a visit of inspection from Inspector Smith, when several matters were discussed regarding the prison, and settled much more satisfactorily than could be done by correspondence.

I wish to thank the superintendent and his staff for the assistance and support

they have at all times given to me.

SASKATCHEWAN

W. J. McLeod, Warden, reports:

The prison population has increased during the year by forty-eight.

We had in custody on March 31, 1921, 194 prisoners and on March 31, 1922, 242. During the year we received 125 prisoners and discharged by expiration of sentence 36; by parole, 29; deported, 6; returned to provincial authorities (insane), 5; released by order of the court, 1. There are at present five inmates receiving treatment in

the Mental Disease hospitals.

On May 2, 1921, work was started on the new north or administration wing. This building, which is 155 by 60 feet, was roofed in on October 31 of that year. During the winter 1921-22 much work was done on the interior of this wing, which when completed, will contain the offices of the warden, secretary and accountant; an office for the use of superintendent and inspectors of penitentiaries; the keeper's hall, visiting cage, kitchen, bakery, officers' mess, basement for storage of vegetables, cooling room, school, library, church, chaplains' vestries, as well as the apartments occupied by unmarried officers who sleep on the premises.

The new east wing and hospital erected in 1920 has been plastered and painted

and the greater portion of same is now ready for occupation. All gates, locking

apparatus, etc., have been installed.

During the summer, the residences were given a coat of paint,

The extension on the eastern end of the shops' building has been fitted up as an

up-to-date garage.

The shoe shop has been moved to that portion of the shops' building formerly occupied by temporary cells, and upon the removal of the shoemaker's shop, the tailor shop was enlarged. This was very necessary owing to the increased work in these shops.

Seven hundred and forty-three thousand bricks of excellent quality were made during the summer. Three hundred and forty-eight cords of wood for burning kilns

were cut on our wood reserve and hauled during the winter.

We had some 457 acres under cultivation, off which we gathered 14,728 bushels of oats; 589 bushels of wheat, 2,203 bushels of barley, 201 bushels of peas, 8 loads of green feed, 175 loads of hay, 7,530 bushels of potatoes, 950 bushels of turnips, 650 bushels of beets, 870 bushels of carrots, 60 bushels of onions, and over 4,000 heads of cabbage. We also cut and stacked 106 loads of wild hay.

During the winter 2,570 cubic yards of gravel for construction purposes were hauled. Our trucks were kept employed throughout the year hauling gravel and freight. Had it not been for the trucks hauling gravel we would have been forced to purchase gravel by contract as heretofore. I do not know what we would have

done without them.

Our blacksmith and carpenter shops have been kept very busy during the year with work for our new buildings.

20 - 3

Our school-teacher is doing splendid work. His pupils are making wonderful progress and the addition of this officer to the staff has given a wonderful incentive to the desire on the part of many of the illiterate to learn. The library is well looked after. Many excellent books have been added and are appreciated by the inmates. The new library, when completed, will provide very much more favourable and satisfactory quarters than the present, where the librarian is forced to work under great difficulties. Magazines have been greatly appreciated by the inmates. The chaplains both report the conduct of all inmates while at Divine service as good and all seem to take keen interest in the services.

The surgeon has reported the sanitary conditions, water supply, ventilation, etc., as excellent.

I would recommend that a permanent officer be appointed to care for the motor machinery and transport now in use at this institution. Up to the present, this duty has been looked after by the engineer or other officer on the staff. There should be a qualified motor mechanic employed to keep the tractors, motor trucks, threshing

machine, etc., in condition.

I respectfully draw your attention to the fact that several officers on this staff are still temporary. These officers do not participate in annual increases. Some of them have been employed for a considerable time. Owing to the increase in population and change in hours done by officers, it is necessary that the permanent staff of this institution should be increased, as it is unfair to retain officers on the staff as temporary. They work at a considerable disadvantage financially as compared with those who are permanent.

During the year we were visited by Inspector Smith, who made a very thorough

inspection of everything in connection with the institution.

Work on the new boundary wall is the next large undertaking to be considered. When it is completed, am of the opinion the Saskatchewan penitentiary will compare

more than favourably with any institution of its kind.

Would recommend the return to the system of a mental disease hospital being operated for the care and maintenance of the criminally insane. The present conditions are not at all satisfactory, as frequently considerable trouble is experienced in having insane inmates properly removed to mental disease hospitals where proper care and maintenance may be given them.

I wish to thank the superintendent and his staff for their prompt, courteous

men will send the wall have been pure the personal day office will stake a

treatment and assistance at all times.
