REPORT
OF THE
SUPERINTENDENT OF PENITENTIARIES

FISCAL YEAR ENDED MARCH 31, 1931

To His Excellency Captain the Right Honourable The Earl of Bessborough,
P.C., G.C.M.G., Governor General and Commander-in-Chief of the
Dominion of Canada.

MAY IT PLEASE YOUR EXCELLENCY:

I have the honour to lay before Your Excellency the Annual Report of the
Superintendent of Penitentiaries for the fiscal year ended March 31, 1931, made
by him in pursuance of the provisions of section 16 of the Penitentiary Act.

I have the honour to be, sir,

Your Excellency's most obedient servant,

H. GUTHRIE,
Minister of Justice.

REPORT OF THE SUPERINTENDENT OF PENITENTIARIES FOR THE FISCAL YEAR ENDED MARCH 31, 1931

To the Hon. HUGH GUTHRIE, K.C., P.C.,
- Minister of Justice.

HONOURABLE SIR,—I have the honour to submit reports and statistics regarding the administration of penitentiaries for the fiscal year ended March 31, 1931.

The number of inmates in custody at the close of the fiscal year was 3,714, as compared with 3,187 at the beginning of the year. The average daily population was 3,434.

The following tables show the movement of population at the several penitentiaries:—

MOVEMENT OF POPULATION

	Kings- ton	St. Vincent de Paul	Dor- chester	Mani- toba	British Colum- bia	Sask- atche- wan	P.C. Ont- ario	Total

The number of inmates confined in Canadian penitentiaries at midnight on March 31, 1931, was 3,714—an increase of 527 as compared with the previous year.

The average daily population of inmates was 3,434; that of 1929-30 was 2,868—an increase of 566.

The per capita cost was \$1.49.

The cash revenue returned to the Receiver General for Canada amounted to \$190,279.20.

Revenue, casual revenue and refund of expenditure amounted to \$200,021.06.

There were 654 inmates released by expiration of sentence; 413 were paroled, 89 deported, 26 pardoned, 12 died, 27 violated the conditions of their parole and were returned, and 1 inmate escaped but was recaptured.

Two thousand four hundred and forty-one were born in Canada, 791 were born in foreign countries.

There were 162 serving life sentences; 2,194 were under thirty years of age; 68 were over sixty years of age; 2,338 claimed to be temperate; 872 claimed to be abstainers; and 504 claimed to be intemperate.

No riots or other serious troubles occurred during the year. Canada is the only country whose penitentiaries were free from such disturbances.

Mr. J. J. Cashman, the affable and efficient Accountant of the Alberta Penitentiary retired on December 31, 1930. He was appointed on August 1, 1906. No officer in the service devoted himself more heartily to the performance of his duties.

Mr. A. Prefontaine, storekeeper of St. Vincent de Paul Penitentiary, retired on January 31, 1931, owing to ill health. He joined the Penitentiary service on June 1, 1911.

Mr. Peter Beaupre, Quarry Instructor of Kingston Penitentiary, resigned on October 16, 1930, having served on the staff of that institution for forty-five years, nine months and seven days. He was an excellent officer, a strict disciplinarian, humane and just. He was awarded the Distinguished Service Medal by His Majesty King George V.

Mr. Arthur McConville, Keeper on the staff of Kingston Penitentiary, resigned on December 31, 1930, having served on the discipline staff of that institution for forty-five years and six months. He, too, had a good record and was awarded the Imperial Service Medal by His Majesty King George V.

There are 38 insane inmates being cared for in provincial mental disease hospitals; for whose care and maintenance the penitentiaries pay.

The amount expended on capital account was \$839,094.62.

Warden W. J. Macleod of Saskatchewan Penitentiary, who had been quite seriously ill, returned to duty, fully restored to health and vigour.

Deputy Warden R. R. Tucker of Kingston acted as Deputy Warden of Saskatchewan Penitentiary throughout the year.

Owing to the heavy and continuous increase in the inmate population, several of the penitentiaries have been forced to place cots in all corridors to provide accommodation. Saskatchewan has 187 inmates sleeping out of ordinary cells.

A temporary cell block with 144 cells was built at St. Vincent de Paul and was filled as soon as completed. A further temporary cell block to accommodate 240 inmates has been begun.

A temporary cell block is being erected at British Columbia, where the overflow is being cared for in two dormitories.

During the year 152 inmates were transferred to the Preferred Class Penitentiary at Collin's Bay. They have been employed at construction and farming. The amount of work performed by these men is unbelievable. No one attempted to escape, though only an ordinary farm fence surrounds the property.

Schools and libraries have been improved. Many pupils have passed the examinations set by the various provincial governments. These examinations are held on same dates as those on which free pupils write and under similar conditions.

A large amount of material has been purchased to be used in the construction of the Preferred Class Institution at St. Vincent de Paul.

Excellent work of high class has been done at all of the institutions. The construction and other activities throughout the year have been fully described by the various wardens; whose reports are herewith.

Many of the young men coming to the various penitentiaries are Canadian born. Their downfall is directly traceable to the lack of proper home training and influence. The percentage to whom this will apply is estimated at about 85.

The judge of the Juvenile Court of Calgary, Alta., stated that 95 per cent of those who came before him did so because of lack of proper home influence and training.

The judge of the Juvenile Court of the city of Detroit places the percentage of those who come before him because of lack of proper home training and influence at 99.

The statements of both of the above judges have been published during the past year.

Other judges of juvenile courts have expressed themselves in like manner.

For some years the Auditor General has published in his annual report statements—purported to be fact—setting forth that the appropriation for penitentiaries had been exceeded. Statement, as follows, appears on page 9 of "Introduction" Auditor General's Report for fiscal year ended March 31, 1930:—

Penitentiaries.....	1927-28	\$62,309 54
Grants.....	1928-29	93,744 11
Exceeded.....	1929-30	33,646 51

These figures are, to say the least, not only very misleading, but they are not a true statement of fact, as in each of the years quoted by the Auditor Gen-

eral and for the two years preceding, as well as the one following, unexpended balance of appropriation, as below set forth, was returned to the Government:—

1925-26.....	\$30,616 96
1926-27.....	79,465 30
1927-28.....	8,105 84
1928-29.....	3,417 16
1929-30.....	15,818 41
1930-31.....	24,153 67

In view of the foregoing, which speaks for itself, protest is made against the misleading statement, above quoted, published in the Auditor General's report, as being most unfair to those responsible for the administration of penitentiaries.

The only just way is to deal with the entire appropriation for penitentiaries as one vote, endeavouring always to keep within the sub-divisions by institutions and services in so far as is possible. Estimates are usually prepared many months in advance of the beginning of the fiscal year, and in dealing with the incarceration of criminals can be at best, by institutions, only an "estimate," as it is quite impossible to determine accurately the number of inmates who will be sent to the penitentiaries by the judges and magistrates throughout the Dominion.

In the past few years it has been necessary, to relieve overcrowding, to transfer a number of inmates to other institutions. This we are permitted to do within the Act, and is in my judgment sufficient reason for my oft repeated recommendation that appropriation for "penitentiaries" be treated as one vote and that this branch be given due credit for consistently (as the foregoing figures reveal) having kept within the total amount voted. This, too, in the face of unprecedented increase in population during the past years.

Notwithstanding that "penitentiaries," since the present superintendent assumed control in 1919, has not at any time exceeded the total amount of appropriation voted by Parliament and has furnished full information of all expenditure—this after every dollar owing by the penitentiaries to the end of the fiscal year had been paid—Parliament has been asked to vote a sum of money to cover certain amounts claimed by the Auditor General as overexpended.

May I, therefore, again recommend the passing by Parliament of appropriation for "penitentiaries" as one vote to be so considered by Auditor General regardless of "estimated" detail by institutions and services, such to be definitely effective for 1932-33.

Respectfully submitted,

W. S. HUGHES,
Superintendent.

APPENDIX A—ACTING DOMINION PAROLE OFFICER'S REPORT

R. F. Harris, Acting Dominion Parole Officer, reports:—

I beg to submit the annual report on the Dominion parole system for the fiscal year ended March 31, 1931.

