ANNUAL REPORT

*To His Excellency the Governor General and Commander-in-Chief of the
Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

I have the honour to lay before Your Excellency the Annual Report of the Superintendent of Penitentiaries for the fiscal year ended March 31, 1930, made by him in pursuance of the provisions of section 16 of the Penitentiary Act.

I have the honour to be, sir,

Your Excellency's most obedient servant,

H. GUTHRIE,
Minister of Justice.

REPORT OF THE SUPERINTENDENT OF PENITENTIARIES

FISCAL YEAR ENDED MARCH 31, 1920

To the Hon. Thomas G. Thompson, U.S. Senator,
Minister of Justice

During the year I have the honor to submit reports and statistics regarding the administration of penitentiaries for the fiscal year ended March 31, 1920.

The number of inmates in custody at the close of the fiscal year was 2,157, as compared with 2,709 at the beginning of the year. The average daily population was 2,025.

REPORT

OF THE

SUPERINTENDENT OF PENITENTIARIES

FOR THE

FISCAL YEAR ENDED MARCH 31, 1930

To the Hon. HUGH GUTHRIE, K.C., P.C.,
Minister of Justice.

HONOURABLE SIR,—I have the honour to submit reports and statistics regarding the administration of penitentiaries for the fiscal year ended March 31, 1930.

The number of inmates in custody at the close of the fiscal year was 3,187, as compared with 2,769 at the beginning of the year. The average daily population was 2,868.

The following tables show the movement of population at the several penitentiaries:—

MOVEMENT OF POPULATION

	Kings- ton	St. Vincent de Paul	Dor- chester	Mani- toba	British Colum- bia	Sask- atche- wan	Total

The number of inmates confined in Canadian penitentiaries at midnight on March 31, 1930, was 3,187, an increase of 418 as compared with previous years.

The average population for the year was 2,868, an increase of 225 over 1928-29.

One hundred and twenty-four inmates were transferred from Kingston penitentiary to Saskatchewan penitentiary, and 48 from Kingston to Manitoba penitentiary; this because of overcrowded conditions at Kingston. Many of these inmates had long terms to serve; yet their transfers were made without a hitch. A specially barred train was prepared and the long trip lasted three days. Inspector E. R. Jackson was in charge of the transfers.

Two thousand and fifty-six inmates gave Canada as their birthplace.

Three hundred and seventy-seven are under twenty years of age.

One thousand four hundred and sixty are between the ages of twenty and thirty.

Seventy-three are over sixty years of age.

During the past year there were 363 inmates paroled from penitentiaries as follows:—

St. Vincent de Paul	99
Dorchester	87
Kingston	85
Saskatchewan	43
British Columbia	26
Manitoba	23

There were 77 inmates deported.

There were two escapes during the year, both being recaptured and returned to the penitentiary.

There are 38 insane inmates confined in provincial mental disease hospitals, for whose care and maintenance the penitentiaries are paying.

There are 5 insane inmates confined in the penitentiaries, whose reception by provincial authorities has been refused.

No riots or other serious troubles resulted during the year.

The per capita cost per diem was \$1.39.

The cash revenue returned to the Receiver General was \$186,623.32.

The amount expended on capital account was \$805,691.28.

The vacant wardenship at British Columbia penitentiary was filled in September, 1929, by the appointment thereto of Colonel C. E. Edgett, D.S.O., a gentleman with a most enviable war record.

It is with regret that I have to report the resignation of Mr. Robert Wyllie, who for seventeen years has been Deputy Warden of Saskatchewan penitentiary. He has been seriously ill for some months. He was an honest, honourable officer, who worked unstintingly to further the best interests of the institution he served.

Mr. F. Clermont, Chief Keeper of St. Vincent de Paul penitentiary, also resigned during the year, after having served on the staff of the St. Vincent de Paul penitentiary for a period of forty-one years. He was a very popular and efficient officer.

Two officers who retired with long years of service to their credit were awarded the Imperial Service Medal, namely, F. Clermont, Chief Keeper, St. Vincent de Paul penitentiary, with forty-one years, and Vincent Bisson, Tin-smith Instructor at St. Vincent de Paul penitentiary, with thirty-six years.

In September, 1929, the Annual Congress of the American Prison Association was held in the city of Toronto. Some thirty years before the association honoured Canada in like manner. Nineteen officers of Canadian penitentiaries attended the convention and enjoyed the proceedings. The exhibit of goods made in Canadian penitentiaries was by far the best ever shown at any previous meetings of this association. Many of the American delegates expressed themselves as amazed at the variety and excellent quality of the articles manufactured by inmates in Canadian institutions.

The following address was delivered by the Superintendent of Penitentiaries at the Annual Congress of the American Prison Association, on September 25, 1929:—

WHAT SHOULD BE DONE TO INSURE THE FUTURE GOOD CITIZENSHIP OF THOSE SENTENCED TO PENITENTIARY?

In order to accomplish the reformation, while in penitentiary, and the future good citizenship of those committed to same, the first great essential is that the State should provide a proper institution for the incarceration of those sentenced thereto.

A staff should be provided of highly-trained, experienced prison officers—men trained in the handling of their fellow-men. No officer should be employed who has not been thoroughly educated in how to deal properly with, control, and by example morally improve his fellowbeing. It is a most serious mistake to place human beings under the control of officers untrained, and often entirely unfitted to even properly supervise them at work, much less influence them for good.

Character builders are essential as successful penitentiary officers. Great care should, therefore, be taken in the selection of all officers employed. On a religious conception of the entire prison problem, real prison reform must be based. It is a recognized fact that, in order to secure a rebuilding and satisfactory reconstruction of an inmate's character, his heart must be touched. This may only be done by law-abiding, God-fearing officers. Should a godless or brutal officer be placed in charge of inmates, his example will undoubtedly make an impression upon them for evil.

A thorough study of the inmates should be made as to their physical and mental status and no expense spared to cure them, either of physical ills, or mental defects. Also a thorough study of them should be made to find out, if possible, the reason for their wrong-doing. In endeavours to make the best of them, their liberty should be restricted as little as possible, consistent with the safety and well-being of the community; more freedom being granted them as they show themselves worthy of it. All efforts should be put forth to make the best of them rather than the worst.

It is found that many of the inmates confined in our penitentiaries have upon their reception a most exaggerated idea of what they term "their rights," but are entirely lacking in regard to their responsibilities of citizenship.

Inmates should be classified in various institutions according to their age and mentality, and to the extent to which they have committed crime. The young inmates, should their crimes not have been of a brutal or vicious nature, should be segregated from the old offender.

They should be educated by qualified, permanently employed, certificated teachers.

The State should provide sufficient wholesome, profitable, remunerative work for all inmates. The inmate should be given an opportunity of paying his own way while confined, and of assisting dependents left at home as well.

There should be a carefully selected library for use of all inmates. No book that would not have an uplifting influence should be permitted. Most of the newspapers, and many of the books available for purchase to-day should not find a place in the penitentiary library.

Inmates should be taught respect for institutional regulation; the law and order of the place. This is essential as it will instil in them respect for the law and order of the State and enable them to resist temptation upon discharge.

If proper administration is provided, severe punishments will be very few indeed. The more punishment inflicted on inmates in a prison, the stronger the probability that the place is poorly managed. It has also been demonstrated that seldom, if ever, is a conversion to virtue obtained through punishment. Physical force can check, or temporarily restrain, various forms of evil, but usually at the cost of rendering them still more intense and permanent. It is more often the force of persuasion, patience, gentleness, and true religious influence, which can successfully convert those possessing wicked feelings and ugly dispositions. This is a difficult task, however, and one for which only specially trained officers are fitted.