The following statement shows the number of inmates who were liberated on parole from the penitentiaries and various provincial institutions during the year; the number whose licences were either revoked or forfeited and the percentages they represent of the total releases:—

STATEMENT FOR YEAR ENDED MARCH 31, 1931

Prisoners released on Parole	—	Revocations per cent	Forfeitures per cent	Total loss per cent
Dorchester.....	64	4 or 6.25	4 or 6.25	8 or 12.50
St. Vincent de Paul.....	150	7 or 4.66	8 or 5.33	15 or 10.00
Kingston.....	85	4 or 4.70	5 or 5.88	9 or 10.58
Preferred Class, Ontario.....	2			
Manitoba.....	30	2 or 6.66	4 or 13.33	6 or 20.00
Saskatchewan.....	55	4 or 7.27	5 or 9.09	9 or 16.36
British Columbia.....	29			
Total, penitentiaries.....	415	21 or 5.06	26 or 6.26	47 or 11.32
Jails, reformatories, industrial farms, etc.....	498	8 or 1.60	11 or 2.20	19 or 3.81
Grand total.....	913	29 or 3.17	37 or 4.05	66 or 7.22

These statistics demonstrate that out of 913 persons released on parole 29, or 3.17 per cent, have had their licences revoked for non-compliance with conditions; 37, or 4.05 per cent, have had their licences forfeited by a subsequent conviction. The total loss for the year was 66, or 7.22 per cent.

The reporting of the men on parole comes under the jurisdiction of the Royal Canadian Mounted Police. The following statement furnished by them indicates the movement of the system from 1899 to March 31, 1931:—

Released on parole from penitentiaries.....	10,453
Released on parole from prisons, jails, reformatories, etc.....	12,000
Total.....	22,453
Licences revoked.....	765
Licences forfeited.....	595
Sentences completed on parole.....	20,462
Sentences not yet completed.....	631
Total.....	22,453

A reference to the above table shows the total number of releases from the penitentiaries to be 10,453 and from other institutions, 12,000, making a total of 22,453. Of this number 20,462 have satisfied the conditions of parole. Licences revoked or forfeited number 1,360, or 6.06 per cent. On March 31 last there were 631 still reporting.

I may add that the various police officers and sheriffs have, as per usual, rendered valuable assistance to us by supplying information concerning the previous history of the applicants for parole. The Salvation Army have been of great help to us in securing work for paroled men who had no relatives or friends to do so, and to the officers of this organization I wish to extend my sincere thanks.

I also desire to express my gratitude to the wardens and other officials of the different penitentiaries for their usual assistance and courtesy received from them while on my visits to their institutions.

APPENDIX B—WARDENS' REPORTS

KINGSTON

J. C. Ponsford, Warden, reports:—

	Male	Female	Total
Inmates remaining at midnight, March 31, 1930.....	773	38	811
Inmates remaining at midnight, March, 31, 1931.....	812	44	856

Making an increase of 39 males and 6 females or a net increase of 45.
The admissions during the year were:—

Males.....	477
Females.....	21
	498

Inmates released during the year were as follows:—

	Males	Females	Total
Expiration of sentence.....	164	3	167
Parole.....	73	12	85
Deportation.....	27		27
Pardon.....	16		16
Death.....	3		3
Returned to provincial authorities, Sec. 53.....	1		1
Returned to provincial authorities.....	2		2
Transferred to other penitentiaries.....	152		152
	438	15	453

Net increase..... 45

During the year just closed 152 male inmates were transferred to the Preferred Class Penitentiary, Construction Camp, Collin's Bay, Ont.

Eight insane inmates are incarcerated in the Psychiatric Ward of the Ontario Reformatory, Guelph, seven of whom were sentenced to life imprisonment. There is also one female inmate confined in the Mental Disease Hospital at Ponoka, Alberta.

Of the 856 inmates incarcerated here, 648 are under the age of 40 years and 124 between 40 and 50 years of age.

The surgeon and his staff have given the very best care and medical attention to all the inmates, and the hospital maintains a high state of efficiency at all times. The health of inmates in general has been very good. There were three deaths during the year. One inmate died in our hospital, one at the Ontario Hospital, Kingston, where he had been transferred for treatment, and one inmate at the Kingston General Hospital, where he had been sent, on temporary parole, for special treatment.

Excellent progress has been made in every branch of the building program and the work is going along very well.

New Female Prison.—The floors of recreation room and store room in basement of cell block were levelled off and concrete floor slabs poured.

Considerable plastering has been done throughout the building and should be completed at an early date.

Channel and angle iron supports were erected for the suspended ceiling on the first storey, and also plastered.

Concrete floor finish was laid on the 108 cells, gallery slabs and corridor floors.

Preparation has been made for the laying of the terrazzo floors.

Considerable work has been done on the barriers and this is well on its way to completion.

North, south and west walls were pointed and stonework cleaned of all cement.

Over 18,000 square feet of copper roof was laid on the cell block, which completes the roof of cell block, along with copper ventilators, flashing and ridge rolls, except at the east end where same will connect with stair hall.

Work has been commenced on the laying of the 14-inch bush hammered coursing on the Administration building at the first floor line. Bush hammered coursing pilasters, sills, jambs and ornamental stone for front entrance was laid for entire first storey, and second storey up to and including window arches.

Work was commenced on laying the pointed face and broken ashlar stone for boundary wall around prison for women. Over 20,000 cubic feet of stone was laid on the boundary wall during year.

Paving of Palace Street.—The roadway from Union to King on Palace street was paved with a 26-foot centre, for a distance of 825 feet.

A 5-foot concrete sidewalk was poured on the west side of pavement from King to Union street.

Farm Instructor's Residence.—Hardwood floors were laid throughout this residence, along with all interior trim. Interior woodwork was either finished in natural grain or painted.

Old Asylum Building.—In the reconstruction of the old Asylum building, all stonework in basement of cell block was removed and excavated to rock for six piers.

All structural steel for the proposed three shop floors is completed and riveted in place.

Dock.—New cribwork was constructed at the southeast corner of dock, starting from the old existing crib and extending over to the Richardson property. The old cribwork was repaired and brought up to the level of the new work.

A large amount of work was done for the Preferred Class Penitentiary, including 8 large steel cage barriers, and one large steel cabinet.

The chain link fabric was hung and stretched for the non-climbable fence along the Richardson boundary. Concrete coping was poured on wall base, which completes the 2,100 feet of fence from King street to within 50 feet of water's edge. This fence is also carried westerly to entrance near northeast tower.

The blacksmith and machine shop has been actively employed and a vast amount of work has been done. These remarks also apply to the carpenter shop.

A large gang of inmates has been employed at the quarry getting out stone for various construction work.

The engineering department has been kept extremely busy with construction work. All necessary plumbing was done in farm instructor's residence. New vacuum pump was installed in boiler room. New water lines have been placed in piggery. Air compressor was installed in garage. Toilets, basins, baths and sinks have been all installed in prison for women.

Temporary heating was installed in old Asylum building so that winter work could be carried on.

Water line was laid around new prison for women yard for reconstruction of wall.

New Hobart mixing machine was installed in kitchen, which was a great improvement.

Conduit has been laid in cell block and Administration building of new female prison.

Conduit has been laid in west shops, and these will be ready when required.

Three thousand seven hundred and thirty-six tons of bituminous coal has been used in the boiler house during the year just closed.

The school and library departments are performing valuable service in the educating and uplifting of the inmates. The very best results are being obtained in the different examinations, and it is expected that there will be a large number of candidates for higher honours when provincial examinations are next held.

The mail bag department has enjoyed a good year and has earned a revenue of \$53,308.46 from other Government departments. The shoe shop has produced \$23,255.33 revenue; tailor shop \$8,103.83 and broom department \$1,555.46.

The officer in the laundry and change room has well and ably looked after the welfare of inmates, and no small amount of credit is due that department.

The matrons of the female department have had a trying time looking after the ever increasing number of female inmates, and it is hoped that before long the new building will be completed. The old building is kept immaculate at all times.

The chaplains have performed their arduous duties in a painstaking and efficient manner and they are held in the highest esteem by the inmates.

The farm has achieved very good results, and considerable produce has been turned over to the steward's department for the feeding of inmates.

The permanent fencing of the penitentiary reserve has been completed. The new fence has concrete posts, reinforced and set in concrete with large anchor posts every 150 feet and on the corners; these were built in position and heavily reinforced. There is more than six miles of this class of fence surrounding the reserve.

In conclusion, I wish to take this opportunity of extending my highest appreciation for the very efficient manner in which I have been supported by my officers during the year, and to the headquarters staff, I wish to express my gratitude for all assistance rendered during the fiscal year just closed.