The penitentiary has no right to exist if inmates discharged therefrom are not released better than when they entered. They may be made a beneficial asset rather than a dangerous liability. This may be done through their being given a fair education, taught a trade, paid a fair wage for labour well performed, and given a thorough education in the matter of their responsibility as citizens.

No success may be looked for where idleness and inefficiency prevail. There may be a chance for reform where work is provided, but idleness breeds despair, discontent, and engenders viciousness which can not be cured by punishment or solitude. Without sufficient and proper work, much of what may be learned in a penitentiary is not that which will make for efficiency or morality outside.

An honest attempt should be made to assist the inmates on discharge. They often go out into the world feeling anxious and discouraged as to their future. Then is the time they require a helping hand, moral support and a friend. Work should be secured for them, and an abiding interest taken in them until they become re-established in society. All inmates on discharge should be guided and assisted so long as they require a strengthening hand. Valuable assistance at the present time is being given by "Big Brotherhood" and other such movements throughout Ontario, while the Prisoners' Aid Association of the Dominion, with headquarters in Montreal, has also rendered meritorious service. Outstanding, however, in the help of discharged inmates, and the taking care of their dependents while they are incarcerated, is the Salvation Army. Their efforts are continuous, well organized, humane to an extreme degree, and always of such a nature as to elevate those who come under their control. Too much cannot be said of the work of the Salvation Army in Canada in the assistance of the dependents, and the reclamation of the offender. A great deal is also being done by the Wardens with a view to obtaining proper employment for those leaving their institutions upon discharge. In conversation with a prominent social worker in the city of Moncton, New Brunswick, a short time ago, I was informed by this gentleman that he considered the Warden of the Dorchester penitentiary the best employment agent in the province.

When at the Dorchester penitentiary this month I had the pleasure of learning the following with regard to an ex-inmate, who when received at that institution, had neither education nor trade. He had been taught bricklaying in the penitentiary and upon discharge the warden secured a position for him with a building concern. This inmate wrote a wonderful letter of appreciation regarding what had been done for him and advised the warden that he was now receiving \$1.25 per hour for an eight-hour day, with half pay additional for overtime, and that he was working ten hours each day. This is only a sample of many thousands of cases that could be cited.

Unless sympathetic supervision be given discharged inmates in the community, which will assist, encourage and strengthen them in resisting temptation, they will seldom reform. They must not only be prevented from returning to their former courses, but helped and guided into better ones.

Experience has shown that very few inmates who receive treatment as above suggested, and are assisted after their discharge, return to penitentiaries.

It is useless in many cases to release inmates without having some definite idea of remunerative employment. *Freedom is glorious, but only when it is freedom with restraint, order, and definite purpose*; and if these be provided, and the community, through some agency, will render assistance, the great majority of those who leave the institution will go straight and never return."

Excellent work has been done in the schools of all the penitentiaries and many inmates were discharged with a much better education than they possessed on reception. Many successfully passed the provincial examinations for entrance and matriculation.

Considerable additions have been made to the libraries and a very careful check kept on the books purchased and on the articles published in the magazines provided. The library boards have deleted a great many articles. Three magazines, the principal offenders, have had their subscriptions cancelled. From one, ninety-seven articles were deleted; from another, sixty-seven; and from a third, forty-two. All of these articles were considered as not fit reading for inmates of the penitentiaries.

The work being done in the several penitentiaries is fully described in the wardens' reports.

The task of providing accommodation for the ever-increasing number of inmates has become a serious problem. A new cell block to house 208 inmates is being rushed to completion at Saskatchewan. A new one has just been completed and occupied at Manitoba. A temporary cell block is being erected at St. Vincent de Paul.

A site has been purchased for the Preferred Class penitentiary at Collin's Bay, Ont., and a large amount of building material provided. Construction work began in this institution on March 10 instant. Temporary buildings to house inmates, employed in the construction of permanent ones, are being erected.

In 1895 Parliament voted an appropriation to begin the erection of the first Preferred Class penitentiary in the world. After two years the work was stopped and the project abandoned. Now, after a delay of thirty-five years, those who led the world in this work are being permitted to carry out this much-needed and long-delayed reform.

Property was also purchased at St. Vincent de Paul, P.Q., to form a Preferred Class Penitentiary Reserve for the province of Quebec. Some of the properties bought stood immediately across a narrow street, only thirty feet away from the administration building of the penitentiary. The buildings on these properties have been demolished and their removal has made a wonderful improvement as the former situation had become intolerable.

It will now be possible to erect a Preferred Class institution adjacent to the old penitentiary reserve. The purchase of further properties, privately owned and in close proximity to penitentiary buildings, is essential.

Too much praise cannot be given the Salvation Army for their continued and whole-hearted assistance. They never fail to respond to requests made them to do anything to benefit or assist the unfortunates committed to penitentiary, or their, frequently, still more unfortunate dependents left at home.

RECOMMENDATIONS

1. The reopening of criminal mental disease hospitals—this on account of the unsatisfactory condition existing at the present time. Five insane inmates are confined in Canadian penitentiaries, one with a life sentence, and it has been found quite impossible to have these unfortunates taken care of by provincial authorities.

2. The segregation of habitual criminals.

3. The furnishing of more Government work for the inmates.

Respectfully submitted,

W. S. HUGHES,
Superintendent.

APPENDIX A—ACTING DOMINION PAROLE OFFICER'S REPORT

R. F. Harris, Acting Dominion Parole Officer, reports:—

I beg to submit the annual report on the Dominion parole system for the fiscal year ended March 31, 1930.

During the year I have interviewed 1,057 prisoners, listened to their different pleas, given these the best consideration I could as well as tendering good advice to all those interviewed. I have also assisted in every way possible any of those released on parole who have made application to me.

The following statement shows the number of inmates who were liberated on parole from the penitentiaries and various provincial institutions during the year, the number whose licences were either revoked or forfeited and the percentages they represent of the total releases:—

STATEMENT FOR THE YEAR ENDED MARCH 31, 1930

Prisoners released on Parole	—	Revocations per cent	Forfeitures per cent	Total loss per cent
Dorchester.....	87	1 or 1.14	2 or 2.29	3 or 3.44
St. Vincent de Paul.....	99	2 or 2.02	10 or 10.10	12 or 12.12
Kingston.....	85	6 or 7.05	6 or 7.05	12 or 14.11
Manitoba.....	23			
Saskatchewan.....	43	4 or 9.30	3 or 6.97	7 or 16.27
British Columbia.....	26	1 or 3.84	2 or 7.69	3 or 11.53
Total, penitentiaries.....	363	14 or 3.85	23 or 6.33	37 or 10.19
Jails, reformatories, industrial farms, etc.....	449	12 or 2.67	7 or 1.55	19 or 4.23
Grand total.....	812	26 or 3.20	30 or 3.69	56 or 6.89

These statistics demonstrate that out of 812 persons released on parole 26, or 3.20 per cent, have had their licences revoked for non-compliance with conditions; 30, or 3.69 per cent, have had their licences forfeited by a subsequent conviction. The total loss for the year was 56, or 6.89 per cent.

The reporting of the men on parole comes under the jurisdiction of the Royal Canadian Mounted Police. The following statement furnished by them indicates the movement of the system from 1899 to March 31, 1930:—

Released on parole from penitentiaries	10,038	
Released on parole from prisons, jails, reformatories, etc.....	11,502	
		21,540
Licences revoked	737	
Licences forfeited	560	
Sentences completed on parole	19,646	
Sentences not yet completed	597	
		21,540

A reference to the above table shows the total number of releases from the penitentiaries to be 10,038 and from other institutions, 11,502, making a total of 21,540. Of this number 19,646 have satisfied the conditions of parole. Licences revoked or forfeited number 1,297, or 6.02 per cent. On March 31 last there were 597 men still reporting.

I may say that the various police officers and sheriffs have, as usual, assisted us greatly by furnishing information regarding the previous history of applicants for parole. The Salvation Army has been of very material assistance to us in securing employment for paroled men who had no relatives or friends to aid them, and I cannot speak too highly of the help rendered by the officers of this organization.

I wish to extend my sincere thanks to the wardens and other officials of the different penitentiaries for the valuable assistance and universal courtesy received from them on the occasion of my visits to their institutions.

APPENDIX B—WARDENS' REPORTS

KINGSTON

J. C. Ponsford, Warden, reports:—

	Male	Female	Total
Inmates remaining at midnight, March 31, 1929.....	799	32	831
Inmates remaining at midnight, March 31, 1930.....	773	38	811

Making a decrease of 26 males and an increase of 6 females, or a net decrease of 20.

The admissions during the year were:—

Males	419
Females	15
Total	434

Inmates released during the year were as follows—

	Male	Female	Total
Expiration of sentence.....	142	3	145
Pardon.....	10	10
Parole.....	80	5	85
Deportation.....	31	1	32
Death.....	3	3
Order of the Court.....	2	2
Returned to provincial authorities, Sec. 53.....	1	1
Executed at Bordeaux jail.....	2	2
Transferred to other penitentiaries.....	174	174
	445	9	454
Net decrease.....			20

On April 22, 1929, 48 male inmates were transferred to Manitoba Penitentiary, and 124 male inmates to Saskatchewan Penitentiary, or a total of 172. This transfer accounts for the slight decrease in population on March 31, 1930.

There are at the present time seven insane inmates confined in the Psychiatric Ward of the Ontario Reformatory, Guelph, six of whom were sentenced to life imprisonment. There is also one female inmate confined in the Mental Disease Hospital at Ponoka, Alta.

Of the 811 inmates incarcerated here, 604 are under the age of forty years and 125 between forty and fifty years.

Excellent care and medical attention has been given the inmates by our hospital staff and the general health throughout the institution has been very good. There were two deaths during the year just closed, one from acute kidney disease, the other from a paralytic stroke.

One inmate whose care and maintenance was being paid for in the Psychiatric Ward, Ontario Reformatory, Guelph, Ont., died there.

Progress has been made with the constructional program in all its branches.

New Female Prison.—Steel work has been erected and riveted for the stairs in cell block.

All window sashes for cell block building have been manufactured.

Roof was put on the building, and temporary covering of tar paper was laid, so that work could be carried on during winter months.

Mason gang have finished laying of stone for main walls of cell block, and all walls are backed up with concrete.

Reinforced concrete coping was poured all around cell block building.

Excavation work was carried down to rock, and concrete foundation for a portion of the new boundary wall has been poured.

Stone is being cut for Administration building.

Farm Instructor's Residence.—A new residence for farm instructor has been commenced and is well on the way to completion. It is built of cut stone, and is a semi-bungalow of very modern design. The plastering and interior work is completed, and it is expected to be occupied in a short time. It is being connected to the new female prison service duct, for heat, water, light, etc.

The old stone house on Herron property has been razed and the grounds are being transformed into farm land.

A new fence has been erected between the penitentiary reserve and the Richardson property. It is of non-climbable type; electric globes are placed at intervals the entire length from King street to the water's edge.

New cut stone office was erected for the chief industrial officer in the lower yard.

Painting and whitewashing has been done wherever necessary and everything is in a clean and sanitary condition.

The general embellishment of the prison inclosure has been continued and curbing and surface drains wherever necessary have been placed.

Considerable work has been done by the engineering department at the new female prison, and 2,400 feet new 10-inch water main has been laid in the duct—connecting same up with central plant.

New hot water boiler in boiler room has been installed.

Steam lines from power house to new female prison have been covered.

Heating system has been changed and rewiring has been done in the shoe shop.

New steam line has been laid from power house to main kitchen. New steam-heated table has been placed in prison of isolation.

Plumbing, lighting and heating have been installed in new farm instructor's residence.

The school and library departments are rendering good service to the institution by supplying inmates with carefully selected, wholesome reading matter, and also teaching the illiterates; as well as advancing those who wish to take up higher branches of study. As in former years, it is anticipated that there will be a large number of inmates trying the provincial examinations in June and July.

The mail bag department has been well and profitably operated during the past year, earning a revenue of \$73,950.32, doing work for other Government departments.

The shoe shop shows a revenue of \$13,413.78, tailor shop a revenue of \$4,340.33, and broom department \$1,455.05.

The change room and laundry have been hives of activity in the issuing of clothing and other wearing apparel to the inmates, as well as the laundering of same. All mattresses, etc., transferred with the inmates in April last, were also made there.

The female prison has maintained its high standard of efficiency and it is kept clean and neat at all times.

The spiritual welfare of the inmates has been well and faithfully looked after by our chaplains.

The farm showed a good profit, and supplied the steward's department with vegetables and other necessities. Considerable tilling has been done on the

farm land, and is being continued, so that it is hoped no open ditches will be on our land in the near future. Our piggery has shown excellent results and is a good paying proposition.

In conclusion, I wish to take this opportunity of expressing my highest appreciation for the very efficient manner in which I have been supported by my officers during the year. I also wish to thank the superintendent for any and all co-operation rendered during the year.

I am enclosing herewith reports from the following officers:—

Surgeon.
Chief Industrial Officers (2).
School Teacher and Librarian.
Chaplains (2).
Farm Instructors.
Engineer.
Matron of Female Ward.

ST. VINCENT DE PAUL

Colonel P. A. Piuze, Warden, reports:—

I have the honour to submit herewith the annual report of St. Vincent de Paul penitentiary for the fiscal year ended March 31, 1930, together with the following documents:—

- (A) Statistical report.
- (B) Surgeon's report.
- (C) Chief Industrial Officer's report.
- (D) Chief Trade Instructor's report.
- (E) Farm Instructor's report.
- (F) School Teacher and Librarian's report.
- (G) Roman Catholic Chaplain's report.
- (H) Protestant Chaplain's report.
- (I) Steam Power Plant Engineer's report.
- (J) Steward's report.

From the statistical report it will be noted that on March 31, 1930, the population of this institution was 785 inmates, including those in asylum, temporary paroled or at court as witnesses in civil cases.

During the last fiscal year this institution has received the following number of newcomers:—

From common jails	367
Parole violators	15

The following were discharged during the same year:—

Expiration of sentence	168
Paroled	99
Death while temporary paroled	1
Death while in this institution	4
Death while in asylum	1
Transferred to Kingston (female 7, male 1)	8
Deportation	13
Transferred to asylum under Section 53	4

298

Our average daily population was 718.

One inmate escaped from this institution during the year, but was recaptured a few minutes afterward.

Hospital.—The sanitary condition of the institution is very good; the prison is well ventilated, heated and lighted. Generally speaking, the health of the officers has been very satisfactory during the last fiscal year; also the health

condition of the inmates has been very good and the percentage of sickness very low considering our population. The hospital is very well kept, the hygiene is well and ably taken care of by the surgeon.

I regret to have to report the death of six inmates:—

One died in hospital while on temporary parole;

One died in Bordeaux Criminal Asylum, where he had been transferred under section 56 of Penitentiary Act;

Four died of incurable diseases within the institution.

The following work has been accomplished during the last year:—

Filter House Extension, Nursery Plant and Warden's Garage.—This work has been completed during the last fiscal year. A wash water tank of 25,000 gallons H.L. has been installed; also two additional filters which assure a perfect operation of our filtration system.