ST. VINCENT DE PAUL

Colonel P. A. Piuze, Warden, reports:—

I have the honour to submit herewith the annual report of St. Vincent de Paul Penitentiary, for the fiscal year ended March 31, 1931, together with the following documents:—

- (a) Statistical report.
- (b) Surgeon's report.
- (c) Chief Industrial Officer's report.
- (d) Chief Trade Instructor's report.
- (e) Farm Instructor's Report.
- (f) School Teacher and Librarian's report.
- (g) Roman Catholic Chaplain's report.
- (h) Protestant Chaplain's report.
- (i) Steam Power Plant Engineer's report.
- (j) Steward's report.

From the statistical report it will be noted that on March 31, 1930, the population of this institution was 785 inmates, including those in asylum, temporary paroled or at court as witnesses in civil cases.

During the last fiscal year this institution has received the following number of newcomers:—

From common jails.....	432
Parole violators.....	12
	<hr/> 444

The following were discharged during the same year:—

Expiration of sentence.....	151
Transferred to asylum under section 56 on 28-5-30, 9611 A. Prud'homme and struck off our strength on 5th August, 1930, expiration of sentence.....	1
Transferred to asylum under section 56 and remain on our strength— A-255, C. M. Cordasco A-373, M. Tremblay	
Transferred to asylum under section 53, A-877, Taupier.....	1
Paroled.....	148
Pardoned.....	2
Death while temporary paroled.....	1
Death while in this institution.....	1
Transferred to Kingston (female 6; male 1).....	7
Deportation.....	17
Released on court order, A-210, M. Tino.....	1
	<hr/> 330

Our average daily population was 819, and the population on March 31, 1931, was 899.

I regret to report that on August 1, 1930, inmate A-430 Jules Lagace escaped from this institution, but was recaptured at noon on the 4th of the same month.

CHIEF INDUSTRIAL OFFICER'S DEPARTMENT

This department has been kept very busy during the whole year, and the following is an illustration of the work which has been done:—

Temporary Cell Block.—The temporary cell block has been completed before the end of the fiscal year, and is certainly a credit to this institution. This new construction permits us to accommodate one hundred and forty-four inmates. It is well-heated, lighted, and of a very good appearance both inside and outside. It is of a great help owing to the increasing of the population.

Southeast Boundary Wall and Nos. 1 and 2 Towers.—This wall has been completed, having done about 40 per cent of the work during the last fiscal year; also two new towers, Nos. 1 and 2, have been built, and they are of the most modern type.

Southwest Boundary Wall.—This wall has also been built during the year, about eighty feet, and joining the southeast wall to where the old No. 2 tower used to be.

Lumber Shed and Miniature Rifle Range.—As reported in last year's report, the old piggery has been converted into a lumber shed, storage shed for farm implements, and a miniature range; the whole has now been completed, and is being used. The last annual musketry practice took place in the new rifle range, giving excellent results. It is a great advantage to have this range, for the reason that the practice is done during winter months and bad weather. In the past we had to do our annual musketry in the summer months, choosing the best weather, and during the time when we were very busy on construction work.

Warden's Residence Alteration and Extension.—The alteration and extension to the warden's residence were completed early last fall. The appearance of the house, both inside and outside, has been improved by 75 per cent, and it is a credit to the institution.

The protective fence between the warden's residence and the convent has also been erected, and is also a great improvement. It assures more security for the gangs working in the pump house and ornamental grounds.

Ornamental Fence Southwest Wall.—The whole foundation of the ornamental fence between the prison and the college has been done up to No. 3 tower; that is to say about 900 feet, and I think that it will be possible to complete the whole work during the present year.

New South Wing, Kitchen, and Roman Catholic Chapel.—Excavation in solid rock was started for foundation of new kitchen, cell block, and enlargement to Catholic chapel, on April 10, 1930, and at the end of fiscal year two-thirds of the work had been completed. We have worked at it during the winter months. About 22,000 tons of rock have been extracted from that excavation. The material from that place has been used for levelling the ground on the Preferred Class Penitentiary, and for making new roads. Our mechanical transport has been kept busy all winter carting away this material.

Change Room.—Alterations have been made to the change room. The partition wall between the change room and the laundry has been removed, thus allowing more light and better supervision. Also the temporary stairway has been replaced by a concrete one and much larger. This work has considerably improved the place.

Stone Shed.—Owing to the increase of population, the old steamfitters' shop has been used as an additional stone shed. The partition wall between the two places has been removed, and with this additional space we can accommodate about 90 stonecutters. The supervision has also been improved.

Subway Under Canadian Pacific Railway Track.—The subway was completed early last fall, the new quarry track installed, and the road going in and out of the subway completely rebuilt. This work has been well done and is also a credit to the institution.

Sewerage Beds.—New sewerage beds were started in September last, and the work has been continued ever since; considerable work has been done during the winter months. Seventy-five per cent of the work is now done, and we expect to complete same before September next.

Prison Roads.—A new road has been built from the new subway to the Quarry about a mile and a half distant. We have now first-class roads on the whole reserve. It is a great improvement, also a great advantage for our mechanical transport.

Repairs to Deputy Warden's Residence.—Early last summer this house was considerably damaged by fire. Repairs have been made, and it is now in a first-class condition.

Prison Yard.—About fifty inmates have been kept occupied levelling ground along wall inside the prison yard, on the south side. This work will be continued this year.

Quarry and Quarry Track.—Tramway track was taken up from subway to west gate, rails were changed and old ties replaced. Considerable work was done at the Quarry during the last year, thirty-nine thousand, one hundred and twenty-two cubic feet of stone were extracted.

Sixty Thousand Gallon H.L. Tank.—Assistance was given to the Horton Steel Company, with the dismantling and removal of the high level tank which was in the yard, and same has been shipped to the Preferred Class Penitentiary, Collin's Bay, Ont.

Painting of Wings.—All cells were painted throughout in north, northeast, and east wings, also hospital and isolated cells.

Concrete Pipes Shop.—A space has been allowed to a small mason gang in the old change room, and during the winter months five thousand, six hundred

and sixty-seven feet 15 inch diameter concrete sewer pipes, and two thousand, four hundred and eighty-seven feet 6 inch diameter concrete drain pipes were made.

Tenements.—All the exterior of Government Block was painted, including galleries, sheds and roof.

Properties Demolished.—The properties purchased from Messrs. Bisson, Gosselin and Mathieu, have been demolished, and material salvaged, also about twenty other properties which were on the ground of the Preferred Class Penitentiary, have been sold by auction.

Preferred Class Penitentiary, St. Vincent de Paul, Quebec.—Preliminary work has been started on the ground of the Preferred Class Penitentiary, and protective fence has been erected all around the ground where the work is to be done. Roads have been built, water, electricity and telephone installed. We have also started the excavation for ducts. All the material ordered for the construction this year has been received, fifty carloads of lumber, cement, instruments and other material have been unloaded during the last two weeks of March. The material has been safely stored, and the lumber well piled on the ground at a special place reserved for that purpose.

CHIEF TRADE INSTRUCTOR'S DEPARTMENT

The different shops in this institution have been kept very busy throughout the year. The carpenters, blacksmith and machine shops had very much to do, owing to the heavy construction program, also a certain amount of work has been done for other institutions.

Book-binding Department.—This department is very well organized and is giving very good results. A large number of books have been bound for different departments of the federal Government. Also a great number of books were bound for the library.

The printing department is doing very well, and we are doing practically all our own printing.

Numerous articles, such as club bags, trunks and portfolios have been made for Dominion Government departments.

This department has manufactured goods during the year for \$4,631.08.

Blacksmith.—The blacksmith and machine shops have been kept very busy, either on new work or repairs for the institution. I wish to mention particularly the excellent work done in connection with the manufacture of the steel sash windows for the female prison at Kingston, and the steel derrick for the quarry at Collin's Bay. These shops are very well equipped with machinery and are giving excellent results. The work done during the year in these two shops amounts to \$10,500.02.

Carpenters.—This department has also been kept very busy on construction work, repairs and customers' work. A large quantity of wooden labels have been manufactured for the Department of Agriculture. New machinery has been added and this shop is now very well equipped. The work done in this shop during the year amounts to \$6,833.20.

Shoe Shop.—This department has made all the shoes required for both the inmates and officers of this institution, and all needed repairs for same. Fine sets of harness have been made for the farm department.

Several orders for boots and shoes have been made for customers and other penitentiaries. Results obtained are very satisfactory. This department has manufactured in the whole year for an amount of \$11,015.04.