Steel structure for plant propagation house 36 feet by 42 feet, occupying upper story of extension of filter house, was erected and glazing of structure completed.

Warden's Residence Extension and Alterations.—Two-thirds of this new extension was done at the end of this fiscal year. This extension together with other alterations change completely the appearance of the house and is a great improvement generally.

New Piggery.—The work at the new piggery has also been completed during the last year. This construction has been made on the most modern plan and is certainly a credit to the institution.

Nine hundred and forty-five lineal feet of non-climbable wire fence 12 feet high has been put up all around the piggery, which renders that place safe.

A new incinerator has been built at the back of piggery where all the rubbish is burnt.

Temporary Cell Block.—The foundation was started on May 15, 1929, and at the end of this fiscal year all the building was up, including the roof, and concrete poured for 54 cells. It is expected that this building will be completely finished by the 1st September next. This temporary cell block will be of great assistance to us while demolishing and rebuilding the old wings.

Eastern Boundary Wall.—The work on this wall was continued and about 30,000 cubic feet of masonry wall was built during the last fiscal year. This new wall and also No. 1 and No. 2 towers will be completed by August 1 next when the bulkhead will be demolished and the grounds duly levelled.

Western Boundary Wall.—Two panels of wall adjoining west gate were demolished, new foundation made and rebuilt; 3,240 cubic feet of wall was built.

Subway.—A subway was built under Canadian Pacific Railway right-of-way. The work was done during the last fiscal year, including the drainage and Canadian Pacific Railway culvert. What is still to be done are the approaches which will be completed early in June. A temporary tramway line has been built in order to transport stone from the quarry. When completed this will be a great improvement and also will assure more security.

Piggery Duct.—This duct was completed in October last; electric light cables, steam line and 6-inch water main were laid.

Old Piggery Building.—This building has been remodelled. The east wing has been converted into a vehicle and machinery storage. The west wing has been divided into two spaces, one for lumber storage and the other for a miniature rifle range. A coat of cement has been put on the exterior with a view

to finishing same like imitation stone. Two old wooden sheds have been demolished thus greatly improving the appearance of that part of the penitentiary premises.

Prison Roads.—About 2,000 lineal feet of prison roads were rebuilt during last summer.

Water System in the Village.—Six hundred lineal feet trench was excavated in solid rock and the laying of sewerage and water main was made on Fabrique street.

The year has been an exceedingly busy one for all departments connected with the building construction trade; much permanent improvement made and fine work performed.

Industries.—The different shops have been kept very busy during the last year.

Bookbinding.—This department has turned out a considerable amount of work, the quality of which was certainly most gratifying.

Tailor Department.—This department has been busily employed in the manufacture of officers' uniforms, inmates' clothing and customers' work, as well as repairing for the year.

Shoe Shop.—This department has also been busily employed during the year and the work done was very satisfactory.

Carpenters.—Considerable work has been done by this department for institutional work and also for customers.

Blacksmith and Machine Shops and Stonecutters' Department.—These three departments have been kept very busy owing to the big program of construction work and are giving entire satisfaction.

Steam Power Plant Engineer's Department.—In this department a considerable amount of good work was done during the past year. Very much has been done in the way of improvements in our water system. The reports from Health Bureau are very satisfactory.

Farm Department.—The results of the farm during the last fiscal year are most satisfactory. The crop has been more abundant and we have sold very much more than in previous years. Generally I am more than pleased with the operations on the farm during the last fiscal year.

School and Library.—Everything possible has been done to promote the welfare of the inmates in this department. The attendance has been good and inmates very attentive to their work. We are very much handicapped, however, by the fact that our School Room is now too small for our population. When the building of the South Wing will be completed, we will have a better accommodation for school and library, and then more can be done towards this important question. The library is well administered; well-equipped with good reading books and magazines. Special attention is given to the censoring of all magazines and literature generally.

Steward's Department.—The food served to inmates is of good quality and the diet much varied. The cost is very reasonable, averaging 18 cents to 19 cents per day per inmate. We are actually working on the foundation of the new kitchen and it is my intention to hasten the construction of that building as quickly as possible, as our present kitchen accommodation is limited.

Roman Catholic Chapel.—The divine service was celebrated every Sunday. The spiritual welfare of all inmates was well looked after by the Roman Catholic

chaplain. A seven-day mission was held, the preacher being Rev. Father Louis Lalande, S.J., who has been conducting the mission during the last ten years and whom the inmates are always pleased to see again.

Protestant Chapel.—The spiritual welfare of inmates is well and ably taken care of by the Protestant chaplain. A seven-day mission was also held under the direction of Rev. Gilbert Oliver, giving very satisfactory results.

I am pleased to say that I am receiving from both chaplains the most loyal support and co-operation.

I wish to add that the conduct of the prisoners generally has been very good and the discipline well observed.

In conclusion, I wish to thank all the officers of this institution who have given me their loyal support during the past year, and to express all my appreciation to the Superintendent and members of the Penitentiary Branch for their assistance and co-operation in the performance of my duties.

DORCHESTER

G. T. Goad, Warden, reports:—

I beg to submit herewith annual report for the fiscal year ended March 31, 1930, together with the following reports:—

1. Statistical.
2. Surgeon's.
3. Farm.
4. Chief Trade Instructor's.
5. School Teacher's.
6. Librarian's.
7. Roman Catholic Chaplain's.
8. Protestant Chaplain's.
9. Engineer's.

At the close of the year our population was 374 inmates, a decrease over previous year of eighteen. One hundred and fifty-two inmates were received during the year, and one hundred and seventy discharged as follows:—

Expiration of sentence	67
Parole	87
Deportation	8
Pardon	4
Died (one inmate died while on temporary parole)	2
Transferred under section 53 of the Penitentiary Act	2

170

One inmate died on December 23, 1929, and his body, not being claimed, was interred in the prison cemetery with appropriate ceremony on December 24, 1929.

In the various departments the following work has been done:—

Blacksmith.—Barriers were made and erected for the third and fourth galleries of the south wing, and also for the new entrance to dome. Iron railings were erected in dome.

All necessary repairs to farm implements were done. Also considerable horseshoeing, making of chisels, drills, etc., and repairing of tools for masons and stonecutters. General repairs in prison shops.

Carpenter.—During the year this department was engaged on general construction, repairs and custom work. All woodwork for two new officers' houses was gotten out, placed and finished. Forms were made and erected for eight hundred and ten lineal feet of concrete duct; also forms for the waterway at new reservoir. New floor was laid in horse stalls; cow barns shingled; new sills

placed on marsh barns; new temporary observation tower fifty-five feet high was constructed. Carpenter work in connection with the new entrance to Dome, and staging erected in south wings for putting up of barriers. New porch was constructed at the east side of warden's house. Four single body dumpcarts were made for farm, and extensive repairs made to farm wagons and carts.

In addition to the above, considerable custom work was done for officers. Filing cabinets and furniture were made for use in prison. Also upholstering of furniture for officers; papering, painting, etc., of officers' tenements.

Chapel (Roman Catholic).—Usual religious services were held every Sunday, Christmas Day, New Year's Day and on Good Friday. Every Saturday at noon confessions were heard, and Communion given on Sundays. A fairly good number of the inmates avail themselves of the opportunity to receive the Sacraments. No mission was held this year, but arrangements have been made for one to be given in May next.

Chapel (Protestant).—Church services have been held regularly and without interruption. Assistance has been given on several occasions by visiting clergymen, also officers of the Salvation Army. Bible class has been held regularly throughout the year.

Communion has been served at stated times, and the average number of inmates taking same was 69.

No mission was held this year, but arrangements are under way for one to be held in May.

Engineering.—An electric centrifugal pumping unit was installed at the Millbrook Pumping Station, together with a three-phase bank of 2200/300 volt transformer; electric heater; automatic starter and auxiliary apparatus.

Electric motors were installed in work shops. Approximately four thousand feet of underground power cable was laid to the Pumping Station. Five thousand feet of underground cable was laid to the water reservoirs to be used in connection with the water level indicator and telephone system. Electric driven rotary pump was installed at the Turner Brook as an emergency unit, and a three-phase, 550 volt, transmission line was erected to supply power to the pump.

Millbrook reservoir was drained and given a thorough cleaning. A serious leak developed later, when temporary repairs had to be made. Later in the year the reservoir was again drained and the leak permanently stopped. Twelve thousand and fifty feet of six-inch water pipe was laid in the duct to new houses. Also, two hundred feet of four-inch pipe to Piggery Yard. Also installed through duct nine hundred and fifty feet of 2,200 volt cable; 3 transformers; 1,120 feet of conduit; 1,950 feet of cable; also junction boxes, switches, etc.

Complete new settings were built under boilers in Power House. Installation of plumbing; hot water heating; electric and sewage systems have been completed for two new officers' houses.

Refrigerating plant was given a general overhauling.

In addition to the above, numerous small jobs were completed including the maintenance work in connection with the electrical and steam systems. Also considerable repairs to machinery and general machine shop and tinsmith work was done.

Farm.—We had a fairly good crop of hay, and in addition to supplying our own requirements for horses and stock, we were able to sell 105 tons at an excellent price. We had an extra good crop of potatoes and same have kept well all winter. We shipped one carload to Manitoba penitentiary.

An excellent crop of turnips, carrots, beets and parsnips was grown, but cabbage, of which we usually have a large supply, was a complete failure.

We got a large acreage of marsh ploughed last fall, but all our marsh land requires an immense amount of work to put it in proper shape.

We sold all our young bulls to agricultural societies for herd leaders, and there is a great demand for our stock. We sold 231 young pigs, and in addition kept the steward well supplied with pork. Our young pigs still continue in great demand and we find it difficult to fill all orders received.

During the winter considerable ice was sold to customers, and part of the farm gang was employed in the woods getting out fence-posts, etc.

Hospital.—In general the health of the inmates has been good. One serious case of pneumonia developed which is now convalescent. Only three accidents occurred during the year. Two inmates were adjudged insane on reception and have been returned to county authorities under section 53 of the Penitentiary Act. One insane inmate was transferred to the Provincial Asylum for the insane and another is awaiting transfer to a suitable mental disease hospital.

Necessary dental work has been done; total cases treated number 199. General sanitation of the prison is good and drinking water supply has been tested during the year and found satisfactory. Wasserman blood tests for syphilis of newcomers show 17 positive and 145 negative.

Library.—Librarian reports a tendency on the part of inmates to read books of a better class than in the past, and is of the opinion that by introducing books by the best authors we will eventually succeed in inducing the majority of the readers to select those rather than fiction of a lighter vein. Books and magazines are chosen with all possible care. No inmate is without a book in his cell at night, and on Sundays extra books are usually issued. We have a very extensive library and are trying to improve same all the time.

Mason.—All mason work including bricklaying, plastering, cement floors for garage, and basements for two more new houses; and foundation completed for an additional single house.

New concrete duct crossing the main highway connecting boiler room and new houses was also completed; 143,000 cement bricks were manufactured during the winter months for use next summer.

Usual repairs were made to buildings, and a new entrance to the cell dome constructed of stone.

Good progress has been made with new boundary wall, but little could be accomplished in the way of pouring concrete during the winter on account of snow and ice. This wall and towers should be completed during 1930.

In connection with the new boiler room, excavation work was carried on nearly all winter and same is completed for the boiler room, coal bunkers and shops to floor level, except the corner through which the present sewer runs.

Stone-crusher has been kept busy providing cracked stone for cement work. This work is done by the yard gang.

Stone Cutting Department.—This department has been engaged continuously getting out cut stone for the new boundary wall and new boiler room.

Motor Department.—Motor trucks were kept busy hauling material, sand, gravel, cement, ashes, lumber, etc., to the various construction jobs; hauling coal and other freight from siding to prison, and considerable hauling of earth for new terraces in front of prison.

All trucks, cars and concrete mixers were overhauled during the winter.

School.—During the year we had an average daily attendance of 99. Out of the 172 inmates liberated, 87 attended school, and teacher reports all were satisfied that the knowledge acquired would be a valuable asset. Progress is very slow at times with the illiterate, of which we have a fair number, but usually they leave the penitentiary much improved educationally. School discipline has been good and not one report has been made for disorderly conduct.

Shoe Shop.—This department has been kept fairly active in connection with the manufacture of uniform shoes, inmates' discharge shoes, prison shoes, etc. Three sets of double harness were made, and repair work done for the various departments. Also general custom work.

Tailor Shop.—Work done in this department consisted chiefly of making and repairing officers' uniforms, inmates' discharge and prison clothing, etc.

In addition to the above over 19,000 mail bags were repaired for the postal department.

General Remarks.—Considerable earth excavation and fill work has been done in connection with the grading in front of prison, during the summer. Owing to the frost and snow, we had to abandon our efforts during the winter. A large gang of men with teams were employed nearly all winter cleaning out debris, bushes and stones in front of the quarry preparing for a new reservoir. Work accomplished was beyond expectations, and am hoping that this time next year the reservoir will be completed.

Would again emphasize the necessity of giving more employment to shoe shop and tailor shop, particularly the former. Uniform boots and clothing could be well manufactured for the railways, postal workers and Militia Department.

The social side of prison life was not forgotten. Moving picture entertainments and concerts were provided on each statutory holiday. We are much indebted to the Maritime Film Board of Trade, and the Ford Motor Car Company of Canada, Saint John, N.B., for their kindness in providing (free of cost) films and picture machine respectively. These entertainments are much appreciated by the inmates, and discipline at same was excellent. I believe light form of entertainment such as we provide, in which inmates take part, tends to do a great deal of good, and does not impair discipline.

I wish to particularly thank Staff-Capt. L. Ursaki of the Salvation Army, St. John, N.B., and also Major McElhiney of the Salvation Army, Montreal, for their kindness in finding employment for many of our inmates on discharge. The former has done wonderful work in this respect.

I trust that ere long district parole officers, for years recommended by you, will be appointed to look after the inmates on discharge, and also that something be done to help their families (if necessary) while they are incarcerated. Employment and supervision (in many cases) should be given to inmates when released, otherwise their chances of getting re-established in society are very doubtful. Every man should be given a chance, and I believe a good live district parole officer would bring this about.

I wish to express my appreciation of the assistance and courteous treatment given me by the Superintendent of Penitentiaries and his staff, also of the good support given me by the officers of this institution.

MANITOBA PENITENTIARY

Wm. Meighen, Warden, reports:

I have the honour to submit herewith annual report, together with
 Statistical Reports,
 Surgeon's Reports,
 Chaplains' Reports,
 Chief Trade Instructor's Report,
 Farm Instructor's Report, and
 School Teacher and Librarian's Report.

Our average daily population for the year was 341·676, the last four months of the year showing a decided increase and resulting in 382 being confined here

at the closing of the prison on March 31, 1930, the highest total in the history of the institution. Of these, 214 were born in Canada, 54 in the British Isles, and 114 of foreign extraction. Forty-eight were under twenty years of age when sentenced.

I am thankful to be able to report no deaths, no escapes, no serious accidents during the year, and no riots or fires.