Tailors.—Such inmates' clothing and officers' uniforms as needed have been made in this department. A large number of articles have been made for outside

customers and other penitentiaries. Very good work is done in this shop. This department has manufactured during the year, goods for an amount of \$21,822.55.

Tinsmith.—All the tinware for the institution, and the repairs, have been made by this department. A certain amount of work is also being done for the personnel of this institution, and outside customers. This department has manufactured goods during the year for \$1,553.17.

The total amount of work done in the different shops during the whole year amounts to \$56,355.05.

CHIEF ENGINEER'S DEPARTMENT

This department has done considerable good work during the last fiscal year, and the following works have been executed:—

Engine Room and Boiler House.—A new motor and pump for compressing tank for well water have been installed. A new steam main from the boiler house to the kitchen has been put in the tunnel. The three boilers have been overhauled and relined with Plibrico. The total amount of coal consumed during the year was three thousand, five hundred and forty-eight tons.

Garage.—All the motor vehicles have been kept in good running order and everyone has been overhauled during the winter months.

Nursery Plants.—The heating system has been completely installed in the new nursery plant, and everything works satisfactorily.

New Cell Block.—Heating, electric system, telephone and magneto clock stations have been installed. Considerable work has been done in the new cell block by the engineer's department. The work has been well and quickly done.

Water Main and Sewerage Pipes.—The water main and sewerage pipes have been repaired, and a few changes had to be made. The whole system works in a very satisfactory manner. The new sewerage beds are actually under construction, and same will be in operation early this fall.

Steamfitters Shop.—A new pipe threading machine has been installed. All fire extinguishers have been inspected, tested and recharged.

Village Water Plant.—Hydrants have been inspected regularly, also water taps have been inspected in every house. The electric system in the village has also been regularly inspected.

Warden's Residence.—Electrical and water system in the extension of the warden's residence has been completed.

Government Quarters.—Considerable repairs have been made by this department in Government quarters, having forty-five tenants, it takes practically one steamfitters gang busy all the time on different repairs. The majority of the houses purchased recently and now occupied by the personnel of the Institution were in urgent need of repairs. The situation is improving every day, and I hope we will not have so much to do during the present year in this regard.

General Repairs to Cells and Workshops.—Considerable repairs and alterations have been made during the past year, and everything is working in a satisfactory manner.

Preferred Class Penitentiary, Quebec.—This department has done quite a lot of preliminary work on the Preferred Class Penitentiary ground. Temporary arrangements have been made for water, lighting and telephone lines, also fire protection has been installed in the temporary buildings and also at the lumber yard.

MEDICAL DEPARTMENT

The health of the inmates throughout the year has been very good. Sanitary conditions have been carefully supervised by the prison doctor. The prison is well ventilated, heated and lighted. Generally speaking the health of the Officers has been very satisfactory.

I regret to report the death of inmate A-667, Desjardins. He died of narcomania a few days after his admission in this Institution.

Four inmates were transferred to Bordeaux Criminal Insane Asylum during the last year.

I fully concur in the surgeon's recommendation regarding an X-ray equipment, as I consider that same is absolutely necessary in view of the increasing population which is now about nine hundred, and also owing to the fact that it would not be in the interest of discipline and especially security to allow inmates to be taken to outside hospitals.

Improvements have been made during the year, the floors of the hospital have been covered with battleship linoleum, and a complete sterilizing battery has been installed in the dispensary. The hospital store room has been changed, giving more space and facilitating the classification of medicaments.

Two hundred and twenty-nine inmates received dental treatment, one hundred and sixty-four at Government's expense, and sixty-five at their own expense.

CHAPLAIN SERVICES

Roman Catholic Chaplain.—The divine service was celebrated every Sunday and other religious feasts. Every Saturday afternoon confessions were heard, and a great number were receiving Holy Communion on Sundays. A seven-day mission was held, the preacher being Father Louis Lalande, S.J., and very good results were obtained. His Grace Bishop Deschamps visited the institution at the end of the mission, and administered the Sacrament of Confirmation to three inmates. The spiritual welfare of inmates is well and faithfully looked after by our devoted Roman Catholic chaplain.

Protestant Chaplain.—Usual religious services were held every Sunday. The spiritual welfare of inmates is well and faithfully taken care of by our devoted Protestant chaplain. A seven-day mission was also held under the direction of Major (the Reverend) Gilbert Oliver, giving very good results.

I wish to add that, at all times, I am receiving from my chaplains the most loyal support and co-operation.

FARM DEPARTMENT

We have 158 acres of land under cultivation, and including the piggery, the value of products for the year amounts to \$12,233.93.

The crop generally has been satisfactory, particularly the potatoes which figure for 320,693 pounds or 160 tons. We also had other vegetables in quantities. The hay crop was of 225 tons, oats 18,749 pounds, barley 31,104 pounds.

The piggery has given very good results. We have sold 265 young pigs to customers amounting to \$1,684, and 163 hogs to the steward's department amounting to \$5,038.58, making a total of \$6,722.58.

During the year three horses had to be destroyed on the recommendation of the veterinary surgeon, and with the approval of the department. We have now twenty-two horses which are in first-class condition.

Additional fencing has been made, and the existing ones kept in good condition. Also more ditches made, thus improving the drainage of the farm.

LIBRARY AND SCHOOL DEPARTMENT

Library.—The library is well administered and well supplied with good books and magazines. Every inmate is issued with three books or magazines each week, and long sentence inmates are getting an additional book. A certain quantity of new books have been purchased during the year, which has been greatly appreciated.

School.—Our school actually comprises twelve classes, seven French and five English. In addition to that the schoolmaster gives individual lessons to inmates in their cells during three hours in the evening. The majority of inmates attending school or taking individual lessons show great interest in their work, and the results are very encouraging.

STEWARD'S DEPARTMENT

This department is operated efficiently. The food served to inmates is of good quality and the diet varied. The cost of feeding each inmate has been averaging $17\frac{1}{2}$ cents per diem for the year.

Certain promotions and retirements were made in personnel of this institution during the past fiscal year. I am pleased to say that the officers, with very few exceptions, have conducted themselves in a very satisfactory manner, and have greatly assisted me in the maintenance of discipline and in the administration of the institution.

I hope that in the near future, it will be possible to establish a training school for new officers joining the Service, and in my humble opinion the sooner this is done the better, and it would be in the best interest of the service.

In view of the increasing population, I think that every effort should be made in order to hasten the construction of the new Penitentiary, thus allowing us to transfer as soon as possible a certain number of inmates.

In conclusion, I wish to thank most sincerely all the officers of this institution, who have given me their loyal support and co-operation during the past year; also to express all my appreciation to the Superintendent of Penitentiaries and his staff, for their assistance in the performance of my duties.

DORCHESTER PENITENTIARY

G. T. Goad, Warden, reports:—

I beg to enclose, herewith, annual report in connection with Dorchester Penitentiary for the fiscal year ended March 31, 1931, together with the attached reports:—

1. Statistical.
2. Surgeon's.
3. Farm.
4. Chief Trade Instructor's.
5. School Teacher's.
6. Librarian's.
7. Roman Catholic Chaplain's.
8. Protestant Chaplain's.
9. Engineer's.

On March 31, 1931, the population of this institution was 401, an increase in strength over previous year of twenty-seven.

We received during the year 198 prisoners, and discharged 171 as follows:—

By expiry of sentence.....	88
By parole.....	64
By deportation.....	7
By death.....	2
By transfer under section 53 Penitentiary Act.....	2
By pardon.....	5
By transfer to Kingston penitentiary.....	3
Total.....	171

In the various departments the following work has been accomplished:—

Blacksmith Shop.—Fabrication of steel and iron work for new towers. Two sets of ladders made and pipe railings erected on the new southeast and northeast tower walls. Also fabrication and erection of wire screens in change room, and alteration to screens in shop windows. Repairing of wagons, etc., horseshoeing and general repairs to farm implements; making of chisels, drills and repairing of tools for masons and stonecutters. General work in connection with maintenance of buildings, and tinsmith work consisting chiefly of making and repairing cooking utensils, stove and furnace pipes for officers.

Carpenter.—This department has been engaged chiefly on general construction work on new officers' dwellings. Two new houses—one single and the other a double tenement—have been erected and practically completed. All the woodwork required for same was manufactured in the shop. In addition to this, wood forms for another double tenement foundation were erected; also forms for a further seventy-five lineal feet of concrete duct. Woodwork on the new towers was completed. A large number of cart wheels, one single horse sloop, and one large dumpcart were made for the farm. Two farm barns were reshingled. Repairs to horse barn and alterations to cow barn were made.