Of our total number, 119 were sentenced in the province of Ontario, which includes 24 transferred from Kingston penitentiary. We have still five, who were sentenced in the province of Alberta, and three in Saskatchewan, leaving 255 from Manitoba, an unusually large number for this province. Our total population, you will observe, is practically double what it was ten years ago.

I regret to report our farm operations for the year were not successful, due to the dry season which seriously affected crops all over the three western provinces. In spite of all we could do by cultivation, everything we tried to grow, including potatoes and other vegetables, was very poor; but we managed to summer-fallow a great deal of our land, and have certainly got it much cleaner than it formerly was, and with a favourable season we should have much better results next year.

Construction.—We concentrated our efforts towards the erection of our new north wing, kitchen and chapel. We succeeded in getting both closed in so that we could work indoors setting up the hollow tile, plastering, making and putting in the windows, cell barriers and window barriers. At the end of the fiscal year we had all the windows and window barriers in the wing, all the window barriers in the kitchen and chapel; also some of the windows in. We used old storm windows temporarily, on the outside of the barriers, together with boarding some up to keep out the cold, and made it possible to heat the place and allow the masons and steamfitters to proceed with their work. We have some sixty cell barriers in place, and about thirty more ready to be set up. I might mention that it was in the early part of January, before the Manitoba Bridge Company completed their job of erecting the steel trusses, etc., on the chapel, and although the weather was frequently 25 to 35 below zero, we succeeded in boarding in the whole roof structure and shingling the wing in order to keep it warm and dry below, and not a man was injured at this job. We have also some sixty cells plastered, and considerable work done on the ceilings and walls.

We also put up thirteen sheds at the tenements along the north road, put up brick chimneys on all those tenements and attended to other necessary repairs.

The grade on the new north road was completed, but more stone and gravel will have to be hauled to widen the same in places. During January and February, owing to the great depths of snow in the cut, it was impossible to make further progress. We could not use trucks or our cars, and our teams could be and were used to better advantage at other work. Much work has been done constructing our new west road, and most of the excavating for a new Administration building on the west side of our enclosure has been done. We have also the excavation out for one of the new farm residences, and partly out for the second one.

The new sewage disposal plant was painted inside and out, and the ditch was completed that takes the effluent to the municipal ditch, known as the Grassmere ditch, $2\frac{1}{2}$ miles away. Several hundred loads of earth dug from this ditch were hauled to fill up the old holes in the field just west of our enclosure. This field was practically all ploughed last fall, and what was for many years a disgraceful sight is on a fair way to become the best part of our reserve.

The duct leading to the deputy warden's, chaplain's and surgeon's residences was completed. Furnaces were taken out, and the steam from the prison, as well

as the water, connected up. Owing to the increasing number of buildings being heated by the prison, we found it necessary to requisition for two new hundred horsepower boilers, as our present boilers are inadequate to carry the load.

Our school teacher and librarian has been very attentive to his duties, and has had good results from his efforts.

Services have been held regularly in both chapels, and during the last week in March a mission was held in the Protestant chapel, at which eight very prominent ministers of Winnipeg each took a service. Unfortunately our Roman Catholic chaplain, although he asked for the mission, was unable to secure the services of a missionary priest to conduct one at the time, but expects to before long. I feel the one held in the Protestant chapel was a real help to many.

Our surgeon reports the health of the inmates on the whole good. All inmates on entering the prison are vaccinated and have Wasserman tests made. The sanitary condition of the prison is good. Three operations for appendicitis were performed successfully during the year, Dr. Elkin of Winnipeg, assisting our surgeon in performing these operations in the institution.

I regret to report the death of a very capable and efficient officer, in the person of Mr. B. J. Jones, who filled the position of warden's clerk most satisfactorily for almost seven years. Mr. Jones developed cancer and died on January 5, 1930.

I want to thank you for making it possible for me to attend the American Prison Congress, held in Toronto in September, 1929, and also the Wardens' Convention in Ottawa immediately following. I feel that the articles made in our various penitentiaries and displayed in Toronto were an agreeable surprise, not only to our American friends, but to the hundreds of Canadians who previously had little or no conception of the work being carried on in our Canadian penitentiaries.

The officers generally have performed their duties faithfully and well, and have co-operated with me, in trying to perform the work given us to do.

I want to thank you and your staff for the assistance you have given us during the year, and trust you may soon be able to pay us a visit, as we missed you the past year, owing, I believe to pressure of work, as well as ill health, which I trust is now fully restored to you.

BRITISH COLUMBIA

C. E. Edgett, Warden, reports:—

I have the honour to submit herewith the annual report of the British Columbia penitentiary for the fiscal year ended March 31, 1930.

On August 7, 1929, I assumed duty as warden of this institution, taking over from Inspector E. R. Jackson, who had been acting warden during the earlier part of the fiscal year. This report covers the entire year, but great credit for the splendid work accomplished is due to Inspector Jackson and the efficient co-operation of the staff, under his able guidance.

At the close of prison on March 31, 1929, our inmate population was 298, an increase over the previous year of six. One hundred and forty-two inmates were received, and one who escaped earlier in the year recaptured, during the fiscal year covered by this report, and discharges totalled one hundred and seven, as follows:—

By expiration of sentence	65
By parole	26
By deportation	12
By transfer to other penitentiaries	1
By transfer under Section 53	1
By death	1
By escape	1*

* 1 recaptured.

Two insane inmates were maintained in Provincial institutions as on March 31, 1930.

Library.—This department has been efficiently conducted, as usual, under the supervision of the schoolmaster. During the year three hundred and fifty silhouettes were made; many thousand departmental forms printed, and all necessary bookbinding done.

School.—There has been an average attendance of 47 inmates. Special attention has been given to illiterates, with good results. A number of men have been encouraged to undertake more advanced work, but it is felt that more advantage should be taken of the splendid school facilities. It is the intention to double the class during the coming year.

Chaplain Services.—Protestant: During the year a vacancy occurred in the chaplaincy. Since that time the Sunday services have been carried on by selected clergymen and officers of the Salvation Army. Throughout the year the Salvation Army has rendered efficient and valuable service, and the work of Brigadier Gosling in this connection is worthy of special mention and the best thanks of the department. Roman Catholic: The Reverend Father Lardon, O.M.I., continues to devote himself wholeheartedly to the spiritual welfare of the inmates under his charge, with excellent results. I cannot speak too highly of the fine work he is doing, and the manner in which he is co-operating.

Hospital.—The health of the inmates throughout the year has been very good. Sanitary conditions have been carefully supervised by the prison surgeon, Dr. T. Bennett Green.

Steward.—This department is functioning efficiently and well. The food is of excellent quality and is very well prepared. The north end refrigerating room has been re-insulated. The addition of air canopies over the steam kettles and kitchen stove is a real improvement.

NEW CONSTRUCTION

New Boiler House.—Excavation of foundations made by steam shovel in granite and hard-pan, causing difficult and slow work. All concrete has been brought up to ground level and boiler foundations poured.

Deputy Warden's New House.—Water, steam lines and electric light connected and fixtures installed. The new house was occupied by the Deputy Warden on February 25, 1930.

New Administration Building.—Water, steam and electric light connected and fixtures installed. New offices occupied on October 2, 1929.

Outside Driveway and Ornamental Fence.—Twelve hundred feet of 35-foot wide slab has been poured during the year. The concrete roadway, with flower beds, has been completed, and the ornamental block wall with electric light fixtures continued from the cairn, along Columbia street to north driveway; thence along driveway, back to new Administration building and from north driveway entrance to corner of Columbia and Cumberland streets. During the year 1,073 feet of this wall was built, with most of the fabricated iron fence set in. The entire driveway, from north to south, is now in use.