Forms for new septic tank and a wooden temporary sewer were also constructed.

New paint and upholstering room erected in carpenter shop, and new office erected in blacksmith shop. Tailor and shoe shops have been newly decorated; also kitchen, change room and south wing prison cells were all repainted. General repairs and painting to officers' tenements.

The upholstering branch of this department did considerable custom work in addition to the manufacture and repairing of mattresses for prison use.

Considerable repairs have been done to the McDonald house and inside decorating and painting.

Also custom work for the officers, chiefly making and repairing furniture.

Roman Catholic Chapel.—Services have been held regularly during the year and religious instructions given at each class.

The yearly mission was held in May and proved very successful. It was conducted by the Reverend Father Gill, Dominican Father of Sackville, N.B. Special report has already been forwarded you concerning this.

Confessions were held on Saturday. Communion was dispensed regularly and usual interviews granted.

Protestant Chapel.—The annual mission was conducted by the Reverend John Pringle, D.D., of Sydney, N.S. The missionary dealt chiefly with his own experience in the Yukon and the Great War, from which he drew many lessons portraying christian courage and patriotism. The mission was considered successful. Special report dealing at length with this mission was previously sent you.

Salvation Army officers have visited the institution every month and their services have been most cheerful and helpful. Church services have been held regularly and without interruption.

Holy Communion was administered at stated times—at the last service held on Easter Sunday, fifty-three inmates participated.

Engineer.—Approximately 3,600 feet of electric cable was pulled into conduit in the pipe duct, so that at the present time all houses, except the engineer's and Protestant chaplain's, are supplied with electric energy through the pipe duct and all overhead high tension wires were removed.

An electric water level indicating device was erected at the water supply tanks which enables the depth of water to be ascertained from the engine-room. Refrigerating plant was overhauled. New water supply service was installed in practically all the officers old cottages. Sterilizing equipment in hospital was overhauled and changes made in piping of same. New septic tank was completed and is now operating satisfactorily and is a decided improvement on the old system.

Two D.C. generator units were removed from the power house and shipped to other institutions.

Copper roof was completed on the new southeast tower and partly completed on the new northeast tower.

All plumbing, electrical and heating systems have been completed on the new officers' houses.

A new lighting system and power supply system for electric irons and sewing machine motors were installed in the tailor shop, and several new machines, namely, wood moulding machine, tile machine, and laundry extractor, were installed.

All fire-fighting equipment was tested and inspected quarterly, and maintained in first-class condition.

Farm.—Season opened up quite early and we were able to start ditching on the marsh, April 12. Harrowing was started on May 5. The old Spidle marsh was partially drained and it is a decided improvement. Same could not be completed before seeding time. Seeding was all finished early, but some of the small seed growth was disappointing. Our turnip crop was also quite light, but they fed out well. Haying got under way about July 14 and the crop yielded 600 tons. The grain crop was good, especially the oats, and we have sufficient for our own use through the year. About 75 acres of marsh and about 100 acres of upland were ploughed last fall.

Cattle are in good shape. We have quite a number more than we had last year—Sixty-seven pure-bred Shorthorns as against 48 the previous year; 34 grades as against 24 grades, and the addition of 7 pure-bred Holsteins. Since purchasing the latter our milk and cream supply has shown an improvement, to the extent that we have been able to sell cream to the creamery and also obtain plenty of skim milk for our young stock.

Two hundred and fifty young pigs were sold during the year, and the steward has also been supplied with pork. Regret though that the pigs are rather disappointing at present on account of suspected "Hog Flu." The matter is being given careful attention under the direction of the Experimental Farm Branch at Nappan, N.S., and hope to have same cleared up in a short while.

Horses and teams were kept busy all year and are in good shape.

Hospital.—The general health of the inmates has been good. The influenza more or less prevalent during the year, has, with few exceptions, been of a mild type. Two serious accidents occurred but both with good resultant recovery. Regret to report two deaths during the year, one from pneumonia and the other from hemorrhage (T.B. case). Three inmates were transferred on account of insanity, under section 53 of the Penitentiary Act.

Dental work was done by Dr. E. P. Landry, and 109 inmates given attention.

Surgeon reports sanitation of the prison and workshops is good, and drainage much improved through installation of septic tanks.

Wasserman blood tests made numbered 185 of which 14 showed positive reaction.

Library.—Inmates have been supplied regularly with reading matter week by week and there have been few complaints about this part of the work. Fiction books are still in large demand—mystery and adventure books are mostly in demand; there is little call for history and biography. Technical books are in demand by the inmates employed in the different trade shops. Fiction books have been carefully selected and censored by the library board.

Mason.—During the year this department has been kept engaged on general construction and repair work. New boundary walls were completed, including two towers. Footings were poured for northwest extension, and a septic tank built east of the new east wall; also a concrete spillway at the new reservoir. Approximately two-thirds of the old wall has been torn down, the material from this being salvaged and sent to the crusher. Excavation for the new power house has been carried on extensively through the winter months, and approximately 30 per cent of this done through rock. Since the receipt of the air compressor (February 24) with jack hammer and paving breaker, the progress made has been remarkable considering the weather conditions.

Two new houses, of concrete brick (one single and one double) and two porches were built, also a concrete driveway at warden's and deputy warden's houses.

Concrete bricks, amounting to 207,000 were made; 5,200 lineal feet of 3-inch, 4-inch and 6-inch concrete tile made; also 250 concrete fence posts for farm, to be used for replacements of wooden posts which have proved unsatisfactory in the past. Concrete wall was poured on the north side of the cow barn and a small concrete duct constructed at piggery.

New granolythic floor was laid in hospital.

Stonecutters have been engaged on work for new shops, boundary wall and towers.

Motor.—Concrete mixers and gas engines were repaired and overhauled for mason and farm departments.

Motor trucks were kept in good repair and did excellent work in hauling material for construction work, also coal and freight. Also, considerable custom work was done for officers.

School.—The average attendance for the year has been 99. Discipline has been good, and no reports for disorderly conduct. There is a continual plea from the inmates for admission to the school. It is impossible, however, to accede to all requests. Preference has been given to illiterates—those who it was considered would benefit by school attendance. A class recently organized for the 8th grade has done exceptionally well. Examination papers for New Brunswick schools, 1929, were used as tests, and each member of the class made a pass mark in the papers submitted. In Algebra two inmates made 98 out of a possible 100. In Arithmetic the highest mark was 96, and in grammar 89. Other examinations will follow shortly and we hope by June that these inmates will be able to take the regular provincial Government school examination papers in this particular grade.

Shoe.—This department has been very active during the year making custom shoes; inmates' prison and discharge shoes, slippers and moccasins.

Two new sets of double harness were made, and repairs to old harness done.

Would again ask that several small government contracts be given this department.

Quarry.—Gravel to the amount of approximately 4,120 cubic yards was gotten out, and this department did all the unloading at the siding during the year, and also blasting for the new north wall extension and new boiler house.

Tailor Shop.—Work done in this department consisted chiefly of making and repairing inmates' prison and discharge clothing, officers' uniforms and

custom work for officers and their families. In addition to the above about 17,000 mail bags were repaired for the Post Office Department.

General Remarks.—Grading work was carried on at the warden's and deputy warden's houses until about the end of October; most of the sodding done will have to be taken up and relaid on account of frost upheaval.

Our drinking water system has again given us trouble. During the freshets contamination has been found which made the water unfit for human consumption, and for awhile we were forced to carry and distribute drinking water to the individual cells. The new reservoir located near the gravel quarry has been completed and filled to capacity. Water analysis test gave same as potable.

On account of the heavy snowfall, very little progress was made with the new road excavation on the main highway. Snow storm followed snow storm and we finally abandoned this work, and it was only with considerable difficulty that the roads around the institution were kept open for traffic.

The church missions, both Roman Catholic and Protestant, were a success, and both chaplains strongly favour their continuance, with which I am thoroughly in accord. I personally know that many of the men have benefitted from same.

Our south wing has been newly painted and the low railings on the third, fourth and fifth landings have been replaced by full length barriers.

The shoe-tailor shop and change room have been renovated, necessitated by the fire which broke out in the tailor shop and which gave us considerable trouble in fighting on account of the thick smoke. The fire occurred just after close of prison. The officers responded to the alarm bell immediately and rendered excellent service and had the fire under control in about two hours. Fortunately, very little damage was done.

School has made good progress again this year. I am pleased to say that six pupils are now doing grade eight work and expect to take the New Brunswick examination test papers this summer. Many of the illiterates have made excellent progress. Attendance in school averages about 100, with many on the waiting list.

Regret exceedingly to report the loss by death of Schoolteacher W. L. Allain. He was an exemplary officer and had the confidence and respect of the whole staff. Until the appointment of a new teacher is made, the duties are being carried on by the Protestant chaplain in a most excellent and efficient manner.

I also regret to report the death of two inmates during the year. They were given every possible attention and care by the surgeon and his staff, and their spiritual needs were also taken care of by their chaplain.

It is remarkable the little sickness we have experienced with the inmates, while colds and influenza have been very prevalent in the neighbourhood.

The social side of prison life has not been neglected. Entertainments with moving pictures have been held throughout the year, usually on a public holiday. The films have been gratuitously supplied by the Maritime Film Board of Trade and the machine by the Ford Motor Car Company of Canada, Saint John, N.B., and to both these firms we are much indebted for their kindness. The inmates appreciate these entertainments and I would recommend that same be continued.

The matter of obtaining employment for inmates on discharge has been a very difficult one this past year, and even our good friends the Salvation Army have not been able to assist us to any extent on account of the serious labour situation. However, this organization has been ever kind and helpful to many of the men in caring and providing for them until employment could be found.

In conclusion, I wish to thank the officers of this institution for their support, and also the superintendent and his staff for the courteous treatment and assistance given me.

MANITOBA PENITENTIARY

Wm. Meighen, Warden, reports:—

I have the honour to submit herewith the annual report for Manitoba Penitentiary, for the fiscal year 1930-31, together with reports from the various departments, as called for:—

1. Statistical Reports.
2. Surgeon's Report.
3. Farm Report.
4. Chief Trade Instructor's Report.
5. School Teacher's Report, and Librarian's Report.
6. Roman Catholic Chaplain's Report.
7. Protestant Chaplain's Report.

Our average daily population was the highest in our history, being 395·884. Most notable was the increase during the Fall and Winter months, during which time the police of Winnipeg were very successful in capturing and securing convictions of a large number of youthful bandits and gunmen. The population at midnight March 31, 1931, was 419 inmates, which I am afraid may be considerably increased next year.

Of this number, 299 were sentenced in Manitoba, 230 being from the city of Winnipeg alone, leaving only 69 from the other small cities and rural communities of Manitoba.

One hundred and eleven are either transfers from Kingston Penitentiary, or sentenced from the western part of Ontario, adjoining the Manitoba boundary.

Eight are transfers from Saskatchewan and Alberta, and one transfer from British Columbia.

Practically fifty per cent of our population are between 20 and 30 years of age, while six and a half per cent are under 20 years. We have an unusual number of young boys, most of whom have served various terms in Provincial Institutions, and it is generally the case they require closer watching and stricter discipline than the first offenders.

I am sorry to report we had one death during the year, due to perforated duodenal ulcer.

I am again thankful to report no escapes, no riots, strikes or fires.

We are still maintaining the same three inmates in mental hospitals, as we have done for some years.

During the year thirty were released on parole.

Of the total number incarcerated during the year, some 545 in all, 345 of them received no punishment for violating any of the penitentiary regulations. While we have had to deal occasionally with the odd agitator and troublemaker, we have had no serious trouble.

Construction Work.—The report of our Chief Trade Instructor shows the work done and in progress. During the winter we finished plastering one of the new farm residences, put in the windows, doors, and most of the plumbing. The second farm residence is well underway.

We installed two new 100-horsepower boilers, and had to move and reinstall the one we had.

A sewer line was laid from the new farm residences to connect with our sewage disposal plant.

A good start was made on the erection of our new west wing, but before we can do much more, about two-thirds of our old hospital will have to be removed, and in order that we may do so, we are remodelling a portion of our old hospital and schoolroom into a temporary hospital.

The old Protestant chapel is now being used as a schoolroom since we moved into our new chapel.

The new kitchen is nearing completion.

During the winter, using the basement of the new kitchen, we made several hundreds of twelve and eighteen inch tile, also hundreds of concrete blocks for the cell piers of the new west wing. Some thirty-five to forty men were kept busy cutting stone for the west wing, new wall extension, and Administration building.

We were unable to use our trucks during the winter months owing to the depth of snow, and our farm teams were kept busy every day, hauling coal, gravel and stone, also debris from the yard.

We also have finished the excavation for the extension of the west wall four hundred feet north, and intend laying the foundation as soon as weather permits.

We have more work under way than one Carpenter Instructor can handle, and should have another for a year or two at least.

Farm.—We had very good crops, and although grain prices are low, we feed all our grain anyway, mostly to the horses and hogs.

Our Surgeon reports the general health and sanitary condition of the prison is good.

Our school teacher and librarian has been very attentive to his duties and has shown good results.

The two chaplains have likewise performed their duties satisfactorily.

We were sorry indeed to lose the services of our Assistant Accountant, Mr. Birchenough, who was one of our most popular and efficient officers, but at the same time, very glad to see him promoted by being transferred to your office, where I feel confident he will give continued satisfaction.

The officers as a whole have performed the duties assigned to them quite satisfactorily.

While I have no doubt the need for economy is urgent, yet we cannot prevent increase in population, which means increased accommodation, food and clothing.

In conclusion permit me to again thank you and your staff for the many courtesies extended to me during the year.

BRITISH COLUMBIA PENITENTIARY

C. E. Edgett, Warden, reports:—

I have the honour to submit herewith the annual report on the British Columbia Penitentiary for the Fiscal Year ended March 31, 1931:—

Prison population, March 31, 1930.....	334
Received during year.....	184
	<hr/>
	518
<i>Discharges—</i>	
By expiration of sentence.....	79
By parole.....	29
By deportation.....	19
By transfer to other penitentiaries.....	1
By death.....	1
By pardon.....	1
	<hr/>
	130
Total population, March 31, 1931.....	<hr/>
	388

The total of 388 includes 3 inmates maintained in the Provincial Mental Hospital, Essondale, as on March 31, 1931.

DEPARTMENTAL

Library.—This department has been efficiently conducted under the supervision of the schoolmaster. Real advantage has been taken by the inmates of the splendid technical section. Serial stories from magazines have been made up into book form and bound, to the number of nearly one hundred, thus materially adding to the library.

School.—There has been an average of 78 pupils in the school, thus doubling last year's attendance. Special attention has been directed towards the illiterates, with gratifying results. Discipline of the school has been very good.

Chaplain Services (Protestant).—The Rev. H. A. Ireland assumed duty as Protestant chaplain on July 1, 1930, and has performed his duties throughout the year in a very satisfactory manner. Brigadier Gosling, of the Salvation Army, continued his Wednesday noon classes, and also rendered valuable service by taking over the Sunday service prior to the appointment of the present chaplain. His assistance is deserving of the special thanks of the Department.

Chaplain Services (Roman Catholic Chaplain).—The Rev. Father Lardon, O.M.I., has continued his excellent work in a very satisfactory manner, and his influence on the inmates has had a good effect on discipline generally.

Hospital.—Health of the inmates throughout the year has been exceptionally good, and the sanitary conditions of the institution have been carefully supervised by the prison surgeon, Dr. T. B. Green.

Steward.—This department is rendering a very high class of service. The excellent quality of the food, and the low cost of same reflects great credit on the steward and his assistant.

Blacksmith Shop.—I regret to report the loss by death of our very efficient blacksmith instructor, Mr. H. J. Cooper, on November 16, 1930. Since that time, this department has been without a qualified instructor, until the appointment of Mr. C. Cocroft on March 17, 1931. During the year considerable ornamental fence was fabricated, also barrier doors and windows, besides the carrying out of general repair work, and revenue work. A number of men trained in this shop are now successfully established in the city of Vancouver.

Carpenter Shop.—This shop has had a very busy year, and, under the able guidance of the carpenter instructor, a large quantity of work has been turned out. I cannot speak too highly of this department.

Shoe Shop.—This department has been carrying on the usual institutional work, which has materially increased as our population has grown.

Tailor Shop.—This department has maintained its high state of efficiency, both in discipline and in the quality of the work turned out. Besides the regular institutional work, which has increased, we have done a great deal of revenue work for the Department of Militia.