RECONSTRUCTION

The old kitchen has been remodelled, and now houses the shoe shop gang, which has been increased in number. The space formerly occupied by this gang in the old workshops building has been added to the tailor shop, which was formerly very crowded. This gang has also been increased.

North side grounds inside wall have been terraced and seeded to lawn, and a large vegetable garden 115 feet by 187 feet has been set up, with brick retaining wall 18 inches high, near No. 4 tower. This conforms to the garden on the south side of inside grounds.

Three hundred feet of new cement roadway was poured during the year around inside yard.

A beautiful rockery has been set up at left of main entrance inside the walls. This has produced a very pleasing effect.

Duct from boiler house to new Administration building was completed; length 340 feet.

One hundred and fifty-six feet of protective non-climable fence has been built along Cumberland street.

Interior of old Administration building has been remodelled. The new arrangement of offices now accommodates the deputy warden, in warden's old office; chief keeper in accountant's old office; Protestant chaplain in old waiting-room near warden's old office; Roman Catholic chaplain in old courtroom; new courtroom in secretary's old office, and committee room in old visitors' cage. These changes have facilitated administration very materially.

Water-Front.—Foundations for the new warehouse and wharf have been completed, with cement piers carried on piles. This has a six-inch slab on top of reinforced concrete, and is now ready for the superstructure. Most of the piles for supporting the outer wharf have been driven. All these piles and other heavy lumber were secured from driftwood in the Fraser river.

The boat built by inmate labour has proved a success. We have succeeded in salvaging sufficient quantities of logs for firewood. Many timbers and other material used in construction work have also been salvaged.

Farm.—The farm land here shows evidence of serious neglect during past years, but is gradually being brought back into tillable condition through the efforts of our former farm instructor and our present farm instructor. The crop raised last year was very creditable indeed. In fact, we had more than sufficient vegetables to supply institutional needs, and were able to sell the surplus. The same applies to the pigs. We are now not only able to reduce our weekly beef supply by substituting our own pork, but are enabled to sell the surplus for revenue.

A portion of the land south of Eighth street was cleared during the hard winter weather, and this will be under cultivation during the coming summer. Considerable manure and fertilizer will have to be incorporated into the soil from year to year in order to make a real farm.

Engineer's Department.—Plumbing, electric light and telephone systems were installed in the new Administration building and deputy warden's residence through the main duct. Sewers and man-hole construction has been considerable owing to the new building and the necessity for draining on hard-pan soil impregnated with springs. The steam shovel has been kept in repair, and we were able to excavate 10,700 yards of earth. Much of this was in hard-pan. A great deal of alteration and repair work was necessary owing to reconstruction. This department has been very efficiently managed, and a lot of good work accomplished.

Blacksmith Shop.—This department has been kept working at high pressure throughout the year, and has accomplished much valuable work. Eight hundred feet of ornamental fence was fabricated. Cage barrier for inside main entrance was also made, together with heavy manhole covers, barrier doors and windows; forty-five screen barriers with channel frames for new boiler house windows; also screen barriers for new Administration building, besides the carrying on of general repairs and revenue work of the institution.

A very important point in connection with the work of this shop is that a number of inmates have been successfully trained in the work of blacksmithing, and have, on discharge, been placed with outside metal working and contracting firms.

Carpenter Shop.—A great deal of new work has been turned out by this department, and the institutional work maintained. It is gratifying to note that since the change in the management of this shop the work has gone ahead with far greater efficiency and speed; the inmates are more contented; they receive better supervision and much closer attention is given to their instruction. I have great hopes that this department will prove a valuable asset in connection with the training of inmates so that they may leave the institution with a useful trade in their hands.

Shoe Shop.—In addition to extensive institutional work, this shop has undertaken the repair of harness and saddlery for the Militia Department, and the manufacture of leather batons or "dollies" for the various police forces.

Tailor Shop.—This is one of the best managed and most efficient departments in the institution. A very creditable type of work has been turned out, with a small gang working under adverse conditions. Four hundred and twenty-nine articles of uniform have been cleaned, pressed and repaired for the Militia Department, besides a large amount of revenue work for officers, in addition to the making of uniforms and other institutional clothing. With the increased floor space now available we will be able to add materially to the size of the gang in this department.

Laundry.—This department has been able to put through 3,433 garments per week.

Mail Bag Repair Shop.—This department has done well, and is turning out very satisfactory work. To the repair of mail bags for the Post Office Department, the manufacture of walking sticks and silhouettes for revenue has been added.

Garage.—This department, which includes the machine shop, has rendered very fine service throughout the year. Besides handling all repairs to trucks and gas engines, a large number of machined articles in brass have been turned out for revenue. This shop has been particularly successful in training several inmates in machine shop and garage work. A number of the men who served their time in this shop left the institution equipped with a good trade, and are now successfully re-established in the outside world. Credit for this is largely due to the instructor, who is a first-class mechanic, and who devotes his efforts painstakingly to the instruction of the men under his care.

Headquarters Staff.—The personnel of this department, which includes warden's, accountant's and store staffs, has functioned smoothly and efficiently throughout the year. Improved facilities provided by the transfer of the offices to the new Administration building have assisted administration materially.

General.—The wood gang cut 1,731 cords of wood from salvaged logs into 4-foot lengths; 11,000 concrete blocks were also manufactured by this gang, besides electric light standards, vases and tile-work. The lighting arrangement of the Dome has been changed to four hanging lamps, resulting in economy of light and replacement costs.

Fog and rain interfered to a certain extent with construction work, but, nevertheless, a great deal has been accomplished. At the close of the year from sixty to seventy-five men were working daily outside the walls.

I regret to report that, during the month of August, 1929, inmate No. 3432, R. Lay, escaped while working with the wharf gang. Efforts to secure his recapture, however, were continued unremittingly, and he was retaken on March 28, 1930, and returned to the penitentiary.

Certain changes were made in the personnel during the year, to promote efficiency, and I am pleased to report that the officers, with very few exceptions, have conducted themselves well, and have been instrumental in maintaining the high standard which was reached during the tenure of office of Inspector Jackson.

There is one important observation I wish to make in closing this report. I feel that the remuneration of the prison guards is not sufficient to attract the type of men so desirable for this important position. I am strongly of the opinion that the best interests of the service would be served by an increase in the salaries sufficient to take care of the point I have mentioned, and to prevent a possible tendency to augment incomes by questionable methods.

I am very grateful to you, sir, and to the officers under your command at headquarters for the splendid co-operation and helpful advice received at all times. This assistance, I can assure you, has been of great advantage to me as warden of this institution.

SASKATCHEWAN

W. J. Macleod, Warden, reports:

I beg to enclose all reports for the fiscal year ended March 31, 1930. Our population on March 31, 1929, was 268, and at the close of this year 501.

Construction Work.—The new piggery has been completed.

About one mile of concrete fence posts were put in along the boundary line of the farm.

About 300,000 cement bricks have been made during the past year. All of the cement work of the wall has been plaster finished inside, and also on the outside. A terrazzo floor has been laid in the dome. The cement mat, foundation walls and half of the floor were put down for the new shop's dome and part of the mat poured for new boiler house. Considerable earth has been excavated during the winter months for new west wing. Construction work could be started about first of May if plans and material are here. Concrete driveway and curb were put down at south gate.

Carpenter Shop.—This department has been busy making window frames and sash for new shops and dome. All kinds of work has been done, such as making cell chairs, cell cupboards, also tables, benches and stools for shoe and tailor shops. These were made owing to our great increase in population. Forms were made for pouring concrete for new shops. Thirty-four temporary cells were fixed up in cell wings and hospital. Draughting tables and map cabinets were made for the Interior Department. The cell dome was painted and cell wings calcimined and the kitchen and hospital redecorated.

Blacksmith Shop.—Reinforcing iron was cut and prepared for new shops and dome; window barriers were made; horse-shoeing was done for the farm; farm machinery overhauled and repaired. Considerable acetylene welding was done for the various departments.

Shoe Shop.—This department made uniform boots for the officers. Discharge boots were also made, as well as slippers and boots for the inmates. Sets of harness, harness parts, etc., were made for the Interior Department and also for our farm.

Tailor Shop.—This department made and repaired all clothing required for the inmates. Officers' uniforms and overcoats were made and repaired. All necessary discharge clothing was made.

Engineer's and Tin Department.—The old pump house was torn down and all steam and water pipes were salvaged. The steam hoist was moved to the new boiler house and this machine and an electric hoist were used on excavation work. The electric and steam mixers were used at the new piggery. The fire hydrant at south of shops building and pipes were taken up to allow concrete mat to be poured for new building. The water pipes in south cell wing were replaced with larger pipes so as to give a better water supply to cells on top galleries. Two extra electric light circuits were installed in the dome. All repairs were carefully looked after. The refrigeration plant continues to give excellent satisfaction and is still operating on its initial charge of ammonia. A large number of articles were made for the Interior Department and other customers, and all repair work was promptly attended to.

Garage.—Our old trucks which we got from the Militia Department some years ago are still working and giving very good service. This department shows a profit of \$1,791.93. The trucks were used for all kinds of work, such as hauling gravel, cement, coal, lumber, grain, freight from the city and all other kinds of work where a truck can be used.

Farm Department.—We had some 695 acres in crop and 63 acres under summer-fallow. We raised 284 young pigs and sold \$4,448.03 worth of pork. The following was grown on the farm:—

Wheat, Marquis	bush.	3,313	Parsnips	bush.	120
Oats	bush.	9,481	Cabbage	lbs.	14,500
Barley	bush.	1,405	Corn	lbs.	2,203
Hay, tame	loads	150	Onions	lbs.	2,591
Hay, wild	loads	120	Cauliflower	lbs.	734
Straw	loads	200	Peas, green	lbs.	313
Potatoes	bush.	10,000	Radish	lbs.	334
Carrots, red	bush.	524	Rhubarb	lbs.	390
Carrots, white	bush.	138	Beans, string	lbs.	64
Beets	bush.	328	Cucumbers	lbs.	65
Turnips	bush.	535	Lettuce	lbs.	115

The farm shows a profit of \$5,377.18 for the year.

Hospital.—We had two deaths during the year, both from natural causes. Wasserman tests were taken of all inmates. The treatment of syphilitic patients shows by retest that there has been great improvement in the condition of the patients in all cases, and several are reported free of this disease.

Chapels.—Both chaplains still continue to do good work among the inmates and are very attentive to their duties.

School and Library.—The school teacher still continues to do good work in our school. During the year 42 inmates started to school in the primer class. Ten are still in this class and the other thirty-two are in grades 1, 2, 3 and 4. The books and magazines, especially magazines, in our Library are still in great demand.

General.—A large ditch was dug on the outside of the west wall and a culvert put in across the road to carry off the water from melting snow in the spring. This ditch is 1,500 feet long. All custom work and general prison repairs were very carefully attended to. Work is progressing fast on our new boiler house and this building cannot be finished and put into use any too soon, as our old boilers are being pushed to full capacity during the winter months.

I wish to thank the officers of this penitentiary who have given me their loyal support during the year and also to thank the Superintendent and his staff for their assistance and courteous treatment given me at all times.

I regret that Deputy Warden R. Wyllie has been forced to retire owing to ill health. He has been a loyal officer.

PREFERRED CLASS PENITENTIARY, COLLIN'S BAY, ONTARIO

Inspector E. R. Jackson, Acting Warden, reports:—

I have the honour to tender the first annual report of the Preferred Class Penitentiary, Collin's Bay, Ont., for the year ended March 31, 1930.

This new reserve at the time of writing, comprises approximately 684 acres, and is situated west of the city of Kingston, on the Bath road. It is bounded on the east by the Cataraqui creek, on the north by the Bath road, on the west by the forty-foot road and on the south by Front road. It is one of the finest situated reserves in the Dominion, consisting of gentle rolling land, the soil of which makes it one of the best farming areas in the district. The soil runs to a depth of from six to twenty-six feet above limestone rock. The land is sloping so that every portion has ideal drainage. There is not a public road running through the reserve, thus making it an ideal penitentiary site from a safety standpoint, for those incarcerated. The location of this reserve cannot be surpassed for railway and transportation facilities, as the Canadian National Railway is at the present time, building a spur line eight hundred feet north of the north boundary. Water transportation can easily be had along the east boundary of the reserve, on Cataraqui creek, as the southeast corner of the reserve bordering the creek is a very short distance from the junction of Cataraqui creek and lake Ontario. At low water, the creek is twelve feet deep. It would be possible, in the future, at very little expense to erect wharfage, so that coal barges, etc., could be brought to the penitentiary reserve.

The reserve has two magnificent large stone residences which can easily be improved with modern conveniences to house the warden and deputy warden of the institution.

Work of building roads and receiving supplies commenced on March 10. I was placed in charge with the following officers:—

V. J. Harraway, British Columbia Penitentiary, as acting deputy warden.

W. Grant, British Columbia penitentiary, as chief trade instructor.

W. West, Kingston penitentiary, as acting chief keeper.

H. L. Keech, Kingston penitentiary, as acting accountant and storekeeper.

W. C. Smith and S. Ash, both of Kingston penitentiary staff, as truck-drivers.

The department authorized the loaning of inmates, as required by this institution, from Kingston penitentiary, and during the month of March the average amount of inmate labour used per day was fourteen inmates.

The first work necessary was to build a roadway from the Bath road to the old buildings on the "George" farm, which buildings were to be used for general offices and storehouses for material. The foundation of this roadway was made of heavy rock and macadam, and was complete in a week's time, sufficiently good enough to allow the passage of heavy trucks over it.

Material began to arrive by car-load lots, and having a crew of six inmates, we commenced unloading and storing the material, which consisted of cement, lumber, pipe, machinery, etc. The material, at this time, was unloaded at Collin's bay, three miles from the reserve, and from the opening on March 10, to the end of the month, thirty-one cars were unloaded and stored on the reserve. This, I consider excellent progress, owing to the condition of the roads and the

wet weather we had to contend with. Mr. Halliday, Canadian National Railway Agent, at Collin's Bay, advised me that he had never seen material unloaded from cars with such dispatch and although there were on the siding at times, four to five car lots of cement and lumber, etc., at once, we did not have one dollar demurrage charge; in fact, a carload of cement (1,000 bags) was unloaded and hauled three miles in two hours and forty minutes, using three inmates at the railway siding for unloading purposes and five inmates at the storage end.

The woodshed of the "George" house was used as Headquarters office, and the drive shed of one building was used for dining-room for inmates, the meals being prepared in Kingston penitentiary and sent out to us.

Two teams of horses were purchased and temporary stalls had to be erected in one of the old barns on the "George" property.

In conclusion I cannot speak too highly of the interest and loyalty displayed by the officers and inmates placed under my charge. I wish to give special thanks to yourself and staff, and also to Mr. Dillon, Purchasing Agent, for the assistance given me in the management of this institution. The rolling stock purchased was so excellent that we did not lose any time during the unloading of materials.

I wish to convey to yourself the most hearty thanks of the officers of this institution.

APPENDIX C—SCHEDULE OF EXPENDITURE

KINGSTON PENITENTIARY, YEAR ENDED MARCH 31, 1930

Staff—		
Salaries	\$222,397 89	
Retiring allowances	3,567 68