Engineer's Department.—New six-inch water lines have been laid to the hydrant at the deputy warden's residence and to the wall hydrant in front of the Administration building. Storm sewer was completed to north of Administration building, and pipe laid for irrigation to Deputy warden's lawns, for the use of waste water. New drains have been laid from the piggery to the main sewer. Necessary repairs to machinery were carried out. Interior wall lighting has been completed. Telephone and electric light systems have been kept in good shape throughout the year. This department has rendered splendid service, and has co-operated in every way with the other departments.

Garage.—This shop has been very busily engaged throughout the year with maintenance of trucks and other institutional work. Considerable revenue work was done. A quantity of old shell cases and scrap brass was received from the Department of National Defence.

Mail-bag Department.—This shop has been kept well employed throughout the year, 16,263 mail bags being repaired altogether, also 1,200 silhouettes made for revenue requirements, besides mattresses and other institutional work.

Wood Department.—Large quantities of wood were salvaged from the river Fraser, some of which was used for institutional wood work and the making of cedar chests, etc., besides 1,629 cords, which were cut and delivered to the boiler house for use as fuel.

Steam Shovel.—During the year, the steam shovel moved 10,775 yards of earth.

Cement Products.—Cement products turned out during the year were as follows:—

White-faced cement bricks.....	40,000
12-inch duct for steam pipe.....ft.	150
24-inch flower vases.....	10
Caps for posts.....	21
Brushed lamp posts.....	6
24-inch by 8-inch building blocks.....	1,000

Farm.—This farm is gradually being brought into a good state of cultivation, with the result that a much heavier average tonnage was grown this year. During the winter, all that portion of the land lying south of Eighth avenue was cleared, from Cumberland street to edge of ravine. A portion of this land will be under cultivation during the coming summer. Most of this land is well suited to farm work. Our farm is now a credit to the institution.

General Maintenance.—Work during the year included general maintenance of the prison buildings, alterations, etc., demolition of old No. 3 tower, and general roofing and painting. During the summer, owing to the increasing extent of the ornamental grounds, a great deal of grass cutting and gardening was done.

Laundry.—This department has functioned very efficiently, and is one of the best organized and most capably handled departments in the institution.

Headquarters Staff.—The personnel of this department, which includes the warden's staff, accountant's office and stores, has functioned efficiently and smoothly during the year.

NEW CONSTRUCTION

New Boiler House.—The new boiler house is nearing completion, the wood vault having been completed some months ago. Excavation is now under way for the foundations of the water tank at the rear of this building. Walls are built up to the level of the roof; first floor and roof slab have been poured. On the ground floor and boiler room the lining of the wall with white-faced brick is nearly finished. The window casings and mesh barrier are all in place. On the rear side of the boiler house a large wood vault was completed last fall. This will hold nearly 400 cords of firewood.

Warehouse at Wharf.—This building of steel and concrete is now in daily use for the storage of coal and cement. The outside wharf of timber is completed. The wharf now has a depth of 12 feet at low tide.

Deputy Warden's Grounds.—The non-climbable fence has been completed at rear of deputy warden's grounds, connecting Cumberland street fence with the main prison walls. This fence is fitted with electric lights.

Brick garage at deputy warden's residence has been completed, also driveway from the garage to rear of deputy warden's house, and from garage to main driveway. The stairway, with ornamental railing, up to deputy warden's house has been completed. Side wall, consisting of concrete blocks has been completed from the garage, along the driveway, to Columbia street. This wall is nearly one hundred and fifty feet long.

Deputy warden's grounds north and south of the deputy warden's residence have been graded and sown to grass, and a rockery put in.

Farm.—Concrete drain 20 inches in diameter and 150 feet long has been built in small ravine running from Cumberland street to ravine. It is the intention to make a fill here, and reclaim this portion for farm use.

New Driveway.—During the year, considerable work has been done towards the completion of this part of the front.

New Green-House.—Foundations and side walls of concrete blocks have been built and timbered for the superstructure. This green-house will be completed and ready for plants this coming fall.

Grounds Adjacent Accountant's Residence.—The embankment between the accountant's residence and the tenements has been graded down, and a dry wall built at the foot of the slope. This grading has been carried on as far as the mental hospital ravine, where considerable filling has been done during the year. With regard to the main ravine at rear of the accountant's residence, this has been completed to grade and will be laid out and a portion sown to grass during the summer.

West Wing.—Cell gates and barriers have been erected on the third floor, with travelling bars in place, cells and walls painted and kalsomined. This floor will provide additional accommodation for 37 men.

General.—Fog and rain interfered, as usual, during the fall and early spring, with construction work. However, I feel that a great deal has been accomplished. At the close of the fiscal year upwards of ninety men had been engaged on work outside the walls. Certain changes were made in the personnel during the year, in order to promote efficiency, and I am pleased to report that the officers, with very few exceptions, have maintained the high standard that you have always demanded of them.

In bringing this report to a close, I must express my gratitude to you, sir, and to the officers under your command at headquarters, for the splendid co-operation and helpful advice received at all times. This spirit, I feel, has made itself felt among the officers of this institution, resulting in much good work being accomplished during the year just closed.

SASKATCHEWAN PENITENTIARY

W. J. Macleod, Warden, reports:—

Enclosed please find all reports for the fiscal year ended March 31, 1931.

Our population on March 31, 1930, was 501, at the close of this year 603, and only cell accommodation for 416.

Construction Work.—The brickwork on new shops dome was practically completed at the end of the year and all steel work on new boiler house and engineering wing erected. Excavation work for new cell block was finished during the year and the concrete foundation poured up to the first floor level; foundation has also been put down for kitchen extension on this wing. The new piggery is now all finished and will be occupied very shortly. A standard duct has been completed from new boiler house to new piggery. A storm sewer 1,400 feet long to take all surface water from roofs and melting snow

in the spring has been put down. About 140 feet of excavation work for west wing of new shops building has been completed, also excavation for new root house 45 by 220 has been done. Excavation for compost pit was finished during the winter months. Five hundred and fifteen thousand cement bricks (common and face), 1,650 cell pier blocks, 1,000 cement drain tiles, 200 cement fence posts and 95 cement sills have been made. About 1,000 feet of cement sidewalk was put down.

Carpenter Shop.—The outside carpenter gang made and erected forms for pouring concrete at new cell block, new engineering shops and dome, standard duct and coal vault. In the shop window frames and sash were made for new shops and new cell block, also oak doors, cell chairs and cupboards were made. Numerous other necessary articles were made.

Engineer's and Tin Department.—Numerous utensils were made in the tin shop during the year. Plumbing and steamfitting were efficiently looked after during the year. The electric hoist has been in use at the new shops building and the steam hoist was used to drive piles for foundation for kitchen extension of new cell block. Extra electric lights were put up in all the corridors of the cell blocks where inmates were sleeping owing to lack of cell accommodation. Two flood lights were placed, one on each end of shops building and one on the wall at northwest tower to light yard at night. These have proven to be very satisfactory. A new interphone system has been installed and is giving good satisfaction. The refrigerator plant is still giving excellent satisfaction. All other electrical work was attended to very promptly.

Blacksmith Shop.—This shop was very busy making gate and window barriers for new shops and cell block, along with all the other work which has to be done by this department.

Shoeshop.—Numerous sets of harness and harness parts were made for our own use and also for other penitentiaries, as well as all other necessary work.

Tailor Shop.—With our large population and very small shop, this department has had a very busy time keeping up with our requirements of inmates clothing and officers uniforms.

Garage.—This department has been very efficiently and carefully looked after and the trucks have been kept on the road and have done an enormous amount of work.

Farm Department.—We have some 768 acres of land under cultivation. We raised 337 pigs this year and the steward's department took 39,762 pounds dressed pork. Our vegetable crop was rather light owing to damage by cut-worms. We had our wheat gristed and supplied the steward with 2,002 bags of flour.

The following was grown on the farm;—

Wheat.....bush.	3,500	Parsnips.....bush.	153
Oats.....bush.	10,000	Cabbage.....lbs.	11,600
Barley.....bush.	1,612	Corn.....lbs.	7,297
Hay, tame.....loads	280	Onions.....lbs.	4,331
Hay, wild.....loads	80	Cauliflower.....lbs.	708
Straw.....loads	216	Peas, green.....lbs.	817
Green feed.....loads	7	Radish.....lbs.	1,166
Potatoes.....bush.	10,079	Rhubarb.....lbs.	252
Carrots.....bush.	658	Beans.....lbs.	1,108
Beets.....bush.	230	Cucumbers.....lbs.	578
Turnips.....bush.	380	Lettuce.....lbs.	806
Mangels.....bush.	253	Spinach.....lbs.	90

Hospital.—We had three deaths during the year all from natural causes. Wasserman tests were taken of all inmates when received here. The treatment of syphilitic patients by re-test, show considerable improvement and several have been reported as free from this disease. Our surgeon has been very attentive to all patients under his charge.

Chapels.—Both chaplains still continue to do excellent work among the inmates under their charge and they are very attentive to their duties.

School and Library.—The School teacher still continues to do excellent work. Two inmates wrote the Grade XI examinations in French grammar and French authors and translation, and passed with honours. Three inmates wrote Grade 8 examination and passed, two with honours. The books and magazines in our library are always in great demand.

General.—Our new boiler house will not be in use this coming winter. Our old boilers are being pushed to full capacity and cannot furnish heat for new cell block.

I wish to thank Acting Deputy Warden R. R. Tucker, for the loyal and efficient assistance which he has given me at all times since taking over the duties of deputy warden at this penitentiary, and also to thank all other officers who have given me their loyal support during the year, and also to thank the superintendent and his staff for their assistance and courteous treatment given me at all times.

PREFERRED CLASS PENITENTIARY

COLLIN'S BAY, ONTARIO

Inspector E. R. Jackson, Acting Warden, reports:—

I have the honour to tender the second annual report of the Preferred Class Penitentiary, Collin's Bay, Ont., for year ended March 31, 1931.

This twelve months' report practically covers the starting of the Preferred Class Penitentiary as the period covered by my previous report was of such a short duration that it merely dealt with the unloading of materials.

The site having been chosen for the permanent buildings and the area laid out for the permanent enclosure, which will include thirty-one acres, the temporary enclosure which was to surround the temporary buildings was so laid out and so placed that it would not be interfered with when erecting any of the permanent buildings, thus the erection of permanent buildings, enclosure, walls, fences, roadways, etc., could be proceeded with without interference with the temporary enclosure.

Every day was a day of activity. Four motor trucks received the inmates at Kingston Penitentiary and brought them to the Preferred Class Penitentiary reserve at eight o'clock in the morning. They worked all day, their noonday meal being cooked at Kingston Penitentiary and brought to them at the new reserve, and for a considerable time they ate it out of doors. The inmates were returned to Kingston Penitentiary every evening in time to not interfere with or delay the count of that institution at closing time.

The following buildings and works were accomplished during the year:—

Water Tank.—A 60,000-gallon service water tank, with a 10,000-gallon drinking water tank, was erected. This tank was formerly used at St. Vincent de Paul Penitentiary. The inmates at this institution constructed the piers and supplied the labour in the erection. Five thousand feet of 8-inch and 10-inch water main was laid from the above tank to the site of our permanent pump house. This work was carried on by six or eight inmates while another gang was excavating and building the pump house, which was completed and in operation by November of that year.

Coffer Dam.—The building of the coffer dam for the laying of 10-inch cast iron pipe from the pump house to the middle of Cataraqui creek was a difficult task, and it was during the final completion of this job that in compartment

No. 3 of the coffer dam we encountered quicksand. This was noticed at 4.30 p.m. as we were pumping this section out preparatory to laying the heavy pipe. We decided that should we leave the work till the following morning our former three weeks' work would be washed away. We immediately fed the twelve inmates we decided to use at this work, and with the aid of six lanterns we completed laying the balance of our intake pipe with rose-bowl attached at 10.30 p.m. same night.

Dormitories, etc.—Four dormitories, 25 feet by 150 feet long, capable of housing 200 inmates, were erected, painted, wired for electric light, complete steam radiation installed together with sanitary equipment complete.

One boiler room with laundry and inmates' wash room, 25 feet by 150 feet, was completed with central heating plant, laundry machinery, etc., all installed.

Stores and officers' building erected, 25 feet by 150 feet. This building houses the deputy warden's and chief keeper's office, keepers' hall, officers' mess and stores for steward's department. This building is also equipped with steam radiation, electric light, toilets and wash room.

A hospital was built with twelve-bed accommodation, dispensary at one end and convalescent sunroom at the other end. This building has a complete bathroom, etc.

All these buildings are lined with gyprock and well insulated, lighted and well ventilated, and our central heating plant with just one boiler in operation had no difficulty during the winter in keeping the buildings well heated. The sleeping quarters have a small window in each cubicle so that each inmate may have as much fresh air as he desires.

Pump House.—There was also erected a drinking water pump house which has in it two wells 158 feet deep, from which is derived the very best of water. Samples of this water are sent to Queen's University regularly and reports received show it be to A1. By a separate piping system this water is used exclusively for drinking and cooking purposes.

Fire Protection.—Within the enclosure there is a complete system of 6-inch water mains with three hydrants to which is attached sufficient fire hose, complete with nozzles, to reach any portion of the temporary enclosure. Several dozen fire extinguishers are also distributed throughout the buildings.

Carpenter and Machine Shop.—There has also been erected a carpenter and machine shop 28 feet by 150 feet with a 4-inch cement floor and the walls bricked inside for fire protection. A number of machines were also installed in this building.

Within the enclosure there was a complete system of sewage and drainage installed connecting all the temporary buildings.

On the various farms which were purchased and which form the Reserve, there were a number of old stables and sheds which were reconstructed to house twenty-four horses. A number of smaller sheds were repaired for temporary storage purposes. Others were torn down and the material used for erecting a stone-cutting shed at the cliff property. The "George" farmhouse was converted into the general office, housing the acting warden, accountant and store-keeper. An office for the chief trade instructor was built.

The year was one of considerable activity when one considers the small amount of inmate labour used. From April 1 to December 18, the average man power was sixty-three inmates, the majority of whom had done very little hard work. Not one knew anything about bricklaying and only two or three knew anything about carpenter work, and yet, they not only completed quarters for themselves, including painting and decorating, but installed all the radiation and laid five thousand feet of eight and ten inch water main in which there was only one leak discovered when tested and that was due to a split pipe.

There was also 12,968 cubic yards of excavation work done and 5,099 cubic yards of concrete poured.

On December 18, we were able to take from Kingston Penitentiary our first quota of inmates numbering forty-eight for sleeping. On December 20, we received fifty more, January 15, three, and on March 26 a further fifty-one inmates, making a total of 152 of which two were paroled, one pardoned and one returned to Kingston penitentiary, leaving our count at 148 inmates on March 31, 1931.

During the whole year we had practically no trouble. The interest and initiative displayed by the officers made my task a very pleasant one.

The health of the inmates has been remarkable. During the year there were only twelve inmates ill enough to be admitted to hospital, the total number of days being spent there by the twelve inmates being twenty-four, or an average of two days for each of the twelve inmates.

In conclusion, on behalf of the officers of this Institution and myself, I wish to thank you most sincerely for your kindly advice and interest at all times. Please convey to Mr. Dillon, Purchasing Agent, and your staff my appreciation for their co-operation and any assistance rendered this Institution in the past year.

I am enclosing herewith reports from the following officers: Surgeon, Chief Trade Instructor, Engineer, and Farm Instructor.

All of which is respectfully submitted.

APPENDIX C—SCHEDULE OF EXPENDITURE

KINGSTON PENITENTIARY, YEAR ENDED MARCH 31, 1931

Staff—		
Salaries	\$226,165 92	
Retiring allowances	14,844 17	
Uniforms	7,178 80	
Mess	9,113 60	
		\$257,302 49
Maintenance of Inmates—		
Rations	73,669 34	
Clothing	15,297 26	
Hospital	9,142 51	
Dental services	2,969 20	
Pipes, tobacco and lights	4,258 92	
		105,337 23
Inmates' Discharge Expenses—		
Freedom suits	3,471 58	
Travelling allowances	4,037 60	
Transfers between institutions	71 85	
Interments	35 00	
		7,616 03
Working Expenses—		
Heat	20,829 94	
Light	1,781 84	
Water	448 09	
Maintenance of buildings	28,979 77	
Maintenance of machinery	5,070 94	
Maintenance of furnishings, utensils, motor cars and trucks	5,741 70	
Maintenance of chapels	1,231 14	
Maintenance of school	711 58	
Maintenance of library	1,054 19	
Office expenses	3,360 10	
		69,209 29
Industries—		
Farm	8,723 48	
Trade shops	53,416 92	
		62,140 40
Prison Equipment—		
Machinery	7,587 20
